Sound And Silence:

Sound and Silence John Paynter, 1979 *Listening to Noise and Silence* Salomé Voegelin, 2010-03-31 Listening to Noise and Silence engages with the emerging practice of sound art and the concurrent development of a discourse and theory of sound In this original and challenging work Salomé Voegelin immerses the reader in concepts of listening to sound artwork and the everyday acoustic environment establishing an aesthetics and philosophy of sound and promoting the notion of a sonic sensibility A multitude of sound works are discussed by lesser known contemporary artists and composers for example Curgenven Gasson and Federer historical figures in the field Artaud Feldman and Cage and that of contemporary canonic artists such as Janet Cardiff Bill Fontana Bernard Parmegiani and Merzbow Informed by the ideas of Adorno Merleau Ponty and others the book aims to come to a critique of sound art from its soundings rather than in relation to abstracted themes and pre existing categories Listening to Noise and Silence broadens the discussion surrounding sound art and opens up the field for others to follow

The Bloomsbury Handbook of Sonic Methodologies Michael Bull, Marcel Cobussen, 2020-12-10 The field of Sound Studies has changed and developed dramatically over the last two decades involving a vast and dizzying array of work produced by those working in the arts social sciences and sciences The study of sound is inherently interdisciplinary and is undertaken both by those who specialize in sound and by others who wish to include sound as an intrinsic and indispensable element in their research This is the first resource to provide a wide ranging cross cultural and interdisciplinary investigation and analysis of the ways in which researchers use a broad range of methodologies in order to pursue their sonic investigations It brings together 49 specially commissioned chapters that ask a wide range of questions including how can sound be used in current academic disciplines Is sound as a methodological tool indispensable for Sound

Studies and what can sound artists contribute to the discourse on methodology in Sound Studies The editors also present 3 original chapters that work as provocative sonic methodological interventions prefacing the 3 sections of the book **The 'Imagined Sound' of Australian Literature and Music** Joseph Cummins,2019-09-20 Imagined Sound is a unique cartography of the artistic historical and political forces that have informed the post World War II representation of Australian landscapes It is the first book to formulate the unique methodology of imagined sound a new way to read and listen to literature and music that moves beyond the dominance of the visual the colonial mode of knowing controlling and imagining Australian space Emphasising sound and listening this approach draws out and re examines the key narratives that shape and are shaped by Australian landscapes and histories stories of first contact frontier violence the explorer journey the convict experience non Indigenous belonging Pacific identity and contemporary Indigenous Dreaming Imagined Sound offers a compelling analysis of how these narratives are reharmonised in key works of literature and music *The Mind's Landscape* David Clippinger,2006-03 Throughout the latter half of the twentieth century the poet WilliamBronk 1918 1999 was a significant voice in the American literarylandscape Even though he spent nearly all of his life in Hudson Falls NY Bronk was a vital presence in American poetry as evidenced byhis connections to Robert Frost Charles Olson George Oppen RobertCreeley Wallace Stevens Susan Howe Rosemarie Waldrop andothers The Mind s Landscape attempts to present a freshperspective of twentieth century literary history as seen through the lens of Bronk s life as a writer Geographies of Urban Sound Dr Torsten Wissmann,2014-05-28 Taking into account both the urban soundscape and the impacts of sound on the urban dweller this book examines sound not as a by product of urban life but as a fundamental part of the urban experience that is crucial to understanding the city s sense of place Illustrated by case studies from Europe and North America these range from on site measurements to the construction of audio tours for local tourism from media analysis of popular culture audio drama to sound identity and city branding and from the classification of noise in city planning to a consideration of the complex relationship between sacred sound and the creation of a sense of place **Violence and Nihilism** Luís Aguiar de Sousa,Paolo Stellino,2022-07-05 Nihilism seems to be per definition linked to violence Indeed if the nihilist is a person who acknowledges no moral or religious authority then what does stop him from committing any kind of crime Dostoevsky precisely called attention to this danger if there is no God and no immortality of the soul then everything is permitted even anthropophagy Nietzsche too emphasised although in different terms the consequences deriving from the death of God and the collapse of Judeo Christian morality This context shaped the way in which philosophers writers and artists thought about violence in its different manifestations during the 20th century The goal of this interdisciplinary volume is to explore the various modern and contemporary configurations of the link between violence and nihilism as understood by philosophers and artists in both literature and film **The Etude** ,1901 A monthly journal for the musician the music student and all music lovers **Sounds of Black Switzerland** Jessie Cox,2025-01-03 Writing as a scholar composer and

musician Jessie Cox foregrounds the experience of Black Swiss through sound and music in his first book *Sounds of Black Switzerland* Cox himself Black Swiss affirms the value of Black life through sound while critiquing anti Blackness as a cause of erasure silence and limitation He examines Swiss Nigerian composer Charles Uzor s pieces for George Floyd work by Black Swiss musicians such as DJ Ma t Ch ni re clarinetist J r mie Jolo and rapper Nativ as well as his own musical collaborations with the Lucerne Festival In these analyses Cox tackles the particularities of anti Blackness in Switzerland creating a practice of listening beyond what can be directly heard to explore the radical potential of Black thought and experience in a nation often claimed to be race free In so doing he ultimately shifts thinking about Blackness in relation to citizenship immigration laws gender kinship and belonging By listening to Black Swiss and other voices inaudible to the current world Cox theorizes new ways of practicing scholarly study and general ways of relating to others and the world

Manoussakis, 2007-05-23 While philosophy believes it is impossible to have an experience of God without the senses theology claims that such an experience is possible though potentially idolatrous In this engagingly creative book John Panteleimon Manoussakis ends the impasse by proposing an aesthetic allowing for a sensuous experience of God that is not subordinated to imposed categories or concepts Manoussakis draws upon the theological traditions of the Eastern Church including patristic and liturgical resources to build a theological aesthetic founded on the inverted gaze of icons the augmented language of hymns and the reciprocity of touch Manoussakis explores how a relational interpretation of being develops a fuller and more meaningful view of the phenomenology of religious experience beyond metaphysics and onto theology
