Spaces of Congestion and Traffic David Rooney, 2018-09-03 This book provides a political history of urban traffic congestion in the twentieth century and explores how and why experts from a range of professional disciplines have attempted to solve what they have called the traffic problem. It draws on case studies of historical traffic projects in London to trace the relationship among technologies, infrastructures, politics and power on the capital's congested streets. From the visions of urban planners to the concrete realities of engineers and from the demands of traffic cops and economists to the new world of electronic surveillance, the book examines the political tensions embedded in the streets of our world cities. It also reveals the hand of capital in our traffic landscape. This book challenges conventional wisdom on urban traffic congestion, deploying a broad array of historical and material sources to tell a powerful account of how our cities work and why traffic remains such a problem. It is a welcome addition to literature on histories and geographies of urban mobility and will appeal to students and researchers in the fields of urban history, transport studies, historical geography, planning history and the history of technology.

Deprivation, State Interventions and Urban Communities in Britain, 1968-79 Peter Shapely, 2017-08-16 Focusing on a series of policy initiatives from the late 1960s through to the end of the 1970s, this book looks at how successive governments tried to address growing concerns about urban deprivation across Britain. It provides unique insights into policy and governance and into the socio-economic and cultural causes and consequences of poverty. Starting with the impact of redevelopment policies, immigration and the rise of the inner city, this book examines the pressures and challenges that explain the development of policy by successive Labour and Conservative governments. It looks at the effectiveness and limits of different community development approaches and at the inadequacies of policy in tackling urban deprivation. In doing so, the book highlights the restricted impact of pilot projects and reform of public services in resolving deprivation as well as the broader limits of social planning and state welfare. Crucially, it also plots the shift in policy from an emphasis on achieving statutory service efficiencies and rolling out social development programmes towards an ever greater stress on regeneration and support for private capital as the solution to transforming the inner city.

Bordered Cities and Divided Societies Scott A. Bollens, 2021-03-17 *Bordered Cities and Divided Societies* is a provocative, moving and poetic encounter with the hearts and minds of individuals living in nine cities of conflict, violence and healing: Jerusalem, Belfast, Johannesburg, Nicosia, Sarajevo, Mostar, Barcelona, Bilbao and Beirut. Based on research spanning 25 years, including 360 interviews and over two and a half years of in-country field research, this innovative work employs a series of concise, reflective narrative essays grouped into four thematic sections to provide a humanistic on-the-ground understanding of divided cities, conflict and peacemaking. Incorporating both scholarly analyses based on empirical research and introspective essays, Bollens digs underneath grand narratives of conflict to illuminate the complexities and paradoxes of living amid

nationalistic political strife and the challenges of planning and policymaking in divided societies Richly illustrated the book includes informative synopses about the cities that provide access for general readers while extensive connections to recent literature enhance the book's research value to scholars

Contemporary Archaeology and the City Laura McAtackney, Krysta Ryzewski, 2017-07-14 Contemporary Archaeology and the City foregrounds the archaeological study of post industrial and other urban transformations through a diverse international collection of case studies Over the past decade contemporary archaeology has emerged as a dynamic force for dissecting and contextualizing the material complexities of present day societies Contemporary archaeology challenges conventional anthropological and archaeological conceptions of the past by pushing temporal boundaries closer to if not into the present The volume is organized around three themes that highlight the multifaceted character of urban transitions in present day cities creativity ruination and political action The case studies offer comparative perspectives on transformative global urban processes in local contexts through research conducted in the struggling post industrial cities of Detroit Belfast Indianapolis Berlin Liverpool Bel m and post Apartheid Cape Town as well as the thriving urban centres of Melbourne New York City London Chicago and Istanbul Together the volume contributions demonstrate how the contemporary city is an urban palimpsest comprised by archaeological assemblages of the built environment the surface and buried sub surface that are traces of the various pasts entangled with one another in the present This volume aims to position the city as one of the most important and dynamic arenas for archaeological studies of the contemporary by presenting a range of theoretically engaged case studies that highlight some of the major issues that the study of contemporary cities pose for archaeologists

Ideologues and Presidents Thomas S. Langston, 2014-07-22 Ideologues and Presidents argues that ideologues have been gaining influence in the modern presidency There were plenty of ideologues in the New Deal but they worked at cross purposes and could not count on the backing of the cagey pragmatist in the Oval Office Three decades later the Johnson White House systematically sought the help of hundreds of liberals in drawing up blueprints for policy changes But when it came time to implement their plans Lyndon Johnson's White House proved to have scant interest in ideological purity By the time of the Reagan Revolution the organizations that supported ideological assaults on government had never been stronger The result was a level of ideological influence unmatched until the George W Bush presidency In Bush's administration not only did anti statist and social conservatives take up positions of influence throughout the government but the president famously pursued an elective war that had been promoted for a decade by a networked band of ideologues In the Barack Obama presidency although progressive liberals have found their way into niches within the executive branch the real ideological action continues to be Stage Right How did American presidential politics come to be so entangled with ideology and ideologues Ideologues and Presidents helps us move toward an answer to this vital question

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term development of public green spaces such as parks public gardens and recreation

grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities

Authentic Reconstruction John Bold, Peter Larkham, Robert Pickard, 2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost Authentic Reconstruction examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment From post WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters this collection of essays by heritage specialists provides a wide range of case studies and discussions Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians architects and planners in reconstructing buildings The book also looks beyond disaster and war noting how authenticity bears on political intentions and image building exploring how reconstruction is used to tell a political or historical story so conditioning the ways in which the built environment is perceived and appreciated by its users This is not just about the buildings as bricks and mortar but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population This book will be valuable to all who are concerned with heritage as practitioners or consumers particularly those concerned with reconstruction and the creation of authentic places and experiences architects architectural historians town planners preservationists conservationists and those involved in heritage management and material culture

The Great Kanto Earthquake and the Chimera of National Reconstruction in Japan J. Charles Schencking, 2013-07-09 In September 1923 a magnitude 7.9 earthquake devastated eastern Japan killing more than 120 000 people and leaving two million homeless Using a rich array of source material J Charles Schencking tells for the first time the graphic tale of Tokyo's destruction and rebirth In emotive prose he documents how the citizens of Tokyo experienced this unprecedented calamity and explores the ways in which it rattled people's deep seated anxieties about modernity While explaining how and why the disaster compelled people to reflect on Japanese society he also examines how reconstruction encouraged the capital's inhabitants to entertain new types of urbanism as they rebuilt their world Some residents hoped that a grandiose metropolis reflecting new values

would rise from the ashes of disaster ravaged Tokyo Many however desired a quick return of the city they once called home Opportunistic elites advocated innovative state infrastructure to better manage the daily lives of Tokyo residents Others focused on rejuvenating society morally economically and spiritually to combat the perceived degeneration of Japan Schencking explores the inspiration behind these dreams and the extent to which they were realized He investigates why Japanese citizens from all walks of life responded to overtures for renewal with varying degrees of acceptance ambivalence and resistance His research not only sheds light on Japan s experience with and interpretation of the earthquake but challenges widespread assumptions that disasters unite stricken societies creating a blank slate for radical transformation National reconstruction in the wake of the Great Kanto Earthquake Schencking demonstrates proved to be illusive

Daunton,2000 The process of urbanisation and suburbanisation in Britain from the Victorian period to the twentieth century **The Urban Politics of Policy Failure** John Lauermaann,Cristina

Temenos,2022-07-28 This book contributes to debates in geography and urban studies by analysing the spatial dimensions and politics of urban policy failure Attention is most often paid to successful urban policies Policymakers go to great lengths to emulate success by importing policy models implementing best practices or pursuing silver bullet solutions Yet stories of failure are at least as common as those of success Some policies fail to launch in the first place Others struggle to deliver their goals Many collapse under the weight of poor administration insufficient funding or political opposition This book establishes a vocabulary and set of analytical approaches for researching the spatial dynamics and impacts of urban policy failure With a geographically diverse set of cases the authors explore topics including policy im mobility urban policy experiments and governance initiatives ranging from sustainability to housing to public health across Europe North America and Asia The chapters in this book were originally published as a special issue of the journal Urban Geography **Planning**

Perspectives for Education Aubrey Pearre Johnston,James F. McNamara,1975 **Civil-Military Relations in Perspective** Stephen J. Cimbala,2016-05-23 The topic of civil military relations has high significance for academics for policy makers for military commanders and for serious students of public policy in democratic and other societies The post Cold War and post 9 11 worlds have thrown up traditional as well as new challenges to the effective management of armed forces and defense establishments Further the present century has seen a rising arc in the use of armed violence on the part of non state actors including terrorists to considerable political effect Civil military relations in the United States and their implications for US and allied security policies is the focus of most discussions in this volume but other contributions emphasize the comparative and cross national dimensions of the relationship between the use or threat of force and public

policy Authors contributing to this study examine a wide range of issues including the contrast between theory and practice in civil military relations the role perceptions of military professionals across generations the character of civil military relations in authoritarian or other democratically challenged political systems the usefulness of business models in military management the attributes of civil military relations during unconventional conflicts the experience of the all volunteer force and its meaning for US civil military relations and other topics Contributors include civilian academic and policy analysts as well as military officers with considerable academic expertise and experience with the subject matter at hand **Designs on Democracy** Neal Shasore,2022 *Designs on Democracy* provides an ambitious revision of how we understand the pivotal period of the formation of the profession of architecture in twentieth century Britain spanning the excitable discussions about the reconstruction of the profession for a democratic age after WWI and the reconstruction and planning following WWII

Journal of the Royal Institute of British Architects Royal Institute of British Architects,1918 *Automobility and the City in Twentieth-Century Britain and Japan* Simon Gunn,Susan C. Townsend,2019-08-22 *Automobility and the City in Twentieth Century Britain and Japan* is the first book to consider how mass motorization reshaped cities in Japan and Britain during the 20th century Taking two leading motor cities Nagoya and Birmingham as their principal subjects Simon Gunn and Susan C Townsend show how cars changed the spatial form and individual experience of the modern city and reveal the similarities and differences between Japan and Britain in adapting to the motor age The book has three main themes the place of automobility in post war urban reconstruction the emerging conflict between the promise of mobility and personal freedom offered by the car and its consequences for the urban environment the M E dilemma and the extent to which the Anglo Japanese comparison can throw light on fundamental differences in cultural understanding of the environment urbanism and the self The result is the first comparative history of mass automobility and its environmental consequences between East and West *The Everyday Experiences of Reconstruction and Regeneration* David Adams,Peter Larkham,2019-04-09 Set within a wider British and international context of post war reconstruction *The Everyday Experiences of Reconstruction and Regeneration* focuses on such debates and experiences in Birmingham and Coventry as they recovered from Second World War bombings and post war industrial collapse Including numerous images Adams and Larkham explore the initial development of the post Second World War reconstruction projects which so substantially changed the face of the cities and provided radical new identities Exploring these cities throughout the post war period brings into sharp focus the duality of contemporary approaches to regeneration which often criticise mid twentieth century poorly conceived planning and architectural projects for producing inhuman and unsympathetic schemes while proposing exactly the type of large scale regeneration that may potentially create similar issues in the future This book would be beneficial for academics and students of planning and urban design particularly those with an interest in post catastrophe or large scale reconstruction projects within cities
