offers empirical and theoretical perspectives on how the relationship between social movements and state institutions is emerging and developing through new modes of participatory governance One of the most interesting political developments of the past decade has been the adoption by social movements of strategies seeking to change political institutions through participatory governance These strategies have flourished in a variety of contexts from anti austerity and pro social justice protests in Spain to movements demanding climate transition and race equality in the UK and the USA to constitutional reforms in Belgium and Iceland The chief ambition and challenge of these new forms of participatory governance is to institutionalise the prefigurative politics and social justice values that inspired them in the first place by mobilising the bureaucracy to respond to their claims for reforms and rights The authors of this volume assess how participatory governance is being transformed and explore the impact of such changes providing timely critical reflections on the constraints imposed by cultural economic and political power relations on these new empowered participatory spaces the potential of this new wave of participatory democracy to reimagine the relationship between citizens and traditional institutions towards more radical democratic renewal where and how these new democratisation efforts sit within the representative state and how tensions between the different demands of lay citizens organised civil society and public officials are being managed This book will be an important resource for students and academics in political science public administration and social policy as well as activists practitioners and policymakers interested in supporting innovative engagement for deeper social transformation Chapter 11 of this book is freely available as a downloadable Open Access PDF at http www taylorfrancis com under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 Public administration ,1990 Alternative Economic Spaces Andrew Leyshon, Roger Lee, Colin C license Williams, 2003-08-13 A hopeful but nonetheless hard hitting analysis of alternative economic spaces proliferating in the belly of the capitalist beast In this book Leyshon Lee and Williams convene fascinating studies of exchange enterprise credit and community They invite us onto a new and promising discursive terrain where we can analyze criticize and above all recognize actually existing economies of diversity in the wealthy countries of the West J K Gibson Graham Australian National University and University of Massachusetts Amherst In the context of problems in the new economy from dot com start ups high technology and telecoms Alternative Economic Spaces presents a critical evaluation of alternatives to the global economic mainstream It focuses on the emergence of alternative economic geographies within developed economies and analyzes the emergence of alternative economic practices within industrialized countries These include the creation of institutions like Local Exchange and Trading Systems Credit Unions and other social economy initiatives and the development of alternative practices from informal work to the invention of consumption sites that act as alternatives to the monoply of the big box multi chain retail outlets Alternative Economic Spaces is a reconsideration of what is meant by the economic in economic geography its objective is to bring together some of the ways in which this is being undertaken The

volume shows how the economic is being rethought in economic geography by detailing new economic geographies as they are emerging in practice Sustainable and Efficient Transport Ellen Eftestøl-Wilhelmsson, Suvi Sankari, Anu Bask, 2019 The EU Commission has set the goal of facilitating a competitive transport system increasing mobility and supporting growth while simultaneously reaching a target of 60 per cent emissions reductions by 2050 In light of past performance and estimated development the target will not be reached without further behavioural change in the transport sector This interdisciplinary book examines how such a behavioural shift can be achieved by various organizational and legal means focusing primarily on the European Union and its specific policies related to greening transport Entrepreneurship and Business Ethics Anica Zeyen, Markus Beckmann, 2018-09-03 Social entrepreneurs are change makers that aim to solve society s unsolved problems Not surprisingly social entrepreneurship has thus created high expectations To better understand the potential as well as the limitations of social entrepreneurship however a more nuanced approach is needed in two ways First social entrepreneurship is a multi level phenomenon It spans macro level questions as well as meso level questions and finally micro level questions If we really want to understand social entrepreneurship we need to bring together all three levels of analysis and see how they are connected Second while social entrepreneurship can certainly produce socially desirable outcomes we also need a critical perspective to capture potential undesirable effects that social entrepreneurship can cause often unintendedly in society in markets in organizations and for individuals To this end an ethical perspective can help complement the positive analysis of social entrepreneurship with a discussion of the normative implications of its potential dark side Looking at social entrepreneurship from both a multi level analysis and an ethical perspective Social Entrepreneurship and Business Ethics takes the reader on a journey through the bright side as well as the potential dark side of social entrepreneurship for societies organizations and individuals Highlighting both this book not only seeks to provoke researchers and students to advance their understanding of social entrepreneurship It also hopes to help practitioners to better realize the positive contributions of social entrepreneurship for society **Poverty and Social Exclusion** Gianni Betti, Achille Lemmi, 2013-07-18 Poverty and inequality remain at the top of the global economic agenda and the methodology of measuring poverty continues to be a key area of research This new book from a leading international group of scholars offers an up to date and innovative survey of new methods for estimating poverty at the local level as well as the most recent multidimensional methods of the dynamics of poverty It is argued here that measures of poverty and inequality are most useful to policy makers and researchers when they are finely disaggregated into small geographic units Poverty and Social Exclusion New Methods of Analysis is the first attempt to compile the most recent research results on local estimates of multidimensional deprivation The methods offered here take both traditional and multidimensional approaches with a focus on using the methodology for the construction of time related measures of deprivation at the individual and aggregated levels In analysis of persistence over time the book also explores whether the level of deprivation

is defined in terms of relative inequality in society or in relation to some supposedly absolute standard This book is of particular importance as the continuing international economic and financial crisis has led to the impoverishment of segments of population as a result of unemployment bankruptcy and difficulties in obtaining credit The volume will therefore be of interest to all those working on economic econometric and statistical methods and empirical analyses in the areas of poverty social exclusion and income inequality The International Handbook of Social Enterprise Law Henry Peter, Carlos Vargas Vasserot, Jaime Alcalde Silva, 2022-12-29 This open access book brings together international experts who shed new light on the status of social enterprises benefit corporations and other purpose driven companies The respective chapters take a multidisciplinary approach combining law philosophy history sociology and economics and provide valuable insights on fostering social entrepreneurship and advancing the common good In recent years we have witnessed a significant shift of how business activities are conducted mainly through the rise of social enterprises In an effort to target social problems at their roots social entrepreneurs create organizations that bring transformative social changes by considering among others ethical social and environmental factors A variety of social enterprise models are emerging internationally and are proving their vitality and importance But what does the term social enterprise mean What are its roots And how does it work in practice within the legal framework of any country This handbook attempts to answer these questions from a theoretical historical and comparative perspective bringing together 44 contributions written by 71 expert researchers and practitioners in this field The first part provides an overview of the social enterprise movement its evolution and the different forms entities can take to meet global challenges overcoming the limits of what governments and states can do The second part focuses on the emergence of benefit corporations and the growing importance of sustainability and societal values while also analyzing their different legal forms and adaptation to their regulatory environment In turn the last part presents the status quo of purpose driven companies in 36 developed and emerging economies worldwide This handbook offers food for thought and guidance for everyone interested in this field It will benefit practitioners and decision makers involved in social and community organizations as well as in international development and more generally speaking Essential Social Enterprise Freer Spreckley, 2021-10-21 Social Enterprise is a worldwide social sciences and economics movement of alternative organisational and business models but it is sometimes difficult to know precisely the meaning of the term In Essential Social Enterprise Freer Spreckley traces the origin and development of social enterprise and shows how over time both the term and values have been altered and sometimes misinterpreted The book praises the growth of supplementary and essential initiatives that widen the support for social enterprise influencing traditional business infrastructure mechanisms The best known is the triple bottom line of Profit People and Planet that has become the default criteria for corporate social responsibility. The book s central thesis is that it is excellent to see the growth of complementary social tools and different social enterprise applications but questions whether these are displacement activities avoiding

essential system change to corporate ownership and control The book argues that the original ideas of social enterprise are urgently needed now We should go beyond the pleasantries of putting the word social in the title and assuming that means change Freer puts forward a convincing clear and radical interpretation in defining Social Enterprise and argues that it is a powerful solution to some of today s problems These he suggests are inequality environmental degradation poverty and the fetish of exclusivity and puts forward the solutions of a common ownership entity governed democratically with integrated financial social and ecological guiding principles and combined performance measurement indicators and a planning and evaluation method The book suggests these changes are of our time and urgently need to be applied by organisations and businesses to create system change and avert a social and environmental decline Furthermore Freer argues that organisations need to be regenerative going beyond sustainability and reversing the tread of societal inequality and ecological catastrophe in how they are owned and controlled operate and behave The book proposes that governments worldwide enact legislation to create a Social Enterprise Act to define and hasten new organisations and enterprises to help regenerate society and the environment Social Enterprise in the Construction Industry Martin Loosemore, Dave Higgon, 2015-08-27 Through the emerging lens of social enterprise this book examines how the global construction industry can engage more effectively with the communities in which it builds addressing disadvantage and environmental degradation to leave a positive legacy for future generations Combining insights from leading research and real life case studies of social enterprise in the construction sector the result is a practical framework which will help social enterprises clients consultants and construction firms work collectively to build a thriving social enterprise sector Readers of this timely book will learn to embrace social enterprise and an important new sector in the global construction industry They will learn to see community involvement as an opportunity rather than a risk and fully understand the broader role they can play in building a fairer and **Recovering from COVID-19: Economic scenarios for South Africa** van Seventer, more sustainable society Dirk, Arndt, Channing, Davies, Robert J., Gabriel, Sherwin, Harris, Laurence, Robinson, Sherman, 2021-07-06 As the South African economy emerges from the downturn induced by COVID 19 policy makers are concerned with recovery reconstruction and transformation This paper focuses on the recovery from the severely depressed levels of economic activity that occurred in April 2020 However before considering the period after the economic trough of April 2020 a mention of economic conditions prior to the pandemic is worthwhile In brief economic performance was terrible by almost any metric Furthermore economic performance had been poor since 2008 with evidence pointing to ongoing deterioration culminating in the fourth quarter of 2019 when per capita GDP contracted unemployment ticked upwards to its highest level since 1994 productivity declined and inequality worsened The striking difficulties of the South African economy in avoiding absorbing shocks whether internally generated such as shocks to electricity supply or externally generated such as changes in terms of trade or investor sentiment in relation to emerging markets have been an integral part of this disappointing economic

performance over time In short the situation prevailing prior to the onset of the COVID 19 pandemic was one of economic weakness Beginning from this position of weakness the economic shock related to COVID 19 was enormous likely the largest single economic shock in the history of South Africa According to official statistics GDP in the second guarter of 2020 was approximately 17% below the level registered in the second guarter of 2019 In assessing this shock it is important to recall that GDP is a flow concept One can in principle consider the volume of flow over any arbitrary period a day a week a month a quarter a semester a year and so forth The lockdown associated with COVID 19 precipitated an extraordinarily rapid decline in economic activity Indeed the available analytics and data point to a trough in economic activity or flow value of GDP at less than 70% of the level that would have pertained in the absence of the pandemic or a greater than 30% decline in the flow rate of GDP Arndt et al 2020 If we accept a 17% reduction as the average flow rate of GDP over the guarter and we accept that the economic shock related to COVID 19 was unprecedently rapid and drove a decline in the flow value of GDP of much more than 17% at the trough which probably occurred sometime in late April or early May then we must also accept a rapid recovery in economic activity in May and June in order to achieve an average decline of 17% over the guarter Furthermore this relatively rapid recovery continued GDP in the third guarter of 2020 was only about 6% below the levels recorded for the third guarter of 2019 with the corresponding figure for the fourth guarter at about 4% Other figures including recent ones broadly support this basic story For example retail sales in February 2021 were up 2 4% year on year with the previous two months January and December having registered only a slight decline year on year Correspondingly manufacturing production and sales were down by 2 1% in February 2021 year on year A few broad observations emerge from this history and the available data First the South African economy has exhibited more resilience to the COVID 19 shock than performance up to December 2019 might have led one to expect In Mexico for example the distance between fourth quarter GDP in 2020 and that in 2019 was greater than for the same comparison in South Africa At the same time Mexico registered close to twice as many deaths related to COVID 19 per million population as South Africa Second multiplier effects are important As discussed in Arndt et al 2020 multiplier effects accounted for the bulk of the initial economic contraction However they also operate positively buoying the recovery experienced to date and bringing economic activity back towards the levels of 2019 Third while having GDP about 4% down year on year is much better than the 17% decline observed in the second guarter 4% down is still a deep recession by ordinary standards While some sectors are producing at close to levels observed in the fourth quarter of 2019 others are more strongly affected The incidence of these depressed levels of economic activity remains likely to be tilted toward lower income households which are more vulnerable to begin with Overall there remains substantial slack in the economy multiplier effects still apply and many households remain deeply vulnerable to severe economic hardship **Social Work and Social Development** James Midgley, Amy Conley, 2010-05-19 This book shows the relevance of developmental social work to the US and other Western nations contending also that its practice is

not confined to community organisation or other macro practice interventions and that developmental ideas can be implemented in mainstream fields such as child welfare mental health aging etc New Dimensions in Community Well-Being Patsy Kraeger, Scott Cloutier, Craig Talmage, 2017-06-15 This volume addresses new innovations in quality of life and well being from the perspectives of the individual society and community It aggregates the perspectives research questions methods and results that consider how quality of life is influenced in our modern society Chapters in this volume present theoretical and practical examples on different aspects of quality of life and community well being representing American European Native American and African perspectives This volume is of interest to scholars in sociology psychology economy philosophy health research as well as practitioners across the social sciences
