

Empowerment Social Work

Empowerment can be defined as, “enabling service users to take action to improve their lives. From the point of view of service users, practitioners are often in positions of considerable power, particularly where decisions are being made about the delivery of services and around intervention in people's lives. To practice empowerment, social workers will need to focus on working with service users to engage them in the problem-solving process”.

Empowerment is linked with anti-oppressive practice, in that the social worker can work with service users to enable them to overcome barriers to solving problems – whether located in the attitudes and practices of professionals and social institutions (for example, health and education authorities) or in the beliefs of the service user. The social worker's knowledge of service provision and the law can be critical in empowering service users.

Organisations and Management in Social Work Mark Hughes, Michael Wearing, 2021-11-03 As a social worker you could work in a variety of different organisations each with their own purpose culture and structure Understanding and examining the complex issues involved in the management and organisational context of social work practice is crucial for practitioners and managers This book helps you to develop strategies for ethical reflective and relational practice covers key themes including leadership supervision risk and decision making and emphasises the importance of active participation for positive change Thoroughly updated and with new Practice Examples demonstrating the relationship between theory and practice this is essential reading for both undergraduate and postgraduate students of social work as well as practising social workers

The Psychology of Employee Empowerment Rozana Ahmad Huq, 2016-03-03 The complexities of employee empowerment have been largely underestimated and it is clear that organisations struggle with putting the concept into practice Rozana Ahmad Huq recognises that effective utilisation of human resources is a strategic issue for organisations Hierarchical organisations struggle to survive The growing trend for downsizing and merging of organisations means that they can no

longer maintain the command and control approach and employees are given more responsibility and expected to take decisions. However, simply burdening employees with extra responsibility without empowering them does not deliver results. Drawing on her own research in organisations, Dr Huq investigates the concept of empowerment in a new way that combines themes from the disciplines of management and social work, the latter being a domain where empowerment is an important construct. This helps to bridge the gaps in knowledge in the management domain and draws attention to the positive and negative psychological implications for employees of the practice of empowerment that are often ignored by leaders and managers. Ultimately, the author offers a practice model to help people in management and non-management understand the new roles and behaviours that they need to adopt if empowerment is to become a reality. This book is a resource for any business or other organisation genuinely interested in employee empowerment and for those with a responsibility for teaching about it.

Developing Good Practice in Community Care Vicky White, John Harris, 2001. This book presents guidelines for good practice in community care work. It describes the planning and implementation of pioneering initiatives in the community, analyses their effectiveness, and outlines their practical implications.

Participation, Marginalization and Welfare Services Aila-Leena Matthies, Lars Uggerhøj, 2016-05-13. Current debates around participation and marginalization dominate the agenda of many European political forums. There is an increasing concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as being at risk of being socially excluded or marginalized. This volume goes beyond the surface of public discussions to look at the central role played by welfare services in European societies in either strengthening or hindering participatory citizenship and democracy. In current discussions, welfare services understood in a broad sense are centrally positioned; there are high expectations that welfare services can hinder marginalization and enable participation. Yet marginalization is in most cases rooted in the deeper structures of society, with economy, participation, and involvement dependent on political or highly personal factors which are beyond the scope of welfare services. This groundbreaking volume posits that participation and marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and communities. It will be essential reading for social workers, sociologists, and policy makers throughout Europe.

From Prevention to Wellness Through Group Work Joan K. Parry, 2014-03-18.
