Social Theory Of International Politics:

Social Theory of International Politics Alexander Wendt, 1999-10-07 Develops a cultural theory of international politics which contrasts with the realist mainstream *Social Theory of International Politics* Alexander Wendt, 1999 In *Social Theory of International Politics* Wendt argues that states can view each other as enemies rivals or friends These roles can change over time so that the international system is not condemned to conflict and war **Making Sense, Making Worlds** Nicholas Onuf, 2013-05-07 Nicholas Onuf is a leading scholar in international relations and introduced constructivism to international relations coining the term constructivism in his book *World of Our Making* 1989 He was featured as one of twelve scholars featured in Iver B Neumann and Ole W ver eds *The Future of International Relations* Masters in the Making 1996 and featured in Martin Griffiths Steven C Roach and M Scott Solomon *Fifty Key Thinkers in International Relations* 2nd ed 2009 This powerful collection of essays clarifies Onuf s approach to international relations and makes a decisive contribution to the debates in IR concerning theory It embeds the theoretical project in the wider horizon of how we understand ourselves and the world Onuf updates earlier themes and his general constructivist approach and develops some newer lines of research such as the work on metaphors and the re grounding in much more Aristotle than before A complement to the author s groundbreaking book of 1989 *World of Our Making* this tightly argued book draws extensively from philosophy and social theory to advance constructivism in International Relations *Making Sense Making Worlds* will be vital reading for students and scholars of international relations international relations theory social theory and law

[Critical Theory of International Politics](#) Steven C. Roach,2013-05-13 Critical international theory encompasses several distinct radical approaches that focus on identity difference hegemonic power and order As an applied theory critical international theory draws on critical social theories to shed light on international processes and global transformations While this approach has led to increasing interest in formulating an empirically relevant critical international theory it has also revealed the difficulties of applying critical theory to international politics What are these difficulties and problems And how can we move beyond them This book addresses these questions by investigating the intellectual currents and key

debates of critical theory from Kant and Hegel to Habermas and Derrida and the recent work of critical international theory including Robert Cox and Andrew Linklater By drawing on these debates the book formulates an original theory of complementarity that brings together critical theory and critical international theory It argues that complementarity a governing principle in international law and politics offers a conceptual framework for working toward two goals engaging the changing contexts and forms of resistance and redressing some of the difficulties of applying critical theory to international relations In adopting three critical perspectives on complementarity to analyze the evolving social and political contexts of global justice this book provides an essential resource for undergraduate and graduate students and scholars interested in the application of critical theory to international relations

International Relations' Last Synthesis? J. Samuel Barkin, Laura Sjöberg, 2019-02-12 Many scholars intentionally or unintentionally have entangled constructivisms and critical theories in problematic ways either by assigning a critical theoretical politics to constructivisms or by assuming the appropriateness of constructivist epistemology and methods for critical theorizing IR s Last Synthesis makes the argument that these connections mirror IR s grand theoretical syntheses of the 1980s and 1990s and have similar constraining effects on the possibilities of IR theory They have been made without adequate reflection in contradiction to the base assumptions of each theoretical perspective and to the detriment of both knowledge accumulation about global politics and theoretical rigor in disciplinary IR It is not that constructivisms and critical theories have no common ground rather the fact that it has become routine for IR scholars to overstate their common ground is counterproductive to the discovery and utilization of their potential dialogues To that end IR s Last Synthesis argues that scholars using the two in conjunction should be cognizant of rather than gloss over the tensions between the approaches and the tools they have to offer Along these lines the book uses the concept of affordances to look at what each has to offer the other and to argue for a modest reflective specified return to constructivist and critical IR theorizing By rejecting its over simple syntheses this book hews a road toward reviving IR theorizing
