Risk Management in Post-Trust Societies Ragnar E. Lofstedt, 2012-05-04 A thought provoking and invaluable book for anyone who cares about risk communication and management in the 21st century Anna Jung Director General European Food Information Council Professor Ragnar Lfstedt has once again produced a most interesting book on risk management and trust well based on theory and built on empirical findings Mikael Karlsson President Swedish Society for Nature Conservation Highlights the difficult balancing task facing risk regulators Regulatory inaction against real risks can undermine public trust However exaggerated responses to risks can also jeopardize regulators credibility The diverse international case studies developed by Ragnar Lfstedt provide guidance for how regulators can navigate these and other frequently competing concerns W Kip Viscusi Cogan Professor of Law and Economics Harvard University USA In democracies government policies cannot succeed without public acceptance Yet complex risk management requires technical expertise How to reconcile these competing needs Ragnar Lfstedt provocatively challenges recent research claiming that risk managers must engender public trust via deliberative dialogue He uses four cases studies to argue that the reasons for distrust vary and demand different responses that in some cases trust can flow from technical competence without public deliberation and that in others public deliberation can actually aggravate distrust Trust me Lfstedts book will add spice to the debate over risk experts the public and trust Jonathan B Wiener Perkins Professor of Law and Environmental Policy Duke University USA We live in post trust societies in which public confidence in governments and corporations over health food and environmental risk is eroding rapidly Good risk communication can help companies governments and institutions minimize disputes resolve issues and anticipate problems Without such communication the best policies can become derailed and trust can be lost Most policy makers still use outdated methods to communicate policies and achieve their objectives methods developed before public trust in industry and government was affected by health scares such as BSE genetically modified organisms and dioxins in Belgian chicken This book provides effective methods for managing and communicating risk effectively in contemporary societies

Transdisciplinary Sustainability Studies Katri Huutoniemi, Petri Tapio, 2014-06-05 Arising out of human environment interaction sustainability problems resist disciplinary categories and simple solutions This book offers a fresh approach to practical and methodological concerns in transdisciplinary environmental and sustainability studies It illustrates methodological means by which researchers professionals and decision makers can address complex environmental issues While scientific reasoning is mostly guided by disciplinary traditions transdisciplinary research rests on other cognitive strategies As it does not have a ready made stance toward problems figuring out what the puzzle is and what the answer might look like are crucial aspects of transdisciplinary inquiry Through examples from environment and sustainability studies the volume discusses heuristic schemes that can give

structure to this exploration By focusing on heuristics rather than on methods concepts or general guidelines the book argues that a problem centered approach often resists the rigor of methodology Learning from experience provides valuable rules of thumb checklists and other cognitive schemes for making ill defined problems more tangible Written by an international team of authors the chapters draw examples from dealing with issues in environmental protection transport and climate policy ecosystem services and disservices environmental beliefs and attitudes and more Together with more theoretically oriented chapters they show that the intellectual processes needed to tackle complex sustainability problems are as much about heuristic problem solving as they are about methodical work
