Social Security And Medicare Individual Versus Collective Risk And Responsibility:

Social Security and Medicare Sheila Burke, Eric Kingson, Uwe Reinhardt, 2010-12-01 A Brookings Institution Press and National Academy for Social Insurance publication Recent policy debates about the future of Social Security and Medicare have been dominated by the issue of personal versus societal responsibility Significant changes now being considered would increase the level of privatization and tilt these programs away from defined benefit toward defined contribution models This annual volume of the National Academy of Social Insurance examines the concept of introducing choice into the Social Security and Medicare programs how it would be defined and structured and what sort of safeguards would be needed to protect program participants The ideas from representatives of the public and private sectors range from tinkering to overhauling the programs to make them more responsive and cost effective The contributors provide an overview of the history and fundamental values of social insurance discuss options for reforming Social Security and Medicare review the benefits and drawbacks of expanding choice options explore the types of mechanisms needed to protect consumers if market based reforms are adopted and address the political likelihood of Social Security and Medicare reforms The essays in this volume give parameters to the debate over the future of Social Security and Medicare and reflect the range and diversity of views which will shape these two hallmark social insurance programs for decades to come

Robert Ball and the Politics of Social Security Edward D. Berkowitz, 2003 Berkowitz tells the inside story of Social Security politics including controversies during the 1970s Congressional rescue of the program in 1983 and the ongoing debates about structure and solvency that have enveloped the program since the 1990s He looks at how the Social Security Administration gained and nearly lost a reputation for administrative competence how Medicare was put into operation and why campaigns to create national health insurance have failed Jacket

Consumer Knowledge and Financial Decisions Douglas J. Lamdin, 2011-11-23 There has been an increasing recognition that financial knowledge i e literacy is lacking across the population Moreover there is recognition that this lack of knowledge poses real problems as credit mortgages health insurance retirement benefits and savings and investment decisions become increasingly complex *Financial Decisions Across the Lifespan* brings together the work of scholars from various disciplines family and consumer sciences economics law finance sociology and public policy to provide a broad range of perspectives on financial knowledge financial decisions and policies For consistency across the volume each chapter follows a similar format 1 what individuals know or need to know 2 how what they know or need to know affects financial decisions and outcomes 3 ways in which policies or programs or financial innovations can enhance their knowledge or decisions or outcomes Contributors will provide both new and existing research to create a valuable picture of the state of financial literacy and how it can be improved

Enduring Questions in Gerontology Debra J. Sheets, Dana Burr Bradley, PhD, Jon Hendricks, PhD, 2006 *Enduring Questions in Gerontology* provides a comprehensive perspective on the abiding issues in gerontology Both current and future gerontologists will find this book useful in

examining emerging dilemmas and creating a context for further progress in the field of aging The most creative thinkers contributing to the gerontological literature reflect on their disciplines consider how key questions have emerged review how they have changed in the decades since gerontology entered the fray and speculate what may lie ahead The resulting collection of essays offers a comprehensive perspective on the enduring questions in gerontology and how they have shaped our understanding of differences in the experience of old age Key contributors to this volume include George L Maddox Christine L Fry Steven Austad Kenneth Brummel Smith Manfred Diehl Martha Holstein W Andrew Achenbaum James E Birren As an emerging or seasoned scholar you will find insights into the ways in which each disciplinary focus grapples with societal transitions identifies emerging issues and lays out strategies and salient perspectives for what should come next

Navigating Public Opinion Jeff Manza, Fay Lomax Cook, Benjamin I. Page, 2002 Do politicians listen to the public When How often Or are the views of the public manipulated and used strategically by elites In this text leading scholars of American politics assess and debate the impact of public opinion on policy making Central issues include the changing relationship between opinion and policy over time how key actors use public opinion to formulate domestic and foreign policy and how measurement techniques might improve our understanding of the results of polls and survey research The Politics of Policy Change Daniel Béland, 2012-03-06 For generations debating the expansion or contraction of the American welfare state has produced some of the nation's most heated legislative battles Attempting social policy reform is both risky and complicated especially when it involves dealing with powerful vested interests sharp ideological disagreements and a nervous public The Politics of Policy Change compares and contrasts recent developments in three major federal policy areas in the United States welfare Medicare and Social Security Daniel Béland and Alex Waddan argue that we should pay close attention to the role of ideas when explaining the motivations for and obstacles to policy change This insightful book concentrates on three cases of social policy reform or attempted reform that took place during the presidencies of Bill Clinton and George W Bush Béland and Waddan further employ their framework to help explain the meaning of the 2010 health insurance reform and other developments that have taken place during the Obama presidency The result is a book that will improve our understanding of the politics of policy change in contemporary federal politics *Public Opinion and Polling around the World* John G. Geer, 2004-07-21 Covering the intricate facets of America's most important democratic tradition this book serves as an important resource to understand how citizens' views are translated into governmental action Public Opinion and Polling around the World presents a thorough review of public opinion from its roots in colonial America to its role in today's emerging democracies More than 100 entries prepared by top scholars examine the 200 year history of public opinion measurement methodologies with an emphasis on telephone interviews and Internet polls and key figures like George Gallup and Elmo Roper who created their own polling systems An analysis of theories compares schools of thought from the fields of psychology sociology and economics and explores how people form opinions A fascinating snapshot of the

public's current views on economic issues, foreign policy, gender, gay rights, and other hot button topics, observes patterns across genders, race, ethnic origins, class, and religion in regions all over the world. Students, academicians, and political observers will discover answers to such questions as: does public opinion shape the behavior of government? *The Price of Citizenship* Michael B. Katz, 2002-03. Katz shows how these changes are propelling America toward a future of increased inequality and decreased security as individuals compete for success in an open market with ever fewer protections against misfortune, power, and greed. And he shows how these trends are transforming citizenship from a right of birth into a privilege available only to the fully employed. Jacket *Behavioral Economics and Its Applications* Peter Diamond, Hannu Vartiainen, 2012-01-12. In the last decade, behavioral economics, borrowing from psychology and sociology to explain decisions inconsistent with traditional economics, has revolutionized the way economists view the world. But despite this general success, behavioral thinking has fundamentally transformed only one field of applied economics: finance. Peter Diamond and Hannu Vartiainen's *Behavioral Economics and Its Applications* argues that behavioral economics can have a similar impact in other fields of economics. In this volume, some of the world's leading thinkers in behavioral economics and general economic theory make the case for a much greater use of behavioral ideas in six fields where these ideas have already proved useful but have not yet been fully incorporated: public economics, development, law, and economics, health, wage determination, and organizational economics. The result is an attempt to set the agenda of an important development in economics, an agenda that will interest policymakers, sociologists, and psychologists as well as economists. Contributors include Ian Ayres, B. Douglas Bernheim, Truman F. Bewley, Colin F. Camerer, Anne Case, Michael D. Cohen, Peter Diamond, Christoph Engel, Richard G. Frank, Jacob Glazer, Seppo Honkapohja, Christine Jolls, Botond Koszegi, Ulrike Malmendier, Sendhil Mullainathan, Antonio Rangel, Emmanuel Saez, Eldar Shafir, Sir Nicholas Stern, Jean Tirole, Hannu Vartiainen, and Timothy D. Wilson. **The Surveillance Studies Reader** Hier, Sean, Greenberg, Joshua, 2007-08-01. Examines thoughts about self-surveillance, scrutiny of specific parts of society, sophisticated data-gathering techniques, and the ubiquity of CCTV. This book is suitable for students of sociology, politics, social policy, media, and communications studies, social psychology, and criminology. *States of Global Insecurity* Daniel Béland, 2007-06. Discusses the collective threats faced by the United States in the early twenty-first century and how political sociology seeks to understand these matters. *New Directions in Public Opinion* Adam J. Berinsky, 2019-10-29. The 2016 elections called into question the accuracy of public opinion polling while tapping into new streams of public opinion more widely. The third edition of this well-established text addresses these questions and adds new perspectives to its authoritative line up. The hallmark of this book is making cutting-edge research accessible and understandable to students and general readers. Here we see a variety of disciplinary approaches to public opinion reflected, including psychology, economics, sociology, and biology, in addition to political science. An emphasis on race, gender, and new media puts the elections of 2016 into context and prepares students to look ahead to 2020 and beyond. New to the third

edition Includes 2016 election results and their implications for public opinion polling going forward Three new chapters have been added on racializing politics worldview politics and the modern information environment New authors include Shanto Iyengar Michael Tesler Vladimir E Medenica Erin Cikanek Danna Young Jennifer Jerit and Jake Haselswerdt

Preferences and Well-Being Richard J. Arneson, 2006-10-23 A collection of papers by moral philosophers and philosophers of economics on the subject

Citizenship in Nordic Welfare States Bjørn Hvinden, Håkan Johansson, 2007-06-11 This book offers an innovative analysis of the ways in which the relationship between citizens and welfare states social citizenship becomes more dynamic and multifaceted as a result of Europeanization and individualization Written by interdisciplinary contributors from politics sociology law and philosophy it examines the transformation of social citizenship through a series of illuminating case studies comparing Nordic countries and other European nations Dealing with the following areas of national and European welfare policy legislation and practice activation reforms linking income maintenance and employment promotion scope for participation of marginal groups in deliberation and decision making impact of human rights legislation for welfare and legal protection against discrimination and social barriers to equal market participation coordination of social security systems to facilitate cross border mobility in Europe pension reform efforts to make pension systems sustainable Citizenship in Nordic Welfare States will be of interest to students and researchers of social policy comparative welfare social law political science sociology and European studies

Creating Value with Science and Technology Eliezer Geisler, 2001-08-30 Do science and technology create value for society and the economy and how might one go about measuring it How do we evaluate its benefits Can we even be certain that there are benefits Geisler argues that there are benefits and that they outweigh in value the negative impacts that inevitably accompany them His revolutionary new book goes on to show that they can also be measured and evaluated and in one volume all of the existing knowledge on how to do it is compiled then Geisler's own methods are offered The result is a compelling argument that the value of science and technology in our lives has indeed been positive and that the economic well being of all individuals organizations and nations rests upon them Geisler starts off by describing his conceptual framework for the evaluation of science and technology and the impact and benefits that proceed from them He discusses the nature of evaluation in general terms and then in the specific context of science technology and innovation together He reviews the state of our present knowledge and assesses the nature of value creation itself Throughout Geisler remains fixed on his driving thesis Although there are certainly some negative impacts from science and technology on the whole the results of its outputs are positive He shows how they have contributed to a range of activities and institutions particularly to the improvement of health and human

welfare worldwide Finally after discussing the theories of evaluation he gets down to the practice providing readers with a way to assess science and technological innovations for themselves *Something Happened* Edward D.

Berkowitz,2005-12-27 In both the literal and metaphorical senses it seemed as if 1970s America was running out of gas The decade not only witnessed long lines at gas stations but a citizenry that had grown weary and disillusioned High unemployment runaway inflation and the energy crisis caused in part by U S dependence on Arab oil characterized an increasingly bleak economic situation As Edward D Berkowitz demonstrates the end of the postwar economic boom Watergate and defeat in Vietnam led to an unraveling of the national consensus During the decade ideas about the United States how it should be governed and how its economy should be managed changed dramatically Berkowitz argues that the postwar faith in sweeping social programs and a global U S mission was replaced by a more skeptical attitude about government s ability to positively affect society From Woody Allen to Watergate from the decline of the steel industry to the rise of Bill Gates and from Saturday Night Fever to the Sunday morning fervor of evangelical preachers Berkowitz captures the history tone and spirit of the seventies He explores the decade s major political events and movements including the rise and fall of d tente congressional reform changes in healthcare policies and the hostage crisis in Iran The seventies also gave birth to several social movements and the rights revolution in which women gays and lesbians and people with disabilities all successfully fought for greater legal and social recognition At the same time reaction to these social movements as well as the issue of abortion introduced a new facet into American political life the rise of powerful politically conservative religious organizations and activists Berkowitz also considers important shifts in American popular culture recounting the creative renaissance in American film as well as the birth of the Hollywood blockbuster He discusses how television programs such as All in the Family and Charlie s Angels offered Americans both a reflection of and an escape from the problems gripping the country **Workers' Compensation** Daniel Mont,John F. Burton, Virginia P. Reno,2000 **Public Administration**
