In our societies, governments protect and promote civility, ensuring a certain individual or group does not impede others' rights to pursue their happiness. It is important to discern the relevance of this ideology using Mill and Hobbesian theories. These philosophers indicated ways that society should function and how people should behave to maximize happiness and obey the law. The following is an illustration of the tenets of both individuals and the proper philosophy to adopt to remain fair and impartial.

The just way to resolve the issue of placing a statue at the park should be dealt with by the City Council. They agreed for the small religious group to erect one and opened the discussion about other groups placing theirs. While the first group discerns its erection to celebrate its doctrines, the others are equally justified to place their statues. However, this would lead to clutter, impeding the park's function and limiting the freedoms of individuals who do not follow any of these religions. In this way, it would be prudent to ban all statutes as each group would be dealt with equally. The initial small religion's permission would result in clutter at the park as others would undeniably feel their rights were denied if they were limited from putting up statues. Furthermore, it is unfair to allow only well-established religions or those with large followings to erect statues while denying their smaller

Recognition and Ambivalence Heikki Ikäheimo, Kristina Lepold, Titus Stahl, 2021-07-06 Recognition is one of the most debated concepts in contemporary social and political thought Its proponents such as Axel Honneth hold that to be recognized by others is a basic human need that is central to forming an identity and the denial of recognition deprives individuals and communities of something essential for their flourishing Yet critics including Judith Butler have questioned whether recognition is implicated in structures of domination arguing that the desire to be recognized can motivate individuals to accept their assigned place in the social order by conforming to oppressive norms or obeying repressive institutions Is there a way to break this impasse Recognition and Ambivalence brings together leading scholars in social and political philosophy to develop new perspectives on recognition and its role in social life It begins with a debate between Honneth and Butler the first sustained engagement between these two major thinkers on this subject Contributions from both proponents and critics of theories of recognition further reflect upon and clarify the problems and challenges involved in theorizing the concept and its normative desirability Together they explore different routes toward a critical theory of recognition departing from wholly positive or negative views to ask whether it is an essentially ambivalent phenomenon Featuring original systematic work in the philosophy of recognition this book also provides a useful orientation to the key debates on this important topic

Public Reason and Courts Silje A. Langvatn, Mattias Kumm, Wojciech Sadurski, 2020-06-04 Public Reason and Courts is an interdisciplinary study of public reason and courts with contributions from leading scholars in legal theory political philosophy and political science The book's chapters demonstrate the breadth of ways in which public reason and public justification is currently seen as relevant for adjudicative reasoning and review practices and includes critical assessments of different ways that the idea of public reason has been applied to courts It shows that public reason is not just an abstract theoretical concept used by political philosophers but an idea that spurs new perspectives and normative frameworks also for legal scholars and judges In particular the book demonstrates the potential and the limitations of the idea of public reason as a source of legitimacy for courts in a context where many courts face political backlashes and crisis of trust
