## **Social Indicators And Social Theory Elements Of An Operational System:**

Social Indicators and Social Theory: Elements of an Operational System Karl A. Fox, Karl August Fox, 1974 Social sciences textbook on social indicators and the social theory of social accounting in the USA covers personality factors a model of individual resource allocation the total income approach national goal output indicators and activities regional level or urban area indicators models of the higher education sector elements of an operational system on the national level and local level and world models etc and includes a literature survey Bibliography pp 266 to 276 references and statistical tables *Social Measurement and Social Indicators* Michael Carley, 2025-06-30 For the early pioneers of the social indicator movement the possibilities of doing social good by developing the tools of social measurement seemed endless However in the early 1980s these high and perhaps naive hopes remained unfulfilled especially for the data needs of the policy maker If not pessimistic administrators and public policy makers were at least guarded about the usefulness of social indicators as an aid to increasingly complex decision making These difficulties reflected both policy related and methodological issues Originally published in 1981 *Social Measurement and Social Indicators* is not a how to guide on the construction of social indicators but rather a critical and optimistic view of these central issues as embodied in the literature and in practice at the time Michael Carley contrasts some of the basic problems of social measurement with government's needs for reliable information organised by their policy usefulness and statistical sophistication The book then discusses the critical relationship between social indicators and social theories and models as well as the role of social information in the policy process Later chapters look at the audience the problems and the prospects for national social reports and explore in detail three different applications of social indicators to urban analysis Throughout the book helpful examples are drawn from North American UK and European experience *Social Measurement and Social Indicators* is aimed at a cross disciplinary audience in government and the universities For students it will serve as a compact introduction to the broad field of social indicators for administrators it explores philosophical and measurement problems and suggests criteria for interpretation for researchers it places social indicator efforts into a wider policy analysis perspective with its inescapable political value judgemental and bureaucratic aspects

**The Programming Approach and the Demise of Economics** Franco Archibugi, 2019-11-21 This trilogy deals with an epistemology of economics arguing for a radical overturning of conventional analysis and providing an alternative to political economy and social sciences based not on positivism but on a normative and programming paradigm Volume II builds on the work presented in Volume I to explore oppositions to the traditional and conventional teaching of economics and presents testimonies that are favourable to a trend towards a programming approach thereby giving substance to the epistemological overturning of conventional analysis Such oppositions studied include the work of Ludvig von Mises and his theory of praxeology Ian Tinbergen and Wassily Leontief's preference for planning over forecasting science Bruno de Finetti and Daniel Bell's support for the base of utopia in economics the trend from the theory of planning towards

the methodology of planning by Andreas Faludi neoclassic curiosity about the multi purposes approach and non economic commodities as investigated by Walter Isard as well as theories expressed by Herbert Simon Robert Lucas George Soros and Mark Blaug Volume III takes studies further and presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch s plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences

**Economy & Ecology: Towards Sustainable Development** F. Archibugi, Peter Nijkamp, 2013-03-09 After a period of relative silence recent years have been marked by an upswing of interest in environmental issues The publication of the report of the World Commission on Environment and Development on Our Common Future 1987 has acted as a catalyst for a revival of the environmental awareness not only regarding local and daily pollution problems but also and in particular regarding global environmental decay and threats to a sustainable development In a recent study by W M Stigliani et al on Future Environments for Europe Executive Rep rt 15 IIASA Laxenburg 1989 the environmental implications of various alternative socioeconomic development pathways with respect to eleven environmental issues that could become major problems in the future are analysed These issues include Managing water resources in an era of climate change Acidification of soils and lakes in Europe Long term forestry management and the possibility of a future shortfall in wood supply Areas of Europe marginalized by mainstream economic and agricultural development Sea level rise Chemical pollution of coastal waters Toxic materials buildup and the potential for chemical time bombs Non point source emissions of potentially toxic substances Transportation growth versus air quality Decreasing multi functionality of land owing to urban and suburban land development Increasing summer demand for electricity and the impact on air quality
