Alternative Approach is a comprehensive exploration of why Africa has not managed to achieve a sustainable and self regenerating development over the past half century of effort The work situates the problems of Africa s persistent underdevelopment in the practices employed by national political elites donors and lenders to African development that played roles in determinant policy and planning Unlike many newly developed countries and regions and contrary to the historical experiences of developed countries where ordinary people were full stakeholders and drivers of development Africa s development has been top down expert and capital driven mechanical and typically externally designed Ordinary Africans were made marginal to development This approach to Africa s development was devoid of building the people and their institutions as the legitimate means of development The entrusting of Africa s development to local and international elites to the exclusion of the people from decision making and full participation has led to grievous deficits in the formation of human and social capital and legitimate economic social and political institutions for development The book offers a studied alternative that can positively change Africa s development direction The Participatory Social Learning Approach The philosophical theoretical historical and heuristic origins of this alternative are offered in detail within this book Theory & Practice in Clinical Social Work Jerrold R. managing firms and emerging economies in the light of sustainable development One of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering simultaneously environmental issues like conservation of natural resources eco efficiency biodiversity conservation and climate change mitigation These questions are relevant for government industry and urban sustainability However in the modern literature that discusses organizational management for sustainable development few studies focus on the reality of organizations from emerging countries Moreover changing environmental legislation in emerging countries such as China and Brazil will affect organizational managers In this context this book may contribute to organizational management in the search for more sustainable organizations as well as deal with the challenges of managing organizations in the context of increased social problems degradation of natural resources loss of biodiversity and climate change This book was published as a special issue of the International Journal of Sustainable Development World Ecology *Library of Congress Subject Headings* Library of Congress,2012
