

Computable General Equilibrium Models for Trade Policy Analysis in Developing Countries: A Survey

Jaime de Melo, *Trade Policy Division, Country Economics Department, The World Bank*

This paper surveys the contributions of computable general equilibrium (CGE) simulation models designed to quantify the implications of alternative trade policy scenarios in developing countries. The paper starts with a review of the basic structure of CGE models, using a one-sector model with product differentiation on the import and export side. The basic properties of CGE models are established and a series of applications to trade policy, internal-external balance and growth, and intertemporal issues are discussed.

INTRODUCTION

The use of computable general equilibrium (CGE) models for policy analysis has become widespread for both developed and developing economies. For developed economies, with a few notable exceptions, applications have focused on microeconomics with the analysis concentrating on estimating the welfare impact of alternative tax structures or energy policies.¹ In developing countries, CGE models have been used for a wider range of issues, from medium- to long-term macroeconomic policy analysis to the more traditional microeconomic issues analyzed in developed countries as well.² Several reasons account for this wider range of applications, particularly the fact that notwithstand-

¹Applications to international trade and taxation issues are surveyed in Shoven and Whalley (1984). For models with a focus on energy policies, see Hudson and Jorgenson (1978). An exception is Dixon et al. (1982), who use a CGE model for Australia to analyze a wide range of macroeconomic and microeconomic issues.

²Robinson (1988) surveys CGE applications for developing countries with an emphasis on macroeconomics and applications rather than on international trade. The two surveys are therefore complementary.

I thank Sherman Robinson for comments and Jackson Magargee and Julie Stanson for much appreciated support. The views are those of the author, not those of the World Bank.
