Soul Space:

Soul Space Jerome Daley, 2008-11-13 So often there is a gap between the fulfilling life we long for and the frenzied life we live We know the frustration all too well but we long for something more This book beckons readers to that place where God breaks in and restores meaning to the mundane *Forty Years of Sacred Space* Dr. Patrick Donovan, 2013-11-01 After forty three years in the sacred space of caring for patients Dr Donovan shares his observations and thoughts about illness and healing He believes illness serves us by acting as life's transformative process As such the journey through our illness may be precisely the very experiential journey we need to realize our healing and ourselves more fully After all we don't get cancer Cancer like any illness is a process We are the cancer we manifest Our cancer arises out of our own tissues and cellular make up To rid our self of our cancer is to rid our self of a part of our self Instead of thinking about illness as something we get something separate from ourselves needing to be removed or defeated Dr Donovan thinks we might well do better viewing our illness as a transformational journey that must be undertaken and completed for our healing to emerge We can't get rid of our selves but we can transform ourselves and our illness provides us with that opportunity It allows us our healing

Rudolf Steiner Colin Wilson, 2019-02-21 Of all the important thinkers of the twentieth century Rudolf Steiner 1861-1925 is perhaps the most difficult to come to grips with For the unprepared reader his work presents a series of formidable obstacles from the dauntingly abstract style to the often bizarre pronouncements on the nature of man and his cosmic destiny And yet Steiner was perhaps the most influential and charismatic occult philosopher of his generation and the movement he launched Anthroposophy with its educational agricultural and artistic applications still has many thousands of followers worldwide No one interested in esoteric thought can ignore Steiner but until now there has been no genuinely accessible introduction to his ideas This lucid and sympathetic account describes Steiner's development from shy scholar to the international figurehead of Anthroposophy his break with Madam Blavatsky's Theosophy his struggles to find a voice and the essence of his insights into the supersensible world **The Pearly Gates of Cyberspace** Margaret Wertheim, 2000

Cyberspace may seem an unlikely gateway for the soul but as science commentator Wertheim argues in this wonderfully provocative Kirkus Reviews book cyberspace has in recent years become a repository for immense spiritual yearning 37 illustrations **Ideal Embodiment** Angelica Nuzzo, 2008-10-28 Angelica Nuzzo offers a comprehensive reconstruction of Kant's theory of sensibility in his three Critiques By introducing the notion of transcendental embodiment Nuzzo proposes a new understanding of Kant's views on science nature morality and art She shows that the issue of human embodiment is coherently addressed and key to comprehending vexing issues in Kant's work as a whole In this penetrating book Nuzzo enters new terrain and takes on questions Kant struggled with How does a body that feels pleasure and pain desire anger and fear understand and experience reason and strive toward knowledge What grounds the body's experience of art and beauty What kind of feeling is the feeling of being alive As she comes to grips with answers Nuzzo goes beyond Kant to revise

The Qualia Revolution Peter Wilberg, 2004-04 The most fundamental scientific fact is not the existence of the physical universe but our awareness of that universe Not even the most advanced physics physiology or psychology however can explain even the most elementary qualities of our sensory awareness of that universe qualities such as redness for example Qualia used to be defined as sensory qualities such as colour and tone But what if awareness is not an empty receptacle for sensory impressions but has its own intrinsic sensual qualities of the sort we experience as the inwardly sensed shape and substantiality of our bodies the sensed lightness or darkness colour or tone of our moods or a sensed feeling of warmth or coolness closeness or distance to another human being What if such sensual qualities of awareness are intrinsically meaningful being the felt essence of meaning or sense is not energetic quanta but qualia in this sense sensed and sensual qualities of awareness that are the basic stuff of which the universe is composed It argues that qualia are not simply qualities of our own human awareness but fundamental units of awareness Atoms molecules and cells are recognised as the physical form taken by field patterns of atomic molecular and cellular awareness composed of such units The soul is understood as an ever changing gestalt of such

units each of which possess characteristics of both unit and field particle and wave allowing the soul qualities of our own awareness to mix and merge with those of all other beings
