Socialist Register 1988 Problems Of Socialist Renewal East West:

The Socialist Register Ralph Miliband, 1994 Socialist Dilemmas Henryk Flakierski, Thomas T. Sekine, 2019-07-26 This book consisting of eight related articles deals with several dimensions of socialism in the 1980s just before the beginning of the great changes which took place in Eastern Europe. Profound changes in the political economy of the world in the 1970s led to a decline of over confidence and over optimism characteristic of the earlier times both in the West and in the East. The painful experience of stagnation ended the grand Keynesian dream and led to the return of neo conservatism in the West. The disappointing pace of industrial and technological progress during the Brezhnev era and increasing shortages of productivity of communism in the East. With both sides in the grip of political and economic uncertainties the ideological confrontation seemed to have lost much of its sharp edge. No longer did the accepted dogmas and ideologies of the past appear either valid or convincing. The presupposition of the debate on comparative economic systems were in need of fundamental revisions. It was in this perspective that the Political Economy Workshop at York University undertook to feature a series of lectures on socialism in its 1988 sessions. Of about a dozen presentations by York University scholars and invited speakers eight were subsequently made available in the form of articles and are published in this volume. These articles cover a wide range of issues both theoretical and practical and from both the Western and the Eastern perspective. It is recognized by all authors that neither the East European experiments in communism nor the Western process into social democracy have been a great success. The clue to what might lie beyond the socialist dilemmas in the age of perestroika will be found only by going through once again to the circumstances which led to the failure of socialism thus far.

Social Democracy After the Cold War Ingo Schmidt, Bryan Evans, 2012 Despite the market triumphalism that greeted the end of the Cold War the collapse of the Soviet empire seemed initially to herald new possibilities for social democracy. In the 1990s with a new era of peace and economic prosperity apparently imminent people discontented with the realities of global capitalism swept social democrats into power in many Western countries. The resurgence was however brief. Neither the recurring economic crises of the 2000s nor the ongoing War on Terror was conducive to social democracy which soon gave way to a prolonged decline in countries where social democrats had once held power. Arguing that neither globalization nor demographic change was key to the failure of social democracy the contributors to this volume analyze the rise and decline of Third Way social democracy and seek to lay the groundwork for the reformulation of progressive class politics. Offering a comparative look at social democratic experience since the Cold War the volume examines countries where social democracy has long been an influential political force: Sweden, Germany, Britain and Australia while also considering the history of Canada's NDP and the emergence of New Left parties in Germany and the province of Quebec. The case studies point to a social democracy that has confirmed its rupture with the postwar order and its role as the primary political representative of working class interests. Once marked by redistributive and egalitarian policy perspectives social democracy has the book argues assumed a new role that of

amodernizing force advancing the neoliberal cause

Capital and Politics Greg Albo, Alfredo Saad-Filho, Nicole

Aschoff, 2022-12 The 59th annual volume of the Socialist Register offers a careful political assessment of the organization and practices of the modern corporation that underpin the parameters of power in capitalist societies Original essays address the various mythologies of stakeholder governance beloved by liberal reformers and others take up the renewal of financial capital since the great crisis the continued centrality of the oil and extractive sectors to the world market and the global logistics coordinating the circulation of capital New forms of worker organizing to match the ways new value is being produced and circulated are looked at across the volume notably in key firms like Amazon and in central zones of world capitalism in China the US and Brazil A special section honours and appraises the contribution of Leo Panitch to socialist analysis and strategy today back cover

Communism in the 21st Century Shannon Kurt Brincat, 2013-12-12 A compelling three volume exploration of the philosophical social and political facets of the theory and practice of communism within the conditions of 21st century world politics and late capitalism The world has changed significantly and so has communism This groundbreaking three volume series comprises contributions from over 30 experts that thoroughly address the past present and future of communism The entries assess the modern re articulation of the notion of communism and its potential emergence against the backdrop of recent historical conditions and contemporary world politics taking into account the ongoing global financial crisis recent revolutions throughout the Middle East Occupy protest events and anti globalization movements The first volume reexamines Marx's ideas from many distinct viewpoints while the second volume considers the numerous challenges facing existing communist parties including those in China Cuba North Korea and Vietnam The last volume explores the future of communist thought and practice in the context of the modern world and the recurrent crises of capitalism

Writing History in the Soviet Union Arup Banerji, 2017-08-18 The history of the Soviet Union has been charted in several studies over the decades These depictions while combining accuracy elegance readability and imaginativeness have failed to draw attention to the political and academic environment within which these histories were composed Writing History in the Soviet Union Making the Past Work is aimed at understanding this environment The book seeks to identify the significant hallmarks of the production of Soviet history by Soviet as well as Western historians It traces how the Russian Revolution of 1917 triggered a shift in official policy towards historians and the publication of history textbooks for schools In 1985 the Soviet past was again summoned for polemical revision as part and parcel of an attitude of openness glasnost and in this literary figures joined their energies to those of historians The Communist regime sought to equate the history of the country with that of the Communist Party itself in 1938 and 1962 and this imposed a blanket of conformity on history writing in the Soviet Union The book also surveys the rich abundance of writing the Russian Revolution generated as well as the divergent approaches to the history of the period The conditions for research in Soviet archives are described as an aspect of official monitoring of history writing Another instance of this is the manner by which history

textbooks have through the years been withdrawn from schools and others officially nursed into circulation This intervention occasioned in the present circumstance by statements by President Putin himself in the manner in which history is taught in Russian schools continues to this day In other words over the years the regime has always worked to make the past work Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh Sri Lanka

The Embrace of Capital Don Milligan,2022-04-29 The spectre of communism which Karl Marx confidently evoked in 1848 is now nothing more than a ghostly and ghastly nightmare without form or substance This is because working people have developed a love hate relationship with capitalism They hate insecurity inequality and greed and love civic and political freedom They love mass consumption and accept the logic of commerce Barreling along through wars revolutions epidemics and crises of all sorts working people in their millions have consistently dumfounded and dismayed the left by their refusal to countenance any alternative to the capitalist mode of life We have to ask Is it possible to reverse this reality and once again talk of the necessity of communism Soviet Union to Commonwealth Kalipada Deb,1996 This studies makes an in depth analysis of the nature of transformation that came over the decades It also looks into the prospect of the Commonwealth and the capitalist reforms going on in different countries **An Intellectual Biography of N.A.
