Ethnographic Methods Karen O'Reilly, 2005 Ethnography isn't a prescribed set of methods it's a methodology that acknowledges the complexity of human experience and the need to research it by close and sustained observation of human behaviour In this comprehensive yet concise introduction Karen O'Reilly introduces the

reader to the technical practical and philosophical issues that arise when employing traditional and innovative research methods in relation to human agents She invites the reader to engage in reflexive and creative research that draws critically and creatively from the full range of qualitative methods Using case studies of students work to illustrate the dilemmas and resolutions that an ethnographic researcher may encounter this textbook guides the reader from the initial design and planning stages through to the analysis and writing up It explores the historical and philosophical foundations of ethnographic research and goes on to cover a range of relevant topics such as participant observation qualitative interviews focus group interviews and visual data collection and analysis Designed primarily for undergraduates this book incorporates complex methodological debates which will also engage more experienced researchers perhaps coming to ethnography for the first time

Policy Studies Review Annual Bertram H. Raven,1979-01-01 *Illegal Drug Use Through The Lifecourse* David Moxon,Jaime Waters,2016-10-04 Hidden older illegal drug users are a seldom researched group most research on illegal drug users instead focusses on the young or the institutionalised To counter this trend this book reports on a study of current hidden users of illegal drugs aged 40 and over These are individuals who have sustained illegal drug use over the long term largely away from the gaze of the authorities whilst living otherwise conventional lives holding down jobs raising families and so on Thus they have much to tell us about how illegal substances can be integrated into life over the long term how that integration intersects with other aspects of one s existence and how illegal drug use is ultimately shaped by changes in personal circumstances and wider social contexts Utilising insights from the life course perspective the development of the participants use over their lives is analysed and placed in social context The book also details the nature of their current drug use Thus the book illustrates the place of illegal drugs in the lives of the participants and how this came to be over the decades as they also juggled work family and the everyday minutiae of life with their use The result is a unique look at the illegal drug use of an often ignored group of older drug users which charts the changing role that illegal drugs have played and continue to play in their lives

develops a theoretical toolkit of mechanisms that operate within networks and shape employment relations processes and outcomes such as wages labour market policies and labour conflicts It brings together insights from various projects that investigate the structure functioning and impact of networks in employment relations through quantitative and qualitative methods It will be of particular interest to students and scholars of employment relations across business and management economics political science and sociology disciplines as well as those interested in social networks Managers trade unions employers organizations and state authorities at national and international levels will find it helpful in understanding how networks shape their world

Sourcebook of Family Theories and Methods Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production

Deciphering Sociological Research Gerry Rose, 1982-06-10 Sociological research methods are a key component of teaching and courses at all levels yet courses often fail to catch light for lack of effective student books or provoke smouldering resentment from students at misplaced enthusiasm for recondite statistics Gerry Rose's new book should go a long way to remedy these problems It is a complete teaching course with a clear rationale and a distinctive approach to the topic unblemished by epistemological or prescriptive polemic Its method is to present through the analysis of twelve pieces of published research reprinted in the book the systematic deciphering of research in relation to the key issues of methodology The first nine discursive chapters discuss the main research methods topics including concepts and indicators sampling data analysis and the relationship of theory to evidence balancing the problems of quantitative data with the treatment of qualitative data and fieldwork studies The papers shortened articles from British US and Australian journals are put through the methodological hoops and systematically compared and assessed Additionally each chapter is provided with a full set of exercises and the book also includes a glossary of terms This straightforward and business like book will be welcomed by all teachers and professional sociologists and also by social researchers who are concerned with examining or preparing research reports Even authors and journal editors will find it provoking and useful

Handbook of Methods in Cultural Anthropology H. Russell Bernard, Clarence C. Gravlee, 2014-07-08 The Handbook of Methods in Cultural Anthropology now in its second edition

maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the past decade, including the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Computer-assisted Investigative Reporting

Margaret H. DeFleur, 2013-11-26. Conducting computer analyses for the purposes of revealing information of significance to the press represents an extension of one of the most important forms of American journalism into the contemporary era of new technologies. Investigative reporting had its start with the establishment of the metropolitan newspaper during the early decades of the 1900s. At the time, it was a continuation of the evolving tradition of freedom of the press that had characterized American political life since colonial times. As it developed, investigative reporting stressed facts rather than the opinions of the editor or reporter. In turn, that tradition had its own intellectual roots. Today, computer-assisted investigative reporting (CAIR) extends that marketplace of ideas into systematic examinations of the electronic records of government. In addition, computer analyses of other kinds of information systematically gathered by journalists can provide the press with insights into trends and patterns unlikely to be revealed by other means. This unique volume addresses procedures and issues in investigative journalism that have not been explained in other publications. It sets forth for the first time a detailed and specific methodology for conducting computer-assisted investigative analyses of both large and small scale electronic records of government and other agencies. That methodology consists of the logic of inquiry strategies for reaching valid conclusions and rules for reporting what has been revealed by the analyses to the public in clear ways. Such systematic methodologies are essential in social and other sciences, and the development of a counterpart for investigative journalism has been badly needed. That systematic methodology is developed within a context that explains the origin and major characteristics of those elements that have come together in American society to make computer-assisted investigative reporting both possible and increasingly a part of standard newsroom practices. These include the development of traditional investigative journalism, the evolution of computer technology, the use of computers by government to keep records, the legal evolution of freedom of information laws, the rapid adoption of computers in newsrooms, the increasing importance of precision journalism, and the sharp increase in recent times of computer-assisted investigative reporting by American newspapers, both large and small. The issues addressed in this book are discussed in a very readable context, with an abundance of examples and illustrations drawn from the real world of journalism as it is practiced daily in newsrooms around

the country Explanations of concepts principles and procedures are set forth in layperson s terms that require very little in the way of knowledge of computers or statistical methods
