Social Problems Free:

Social Problems in a Free Society Myles J. Kelleher, 2004-09-02 The future of the sociologist's profession is jeopardized by an ongoing trend toward the politicization of sociology and the radicalization of social problems. This book calls for the rethinking of the culture of social, political and economic liberty to create a resurgence of a sociological agenda. *Social Problems in a Free Society* offers an original perspective on social problems such as violations of the principles of individual rights and the free market. This book is a vision for reinvigorating the discipline in a fashion undreamt of within the wearisome strains of today's radical social problems theory. Investigating Social Problems A. Javier Trevino, 2024-05-16. General Editor A. Javier Trevino working with a panel of experts thoroughly examines all aspects of social problems, providing a contemporary and authoritative introduction to the field. Each chapter is written by a specialist on that particular topic. This unique contributed format ensures that the research, examples, and theories described are the most current and relevant available. The text is framed around three major themes: intersectionality, the interplay of race, ethnicity, class, and gender; the global scope of many problems; and how researchers take an evidence-based approach to studying problems.

Value-Free Science Harold Kincaid, John Dupre, Alison Wylie, 2007-03-15. It has long been thought that science is our best hope for realizing objective knowledge, but that to deliver on this promise it must be value-free. Things are not so simple, however, as recent work in science studies makes clear. The contributors to this volume investigate where and how values are involved in science and examine the implications of this involvement for ideals of objectivity.

Educational Research: the Educationalization of Social Problems Paul Smeyers, 2009-04-14. Pushing social responsibilities on schools is a process that has been underway for a long time. This phenomenon has been studied more in Europe than in North America and the U.K. and has been labelled *Pädagogisierung*. The editors have chosen to use *Educationalization* to identify the overall orientation or trend toward thinking about education as the focal point for addressing or solving larger human problems. The term describes these phenomena as a sub-process of the modernization of society, but it also has negative connotations such as increased dependence, patronization, and pampering. In this book, distinguished philosophers and historians of education focus on educationalization to expand its meaning through an engagement with educational theory. Topics discussed are the family and the child, the learning society, citizenship, education, widening participation in higher education, progressive education, and schooling movements such as *No Child Left Behind*. Smeyers and Depaepe's book offers great insights into one of the most ambivalent phenomena of today's educational world and especially educational policy. The contributions assembled represent perspectives of some of the most respected scholars in the field. Their manifold critiques of the educationalization of social problems are rather convincing. Our time is definitely ripe for such analysis. Roland Reichenbach, Center for Educational Studies, University of Basel, Switzerland. This is a challenging, critical, and analytical treatment of the tendency of contemporary administrations to overburden educational institutions with the expectation that they will provide the solutions to an increasingly diverse range of social and economic

problems It brings together the theoretical resources of a distinguished international group of philosophers and historians of education and deserves the careful attention of educational policy makers practitioners and researchers alike David Bridges Von H gel Institute St Edmund s College Cambridge England This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Evaluation and Evolution of the Criteria for Educational Research Also realized by the Research Community are Educational Research Why What Works Doesn t Work 2006 and Educational Research Networks and Technologies 2007

Churches and Social Issues in Twentieth-century Britain G. I. T. Machin, 1998 During this century the Christian Churches of Britain have lost support and influence to the extent that their future is considered by some observers to be problematic They have also been confronted with an unprecedented concentration of social changes some of which have challenged central religious traditions and teachings This multi denominational study is the first to investigate these changes public and private across virtually the entire Christian spectrum Professor Machin shows that while there are examples of growing division between Churches over some social issues the more general response has been one of differences within
