It consists of a grid of small, irregular squares and rectangles in various colors, including shades of red, orange, yellow, blue, green, and grey. The colors are arranged in a way that creates a sense of depth and movement, with some areas appearing more vibrant than others. The overall effect is a textured, multi-colored surface that resembles a stained-glass window or a mosaic artwork.

**Team Performance in Health Care** Gloria D. Heinemann, Antonette M. Zeiss, 2012-12-06 The idea of teamwork in health care emerged at several times during the 20th century as the result of shifts in the nature and demands of health care and societal needs Examples include medical and surgical teams serving the military in World War II primary care teams staffing Community Health Centers created by President Johnson's War On Poverty and geriatric care teams established to serve the rapidly growing number of aging citizens Collaborative teamwork surfaced as a rational solution to health care needs but political and economic consensus to support widespread implementation was lacking The increasing complexity of providing health care seemed best served by the skills and efforts of interdisciplinary teams but such care was viewed as expensive so evaluation of its effectiveness became essential There were major problems in conducting such evaluation however First no clear theory guided the concept and practice of teamwork Early attempts to employ theoretical constructs explaining the behavioral and organizational phenomena of teamwork borrowed from theories of group dynamics communication organizational development and general systems Further few reliable validated instruments existed to evaluate team process function or effectiveness The best early efforts at research and evaluation came from academic centers funded by the Office of Interdisciplinary Programs of the Bureau of Health Professions 1975-78 and from the Veterans Affairs Interprofessional Team Training Development Program

*Geometrical Justice* Scott Phillips, Mark Cooney, 2022-06-16 Legal decisions continue to mystify why was this person sentenced to 20 years in prison but that person to just 10 years for the same crime Why did one person sue for civil damages but another let the matter drop Legal rules are supposed to answer these questions but their answers are radically incomplete Wouldn't it be wonderful to have a theory that predicted and explained legal decisions Drawing on Donald Black's theoretical ideas *Geometrical Justice* The Death Penalty in America addresses these issues focusing specifically on who is sentenced to death and executed in the United States The book explains why some murders are more serious than others and how the social characteristics of defendants victims and jurors affect case outcomes Building on the most rigorous data in the field the authors reveal wide discrepancies in capital punishment why one person lives but another person dies *Geometrical Justice* will be of interest to those engaged in criminal justice criminology and socio legal studies as well as students taking courses on sentencing corrections and capital punishment
