Domestic Private Firms: Anne S. Tsui,Yanjie Bian,2014-12-18 One of the most important outcomes of market reforms in China over the past 20 years has been the emergence of a significant domestic private sector which now accounts for almost

a third of China's GDP and is by far the country's most important source of employment growth. This book is the first in depth analysis of the management and operation of these domestic private firms which are defined as companies or organizations created by PRC citizens including township enterprises and collectives. The book provides a comprehensive and multidisciplinary perspective on the factors important to the successful operation and growth of these firms. It begins with a review of the literature on the topic in three different disciplines: economics, sociology, and management, each followed by several chapters covering recent developments in these areas. Featuring contributions by distinguished scholars and China experts, the work concludes with an insightful chapter on the future of China's public sector in the global economy.

Health Care Transformation in Contemporary China Jiong Tu, 2018-06-12. This multifaceted book examines the free market reform of the Chinese healthcare system in the 1980s and the more collectivist or socialist counter reforms that have been implemented since 2009 to remedy some of the problems introduced by marketization. The book is based on an ethnographical study in a Chinese county from 2011 to 2012 which investigated local people's experience of healthcare reforms and the various ways in which they have adapted their own behavior to the constraints and opportunities introduced by these reforms. It provides a vivid depiction of the morality and emotionality of people's experiences of the Chinese healthcare system and the myriad frustrations and sometimes desperation it induces not only among patients with significant health problems and their families but also healthcare practitioners caught between their desire to do right by their patients and the penalties they personally incur if they do not adhere to institutionalized cost saving measures. The people's experiences within China's health sector presented reflect many similar experiences in the wider Chinese society. The book is thus a valuable resource for researchers and graduate students interested in China's healthcare reforms and scholars concerned with issues of contemporary Chinese society. *Social Stratification in Contemporary China* Li
