Sociological Practice:

Sociological Practice Ray Kirshak, 1998-01-01 Sociological Practice Derek Layder, 1998-09-04 In this textbook Derek Layder offers a better understanding of the links between theory and research and provides an analysis of the relationship between the two. He develops clear usable strategies to encourage theory development in the practical context of social research and introduces a new approach adaptive theory which can be used to generate new theory as well as develop existing theory in conjunction with empirical research. Layder concludes by providing an outline of new rules of sociological method that show how adaptive theory can be put into practice.

Sociological Practice John G. Bruhn, Howard Rebach, 2007-11-15 This second edition of a classic text in the field has been revisited by its authors and extensively reworked. It incorporates new case studies based on the authors' experiences as well as one completely new chapter. The first edition of *Clinical Sociology* was published in 1996. Its goal was to explore various approaches to problem solving at the micro, meso, and macro levels of social complexity.

Doing Sociology Jammie Price, Roger Straus, Jeff Breese, 2009-08-16 This successor to the well known *Using Sociology* covers standard topics found in any sociology textbook. *Doing Sociology* walks lay readers through the steps of doing real life sociological practices as conducted by experts in the field. The contributors to this volume range from university and college faculty, government sociologists and practitioners from the private sector. Each of the chapters is by intention and design a personal statement, a case study illustrating how the authors practice sociology in their own words and style, giving readers a clearer understanding of what sociologists do outside of teaching in universities. And most importantly, an understanding of what they could do with sociology. Readable, relevant, and accessible. *Doing Sociology* is an invaluable resource as a stand alone course reader or as a supplement to a traditional textbook.

Making a Difference Irwin Deutscher, 2018-01-16 Emphasis on measurement techniques can interfere with understanding how well particular social programs in their field work. In *Making a Difference: The Practice of Sociology* Irwin Deutscher links traditional sociological concerns with applied sociology in an effort to overcome this problem. He contributes to the debate over the extent to which health, educational, and social programs initiated by the Roosevelt, Kennedy, and Johnson administrations have been successful in intimate human terms. Deutscher believes that the introduction of a sociological perspective can provide a positive element to interdisciplinary pursuits. This belief, as well as his fresh perspectives on both the strengths and limitations inherent in applied sociology, offer the field a revitalising lift. As such, this highly informative, thought provoking volume will be of interest to sociologists and policy makers in health, education, crime, welfare, and housing.

Discourse : Event : Practice Franka Schäfer, 2025-10-14 With *Discourse Event Practice* the author presents a dynamic theoretical program for a discourse theoretically informed sociology of practice oriented toward the concept of the event She outlines the sociological relationship between the concepts of discourse event and practice diagnoses their distorted relationship and explains the dynamization of dichotomous conceptions as the guiding principle of

her argumentation Through a reconstruction of the discourse theoretical foundations the practical theoretical conditions the situation of the method discussion and the starting point of sociological protest research she forms the basis of the research program and marks the question of the association of discourses and practices as a gap which is elucidated using the example of protest research The core of the book is a nuanced examination of the concept of event developed from the influence of Foucault as a primary basis for transformation and translated into a concept of event that ensures a relationship between discourse and practice that overcomes dichotomies within a post structuralist materialism In addition the potential of the program lies in the expansion of practice studies to include an explicit perspective on power and domination illustrated through an analysis of the practices of resistance as exemplified by the Yippie Festival of Life Handbook of Clinical Sociology Howard M. Schneider, 2014-05-10 In 2004

Michael Burawoy challenged sociologists to move beyond the ivory tower and into the realm of activism to engage in public discourses about what society could or should be. His call to arms sparked intense debate among sociologists. Which side would sociology take? Would public sociology speak for all sociologists? In this volume, which opens with a foreword by Michael Burawoy, leading Canadian sociologists continue the conversation by discussing not only how and why they should do sociology but also how ethical judgments influence sociological practice and the evaluation of research. Most importantly, they ask whether and under what circumstances sociologists should advocate for social change. Regardless of whether they focus on activism, research, theory, or teaching, the contributors offer insights into where the discipline is heading and why it matters to people inside and outside the university. **Sociological Practice Review**, 1991
