Social Networks Of Older People A Cross National Analysis:

The Social Networks of Older People Howard Litwin, 1996-10-30 This edited volume examines the social networks of older people in nine countries from a range of perspectives in order to determine the potential of informal support structures to deliver the bulk of care in today's society. Researchers from the United States, Canada, England, and Wales, France, Spain, the Netherlands, Sweden, Finland, and Israel present up-to-date analyses of support networks in each of their countries. The social policy implications of the comparative data are critically reviewed. The findings clearly suggest that social network availability is diminishing for a significant minority of elderly people. However, current practice in most countries reveals little purposive interweaving of formal services and informal networks in order to strengthen the function of the latter and to prolong their presumed benefits.

Social Isolation of Older Adults Lenard W. Kaye, Cliff Singer, 2018-12-17 Critical strategies for confronting a dire yet under-addressed societal epidemic, the risky and potentially deadly consequences for older adults living a socially isolated life are the focus for this book. By documenting our current understanding of the complex and multi-dimensional nature of social isolation among elders, the authors highlight innovative and alternative forms of community and later life relationships that can serve to forestall or prevent social isolation and loneliness. With contributions from recognized scholars, clinicians, and elder policy activists, as well as from multiple practice perspectives, direct service providers, administrators, researchers, and educators, the book documents the interrelated issues of social relationships and health in late life. It describes creative programs and intervention techniques that help maintain the integrity of an older adult's individual, group, and community relations, communication pathways, and a sense of belonging. The book also illuminates multidisciplinary and integrated best practices for minimizing the risk of late life social isolation. Case studies showcase the issues that arise in clinical practice and service delivery and demonstrate proven methods for effectively addressing them.

Key Features: Delivers best practice strategies and interventions for bolstering older adult social health and community engagement. Written by top scholars in the gerontology community. Explores the life-threatening risks and consequences of social isolation for older adults and their families. Describes the wide range of social relationships that can determine the extent to which older adults will be at risk of becoming socially isolated. Considers the role that older adult diversity and difference plays in determining quality of life and the integrity of relationships. Highlights physical, behavioral, environmental, social, and economic forces that can influence the quality of late life relationships.

Global Aging and Challenges to Families Vern Bengtson, 2018-01-16 The recent explosion in population ageing across the globe represents one of the most remarkable demographic changes in human history. Population ageing will profoundly affect families. Who will care for the growing numbers of tomorrow's very old members of societies? Will it be state governments? The aged themselves? Their families? The purpose of this book is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future.

Lubkin's Chronic Illness Larsen, 2017-12 Lubkin's Chronic Illness Tenth Edition

is an essential text for nursing students who seek to understand the various aspects of chronic illness affecting both patients and families. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Lubkin's Chronic Illness Pamala D. Larsen, 2014-11-07 Lubkin's Chronic Illness Ninth Edition is an essential text for nursing students who seek to understand the various aspects of chronic illness affecting both patients and families. This is the only text of its kind that truly addresses not only the physical aspects but the important psychosocial issues that individuals and families deal with on a daily basis. The text takes an application to practice based approach by covering impact, issues, interventions, and outcomes. The Ninth Edition has been heavily revised to include updated and expanded content on the illness experience, health policy uncertainty, and the advanced practice nurse in chronic illness. Each chapter employs a theoretical approach to the concept followed by the impact or issues of the concept, nursing interventions, and potential outcomes. Two new chapters focused on Loss and Spirituality have also been included. New to the Ninth Edition: Expanded personal and real life comments from the perspective of the caregiver.

Active ageing and solidarity between generations in Europe Axel Börsch-Supan, Martina Brandt, Howard Litwin, Guglielmo Weber, 2013-06-25 SHARE is an international survey designed to answer the societal challenges that face us due to rapid population ageing. How do Europeans age? Under which circumstances do older people and their families live? How healthy and active are they and how did the crisis affect them? The authors of this multidisciplinary book have taken a first step toward answering these questions based on the recent SHARE data, including a new social networks module.

Disconnecting with Social Networking Sites B. Light, 2014-09-26 Ben Light puts forward an alternative way of thinking about how we engage with social networking sites. He analyses our engagements with social networking sites in public, at work, in our personal lives, and as related to our health and wellbeing, emphasizing the importance of disconnection instead of connection.

Chronic Illness Pamala D. Larsen, Ilene Morof Lubkin, 2009 The new edition of best-selling Chronic Illness: Impact and Intervention continues to focus on the various aspects of chronic illness that influence both patients and their families. Topics include the sociological, psychological, ethical, organizational, and financial factors, as well as individual and system outcomes. The Seventh Edition has been completely revised and updated and includes new chapters on Models of Care, Culture, Psychosocial Adjustment, Self-Care, Health Promotion, and Symptom Management. Key features include: Chapter Introductions, Chapter Study Questions, Case Studies, Evidence-Based Practice Boxes, List of websites appropriate to each chapter, Individual and System Outcomes.

The Handbook of Life-Span Development, Volume 2, 2010-08-09 In the past fifty years, scholars of human development have been moving from studying change in humans within sharply defined periods to seeing many more of these phenomena as more profitably studied over time and in relation to other processes. The Handbook of Life Span Development, Volume 2: Social and Emotional Development presents the study of human development conducted by the best scholars in the 21st century. Bengtson,Ariela Lowenstein, The recent explosion in population aging across the globe represents one of the most remarkable demographic changes in human history There is much concern about population aging and its consequences for nations for governments and for individuals It has often been noted that population aging will inevitably affect the economic stability of most countries and the policies of most state governments What is less obvious but equally important is that population aging will profoundly affect families Who will care for the growing numbers of tomorrow s very old members of societies Will it be state governments The aged themselves Their families The purpose of this volume is to examine consequences of global aging for families and intergenerational support and for nations as they plan for the future Four remarkable social changes during the past fifty years are highlighted 1 Extension of the life course A generation has been added to the average span of life over the past century 2 Changes in the age structures of nations Most nations today have many more elders and many fewer children than fifty years ago 3 Changes in family structures and relationships Some of these differences are the result of trends in family structure notably higher divorce rates and the higher incidence of childbearing to single parents 4 Changes in governmental responsibilities In the last decade governmental responsibility appears to have slowed or reversed as states reduce welfare expenditures How will families respond to twenty first century problems associated with population aging Will families indeed be important in the twenty first century or will kinship and the obligations across generations become increasingly irrelevant replaced by personal communities This volume goes a considerable distance to answer these critical issues for the twenty first century Vern L Bengtson is an AARP University Chair in Gerontology and Professor of Sociology University of Southern California Ariela Lowenstein is associate professor and head Department of Aging Studies University of Haifa Israel Work and Caring for the Elderly Viola M.
