Sociological Perspectives Volume 42 No1:

Social Capital Versus Social Theory Ben Fine, 2002-05-03 The idea of Social Capital is an attempt to incorporate social considerations into mainstream economic thinking Its proponents feel that social factors are properly quantifiable So they use the complex algebra and statistics beloved of mainstream economic theory and measure units of health care or education in the same way that they would machinery or transport Ben Fine's main argument in this book is that such concerns cannot be judged in terms of mathematical methods and that to try to do so is overly simplistic Fine assesses the impact of Social Impact across the social sciences and shows how economic analysis is being subsumed into these areas and how thinking in sociology and politics impacts upon economics

Japanese Women and Sport Robin Kietlinski, 2011-01-01 Japanese Women and Sport aims to explore both why and how in the past century athletics have stood out as an arena in which excellence by Japanese women is so actively encouraged

Biological Economies Richard Le Heron, Hugh Campbell, Nick Lewis, Michael Carolan, 2016-01-22 Recent agri food studies including commodity systems the political economy of agriculture regional development and wider examinations of the rural dimension in economic geography and rural sociology have been confronted by three challenges These can be summarized as more than human approaches to economic life a post structural political economy of food and agriculture and calls for more enactive performative research approaches This volume describes the genealogy of such approaches drawing on the reflective insights of more than five years of international engagement and research It demonstrates the kinds of new work being generated under these approaches and provides a means for exploring how they should be all understood as part of the same broader need to review theory and methods in the study of food agriculture rural development and economic geography This radical collective approach is elaborated as the Biological Economies approach The authors break out from traditional categories of analysis reconceptualising materialities and reframing economic assemblages as biological economies based on the notion of all research being enactive or performative

Advances in Sociology Research Leopold M. Stoneham, 2004 Presents original research results on the leading edge of sociology Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum

Trust, Politics and Revolution Francesca Granelli, 2019-12-04 Tracing the relationships and networks of trust in Western European revolutionary situations from the Ancient Greeks to the French Revolution and beyond Francesca Granelli here shows the essential role of trust in both revolution and government arguing that without trust both governments and revolutionary movements are liable to fail The first study to combine the importance of trust and the significance of revolution this book offers a new lens through which to interpret revolution in an essential work book for all scholars of political science and historians of revolution

Unintended Consequences Deepak Lal, 2001 In this book based on the 1995 Ohlin Lectures Deepak Lal provides an accessible interdisciplinary account of the role of culture in shaping economic performance Topics addressed include a possible future clash of civilizations the role of Asian values in the East

Asian economic miracle the cultural versus economic causes of social decay in the West and whether modernization leads to Westernization Lal makes an important distinction between material and cosmological beliefs showing how both were initially shaped by factor endowments and how they have evolved in response to changing historical pressures in different civilizations Lal s first major theme is the interaction of factor endowments culture and politics in explaining modern intensive growth in the West The other major theme is the role of individualism an inadvertent legacy of the medieval Catholic Church in promoting this growth and the strange metamorphoses this has caused in both the West s cosmological beliefs and the interaction between the West and the rest Lal takes account of the relevant literature in history anthropology social psychology evolutionary biology neurology and sociology and the economic history of the regions and cultures that form Eurasia An appendix shows how the stories Lal tells can be described by four formal economic models **ICGR 2023**

6th International Conference on Gender Research Professor Sandra Moffett, Dr Shirley Barrett, Dr. Andrea Reid, 2023-04-20 **The Routledge Handbook on Crime and International Migration** Sharon Pickering, Julie Ham, 2017-07-14 The Routledge Handbook on Crime and International Migration is concerned with the various relationships between migration crime and victimization that have informed a wide criminological scholarship often driven by some of the original lines of inquiry of the Chicago School Historically migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity often in highly problematic ways However in the contemporary period this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants The Routledge Handbook on Crime and International Migration is also concerned with the theoretical empirical and policy knots found in the relationship between regular and irregular migration offending and victimization the processes and impact of criminalization and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders The Handbook is focused on the migratory fault lines between the Global North and Global South which have produced new or accelerated sites of state control constructed irregular migration as a crime and security problem and mobilized ideological and coercive powers usually reserved for criminal or military threats Offering a strong international focus and comprehensive coverage of a wide range of border criminal justice and migration related issues this book is an important contribution to criminology and migration studies and will be essential reading for academics students and practitioners interested in this field **The Politics of Race** Ivor Crewe, 2015-10-16 This volume first published in 1975 is concerned with the politics of race relations it is divided into theoretical empirical and methodological studies together with an extensive bibliography A key theme in this volume is to show how the study of race relations can advance beyond traditional micro level analysis In the opening paper Axford and Brier concerned about the neglect of macro level analysis stress the need for conceptual frameworks which would help us to understand the place of racial conflict in the British

political system They suggest that elite political groups otherwise in conflict have by tacit consensus eliminated race from the national political agenda **Routledge Library Editions: Racism and Fascism** Various,2021-06-23 This set gathers together a collection of out of print titles all classics in their field Reissued for the first time in some years they offer an insightful reference resource to a variety of topics From Professor Colin Holmes s groundbreaking studies of racism in British society to Professor Kitchen s analysis of the rise of fascism in pre war Austria these books shed much light on society s recent dark past **Accounting, Accountability and Crisis Management** Ericka Costa,Massimo Contrafatto,Lee Parker,2024-08-01

Conventional economic and accounting systems have been exposed by the limitations of market driven mechanisms where public services education and healthcare have been subordinated to profit exacerbating the inequalities between people and countries Italy was one of the earliest countries to be affected by the COVID 19 pandemic and also one of the hardest hit The successes and failures of the Italian response provides a blueprint for the factors determining the ability of institutions to meet these challenges This book presents a multifaceted analysis and reflection of the challenges that various types of organisations public private and non profit have had to face during the pandemic It contributes to the creation of robust strategies for institutions worldwide to be able to respond promptly and equitably to future emergencies and offers insights for developing policy and practice with respect to global leaders accountability for and management of exceptional events It addresses three main subjects extraordinary events and their challenges for business and organisations the nature and roles of interdisciplinary accounting and accountability in a pandemic environment and how the global pandemic is impacting accounting and accountability in diverse contexts such as public services healthcare education and NGOs With a focus on institutional approaches to establishing maintaining and discharging accountability throughout the pandemic the insights of this book are invaluable to both students and practitioners seeking to bolster institutional resilience in an increasingly uncertain world Both management and accounting communities can learn from this extraordinary global event to promote the process of transforming how business and societies operate **Gender Studies, Entrepreneurship and Human**

Capital Paola Paoloni,Rosa Lombardi,2020-07-08 In today s climate academics professional community and policy makers all have input in critical gender issues as well as in the entrepreneurship and human capital issues Various gender issues are published involving many scientific fields including business management and accounting research Presenting the topic of gender issues entrepreneurship and human capital this book collects the main output of the researches presented at the Annual Workshop of IPAZIA 2019 of Rome in Italy The authors provide a renewed and fruitful analysis of these topics with the purpose of advancing the gender theories in the international context **The Routledge Handbook of Elections,**

Voting Behavior and Public Opinion Justin Fisher,Edward Fieldhouse,Mark N. Franklin,Rachel Gibson,Marta Cantijoch,Christopher Wlezien,2017-09-22 The study of elections voting behavior and public opinion are arguably among the most prominent and intensively researched sub fields within Political Science It is an evolving sub field both in terms of

theoretical focus and in particular technical developments and has made a considerable impact on popular understanding of the core components of liberal democracies in terms of electoral systems and outcomes changes in public opinion and the aggregation of interests This handbook details the key developments and state of the art research across elections voting behavior and the public opinion by providing both an advanced overview of each core area and engaging in debate about the relative merits of differing approaches in a comprehensive and accessible way Bringing geographical scope and depth with comparative chapters that draw on material from across the globe it will be a key reference point both for advanced level students and researchers developing knowledge and producing new material in these sub fields and beyond The Routledge Handbook of Elections Voting Behavior and Public Opinion is an authoritative and key reference text for students academics and researchers engaged in the study of electoral research public opinion and voting behavior Demographic and Social Aspects of Population Growth Robert Parke,1972 **Project Research in Information Systems** Tony Cornford,Steve Smithson,2017-09-16 Aimed at final year undergraduates and masters students undertaking research projects in information systems this text offers a blend of practical guidelines and conceptual insight that will help students to complete high quality projects Covering the whole range of processes in project work from choosing a project through project management the collecting and analyzing of research data and on to writing the project report the book provides an authoritative and comprehensive guide to the subject **Research Reports: Demographic and social aspects of population growth** United States. Commission on Population Growth and the American Future,1970 Accounting the Future Ivanche Dimitrievski,2019-05-27 The thesis investigates the social processes involved in the practices of futuring It addresses the question of how social practices contribute to the production and maintenance of robust versions of the future It asks how best we should study futurity including expectations imaginations promises and visions Existing research tells us rather little about how ordinary practices render the future as a particular publicly available and accountable presence or absence In what ways do people achieve situated performances of certainty about the future The thesis addresses these questions by drawing upon recent theoretical themes in Science and Technology Studies STS notably accountability relations and mundane practices in science and technology The empirical focus of the thesis is an extended ethnographic study of the European Spallation Source ESS a major neutron based science research facility currently under construction in Lund Sweden The methods used are a combination of participant observation interviews documentary analysis and ethnomethodologically inflected textual analysis The thesis reports findings in relation to each of four aspects of ESS work 1 the textual practices rendering the future of the ESS in local newspaper coverage 2 documentary analysis of a 2014 2015 Call for ESS Instrument Proposals 3 observations from visits to ESS and participation in staged future walks and 4 the mundane laboratory practices of measuring thickness in an ESS Detector Coatings Workshop in Linköping The results of these empirical analyses are used to argue for the importance of generating and sustaining accountability relations in

futuring practices for understanding how the future is imagined and made to come about The thesis concludes that looking at practices in this way has political implications among other things it allows to see how agency and capability to affect the future is distributed built eroded and attributed

Ethical Trade, Gender and Sustainable Livelihoods Kiah Smith, 2014-03-21 Fair and ethical trade is often criticized for being highly gendered and for institutionalizing the ethical values of consumers the priorities of NGOs and governments and most of all food retailers But little is known about how women smallholder farmers experience diverse ethical standards or whether and how standards reflect their values local cultural and environmental contexts or priorities for achieving sustainable livelihoods Linking gender smallholder livelihoods and global ethical trade regulations this book reveals that multiple understandings of social justice environmental sustainability and well being or ethicality exist in parallel to those institutionalized in ethical trade schemes Through an in depth case study of smallholder subsistence and French bean farming in Kenya the book grounds the analysis of livelihoods gender and ethical trade in women smallholders perspectives links the macro level of markets with the micro level of livelihoods and engenders relations of power structure and agency in food networks It brings together disparate bodies of theory to illustrate the knowledge strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations It also provides a challenging new vision for doing food systems research

The Routledge Handbook of Disaster Response and Recovery Bimal Kanti Paul, Luke Juran, 2025-03-25 The Routledge Handbook of Disaster Response and Recovery covers the two post disaster stages of the disaster cycle and presents an extensive and cutting edge overview of their many considerations Organized into two parts Response and Recovery this handbook details the history theories methods debates and emerging issues in the stages of response and recovery Using a transdisciplinary approach the myriad topics examined in this handbook include search and rescue myths related to disaster response technological methods for response recovery among vulnerable populations and the intersection of disasters and mental health Contributors discuss these issues both globally as well as country and disaster specific This book is an essential guide and reference not only for scholars engaged in disaster research but also for undergraduate and graduate students policy makers disaster managers international and supranational agencies and humanitarian and volunteer organizations engaged in disaster management

Global Turbulence Marjorie Griffin Cohen, Stephen McBride, 2003 States and social activists alike face a turbulent global political economy as they seek to confront new challenges with new strategies The same is true of academic disciplines that seek to track discontinuities in old certainties and analyze emerging agendas action identities and space In contrast to approaches which argue that the new global order is simply a fact of life impervious to political challenge the contributors to this book emphasize that it is highly contested States retain considerable power even if much of it has been directed to constructing globalization rather than modifying its effects and disadvantaged groups even the most apparently marginalized have managed to win improvements in their condition The book draws attention to the state of flux

that characterizes contemporary political economy both in theory and practice Useful for senior undergraduate and graduate students in political economy international relations political science and sociology
