Cummings, Ariel Dinar, Douglas Olson, 1996-01-01 This groundbreaking study presents the results of a large survey of more than 400 industrial firms in Russia conducted by the World Bank in mid 1994 The survey examined the role and organization of the enterprise sector which is a key issue in transition economies particularly in Russia where a concerted attempt has been made to change ownership arrangements and hence corporate governance More than half the firms surveyed are in the private sector the rest remain in state hands or are partially privatized A major focus of the book is to understand whether the Russian privatization has led to improvements in corporate governance The authors identify some initial positive changes but also find that the manner in which privatization has occurred has not yet had a strong effect on the internal operations of Russian industrial firms However they do find evidence from their sample of significant growth in new firms The volume examines the positive and negative aspects of restructuring employment and workers compensation issues budget constraints the effects of privatization on employee behavior and future prospects for Russian firms *Incentives for Joint Forest Management in India* Ian Hill, Dermot Shields, 1998 Joint Forest Management JFM has emerged as an important intervention in the management of India's forest resources This report sets out an analytical method for examining the costs and benefits of JFM arrangements Two pilot case studies in which the method was used demonstrate interesting outcomes regarding incentives for various groups to participate The main objective of this study is to develop a better understanding of the incentives for communities to participate in JFM **Privatization and Restructuring in Central and Eastern Europe** Gerhard Pohl, 1997-01-01 Why do women in most developing countries lag behind men in literacy Why do women get less schooling than men This anthology examines the educational decisions that deprive women of an equal education It assembles the most up to date data organized by region Each paper links the data with other measures of economic and social development This approach helps explain the effects different levels of education have on women's fertility mortality rates life expectancy and income Also described are the effects of women's education on family welfare The authors look at family size and women's labor status

and earnings. They examine child and maternal health as well as investments in children's education. Their investigation demonstrates that women with a better education enjoy greater economic growth and provide a more nurturing family life. It suggests that when a country denies women an equal education, the nation's welfare suffers. Current strategies used to improve schooling for girls and women are examined in detail. The authors suggest an ambitious agenda for educating women. It seeks to close the gender gap by the next century. Published for The World Bank by The Johns Hopkins University Press.

The Impact of Environmental Assessment, 1997-01-01. China is in the throes of two transitions from a command economy to a market based one and from a rural agricultural society to an urban industrial one. So far both transitions have been spectacularly successful. China is the fastest growing economy in the world with per capita incomes more than quadrupling since 1978, achieving in two generations what took other countries centuries. Although swift growth and structural change have resolved many problems, they also have created new challenges: employment insecurity, growing inequality, stubborn poverty, mounting environmental pressures, rising costs of food, self sufficiency, and periods of macroeconomic instability stemming from incomplete reforms. Unmet, these challenges could undermine the sustainability of growth and China's promise could fade. China 2020, a seven volume set, examines China's recent history where it is today and the path it should follow during the first two decades of the 21st century. The volume in the set entitled Old Age Security Pension Reform in China highlights two severe difficulties with China's current pension system: the urgent and immediate problem of the pension burden placed on state owned enterprises and the longer term predicament arising from a rapidly aging population. State enterprises inherited heavy pension obligations from the central planning era. With the transition to a market economy, employment in the state enterprise sector is declining while the number of pensioners is rising rapidly. The study recommends a unified pension system that includes both mandatory funded individual accounts and a social insurance scheme. It also endorses a sustainable contribution rate that attaches considerable importance to long term financial viability more than 60 years and examines the risks associated with low compliance rates and low interest rates.
