of retirement income **The Modernization of Labour Law and Industrial Relations in a Comparative Perspective**

Silvia Spattini, 2009-01-01 Not all labour law and industrial relations scholars agree on the efficacy of the comparative approach that the analysis of measures adopted in other countries can play a constructive role in national and local policy making. However, the case deserves to be heard and no better such presentation has appeared than this remarkable book, the carefully considered work of over 40 well known authorities in the field from a wide variety of countries including Australia, France, India, Israel, Peru, Poland, and South Africa. The volume contains papers delivered at a conference sponsored by the Marco Biagi Foundation at the University of Modena and Reggio Emilia in March 2008. *Building Social Security* Xenia Scheil-Adlung, 2017-11-30 In recent years, in both the specialist press and the tabloids, the idea of privatization of social security has become a shimmering catch phrase. Politicians base election campaigns on promises of more or less privatization in social security. Many governments introduce private business management methods into their social security systems. Representatives of social security institutions and academics prepare theory papers on the possible outcomes of privatization. And international financial organizations describe doomsday scenarios based on the premise of failure to privatize. What is the role of privatization today in the development of national social security systems? How does privatization concern the developments in different social security programs such as old age, sickness, unemployment, accident insurance, and family allowances? What are the visions and effects of privatization in social security? This volume provides an overview of the various positions of supporters and opponents of privatization in the main branches of social security, followed by national experience of privatized or part privatized social security systems. While the perspective of each of the contributors is markedly different, the overall objective cuts across differences, namely to develop the most efficient and cost effective system of social security protection. The authors' views and knowledge are derived from their firsthand experiences with social security in Africa, Asia, the Americas, and Europe. Representatives of the leading international organizations dealing with social security issues, the International Labour Organization, the OECD, the World Bank, and the World Health Organization, further expand the parameters of the viewpoints and experiences expressed. This multifaceted book allows the reader to learn about the challenge of privatization in the various forms of social security by assembling a set of highly up to date, technically complex, and legal issues based on practical analysis and actual experience. It will be of interest to those concerned with national social policy in a comparative context. This is the sixth volume in an ongoing series that aims to review social security in a comparative global context. Xenia Scheil-Adlung is program manager, International Social Security Association, Geneva, Switzerland. *Social Policy Developments in Greece* Elias Mossialos, 2017-05-15 In recent years, there has been much debate surrounding the future of the welfare state in Europe, the complex factors influencing reform, and the extent to which responses to pressures on welfare could lead to irreversible systemic changes in social policy. By providing an in depth analysis of social policy developments in Greece, this work furthers understanding of welfare reform trajectories in Europe.

The authors thoroughly examine aspects of structural change challenges and responses in major policy areas of employment social security family and gender health and social care and migration Research issues central to the debate on recasting European welfare states such as structural adjustments with regard to the production organization and delivery of welfare significant changes in the financial side of social protection the role of political parties the social partners and other major social actors in influencing or resisting policy reform are at the forefront of the contributions to this volume The scope and intensity of pressures on the Greek welfare state emanating from the supranational level and the challenges linked to European integration and economic and monetary union are also of crucial importance in the analyses undertaken
