Social Science Methods In The Legal Process:

Social Science Methods in the Legal Process Noreen L. Channels, 1985 This volume is the first to provide a systematic introduction to the methods of social science for the legal professions and decision makers in public policy fields Designed as both a text and a convenient reference the book provides an understanding of all the elements in the research process and acquaints the reader with the choices that are available in designing and conducting research A particularly useful feature is each chapter's examination of research cited in specific court or public policy decisions together with discussion of possible legal applications of various research approaches

Social Science, Social Policy, and the Law Patricia Ewick, Robert A. Kagan, Austin Sarat, 1999-06-10 Social science has been an important influence on legal thought since the legal realists of the 1930s began to argue that laws should be socially workable as well as legally valid With the expansion of legal rights in the 1960s the law and social science were bound together by an optimistic belief that legal interventions if fully informed by social science could become an effective instrument of social improvement Legal justice it was hoped could translate directly into social justice Though this optimism has receded in both disciplines social science and the law have remained intimately connected Social Science Social Policy and the Law maps out this new relationship applying social science to particular legal issues and reflecting upon the role of social science in legal thought Several case studies illustrate the way that the law is embedded within the tangled interests and incentives that drive the social world One study examines the entrepreneurialism that has shaped our systems of punishment from the colonial practice of deportation to today's privatized jails Another case shows how many of those who do not qualify for legal aid cannot afford an effective legal defense with the consequence that economic inequality leads to inequality before the law Two other studies look at the mixed results of legal regulation the failure of legal safeguards to stop NASA's fatal 1986 Challenger launch decision and the complicated effects of regulations to curb conflicts of interest in law firms These two cases demonstrate that the law's effectiveness can depend not only on how it is drafted but also on how well it harmonizes with pre-existing social norms and patterns of self-regulation The contributors to this volume share the belief that social science can and should influence legal policymaking Empirical research is necessary to offset anecdotal evidence and untested assertions But research that is acceptable to the academy may not stand up in court and as a result social science does not always get a sympathetic hearing from legal decision makers The relationship between social science and the law will always be complex this volume takes a lead in showing how it can nonetheless be productive

Literature Wesley L. Gould, Michael Barkun, 2015-03-08 This bibliography is a companion volume to *International Law and the Social Sciences*. One of the aims of the earlier work by Wesley L. Gould and Michael Barkun was to show how social science concepts could be employed in research in international law. With the support and encouragement of the American Society of International Law, they have now compiled a broad and thorough survey of social science literature of potential usefulness to students and practitioners of international law. Arranged by topics, the works cited range over political science, economics, sociology, anthropology, geography, and many interdisciplinary fields. Material on possible methodological approaches is also included. Each citation is fully and critically annotated and cross-indexed. Originally published in 1972, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Felix Kaufmann's Theory and Method in the Social Sciences Robert S. Cohen, Ingeborg K. Helling, 2014-05-19 This volume contains the English translation of Felix Kaufmann's 1895/1945 main work *Methodenlehre der Sozialwissenschaften* 1936. In this book, Kaufmann develops a general theory of knowledge of the social sciences in his role as a cross-border commuter between Husserl's phenomenology, Kelsen's pure theory of law, and the logical positivism of the Vienna Circle. This multilayered inquiry connects the value-oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology. The core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained. The empirical basis of knowledge within the social sciences forms a phenomenological concept of experience. According to Kaufmann, this concept of experience exhibits a complex structure. Within the meaning interpretation of human action as the core of knowledge in the social sciences, this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences. The book opens with a detailed and useful introduction by Ingeborg K. Helling, which introduces the historical and theoretical background of Kaufmann's study and specifically illuminates his relation to Alfred Schütz and John Dewey. Finally, it contains interviews with and letters to members of his family, colleagues, and students.

economic technology social political and legal The four developing regions are Africa Asia East Europe and Latin America The four fields of knowledge are natural science social science humanities and law A part of this book was published as International Policy Studies A Win Win Curriculum *Comparative Methods in Law, Humanities and Social Sciences* Adams, Maurice, Van Hoecke, Mark, 2021-11-19 This cutting edge book facilitates debate amongst scholars in law humanities and social sciences where comparative methodology is far less well anchored in most areas compared to other research methods It posits that these are disciplines in which comparative research is not simply a bonus but is of the essence *Public Policy Evaluation* Stuart S. Nagel, 2018-08-13 First published in 1998 this volume examines how super optimum decisions involve finding alternatives to controversies whereby Conservatives Liberals or other major groups can all come out ahead of their best initial expectations simultaneously This book is organised in terms of concepts methods causes process substance and the policy studies profession Concepts clarify that policy evaluation traditionally involves 1 Goals to be achieved 2 Alternatives available for achieving them 3 Relations between goals and alternatives 4 Drawing a conclusion as to the best alternative in light of the goals alternatives and relations and 5 Analysing how the conclusion would change if there were changes in the goals alternatives or relations Super optimizing also involves five related steps but with the following improvements 1 Goals are designed as conservative liberal or neutral 2 Alternatives get the same designations 3 Relations are simplified to indicate which alternatives are relatively high or low on each goal 4 The conclusion involves arriving at an alternative that does better on Goal A than Alternative A and simultaneously better on Goal B than Alternative B and 5 The fifth step involves analysing the super optimum or win win alternative in terms of its feasibility as to the economic technological psychological political administrative and legal matters *International Law and International Relations* Thomas J. Biersteker, Peter J. Spiro, Chandra Lekha Sriram, Veronica I. Raffo, 2006-10-19 This unique volume examines the opportunities for and initiates work in interdisciplinary research between the fields of international law and international relations disciplines that have engaged little with one another since the Second World War Written by leading experts in the fields of international law and international relations it argues that such interdisciplinary research is central to the creation of a knowledge base among IR scholars and lawyers for the effective analysis and governance of macro and micro phenomena International law is at the heart of international relations but due to challenges of codification and enforceability its apparent impact has been predominantly limited to commercial and civil arrangements International lawyers have been saying for years that law matters in international affairs and now current events are proving them right International Law and International Relations makes a powerful contribution to the theory and practice of global security by initiating a research agenda building an empirical base and offering a multidisciplinary approach that provides concrete answers to real world problems of governance This book will be of great interest to all students of international law international relations and governance *Social Science, Law and Public Policy* Stuart Nagel, Lisa Bievenue, 1992-01-27 This book provides a grand

sweep of the relations among social science law and public policy over the past 30 years The emphasis is on three stages in social science development They include establishing relationships optimizing decisions and multi criteria decision making with decision aiding software The applications are in law public policy and other substantive aspects of social science The book provides an integration of the behavioralism of the 19 60s the policy relevance of the 1970s and the software revolution of the 1980s For each time period there were important developments in the integration of law policy and social science Some of the underlying goals beneath those developments include obtaining knowledge from empirical sources useful knowledge causal explanations improved quality of life technological innovation encouragement of socially desired behavior and still higher goals
