Schwartz,1993 Depression Theories and Treatments presents a thorough overview of the major issues in the study and treatment of depression In one volume it examines all the major theoretical assessment and treatment strategies and based on the most recent research offers clear explanations of the psychological biological and cultural aspects of depression Rather than favoring a particular treatment approach the authors provide a balanced presentation with research based indicators of the particular techniques or approaches to be used including medications that have proven useful A comprehensive step by step assessment guide is included Rich in cases and new findings the volume concludes with a discussion of how gender age race and socioeconomic status can be important factors in depression Technical terms are explained and minitutorials are provided throughout so that the text is understandable to all readers **Person-Environment Practice** Susan P. Kemp,James K. Whittaker,Elizabeth M. Tracy, The primary audience for Person Environment Practice is the great majority of social workers whose helping efforts extend to individuals families groups and neighborhoods Its primary aim is to examine each of these levels critically through the prism of environment and to offer practical suggestions for both assessment and intervention **Environmental Practice in the Human Services** Bernard Neugeboren,1996 Environmental Practice in the Human Services points to the need for the human services to return to their historic mission of environmental change It moves beyond the more general conceptual emphasis on person in environment toward the development of an environmental practice technology based on an intervention model which prescribes specific micro and macro roles and functions It may open the way to recapturing the conceptual breadth which characterized the first 40 years of social work as a professional and occupational entity The ecological perspective in social work has fostered an interest in the impact of social environments on service consumers Environmental Practice in the Human Services tries to rectify the historical imbalance in the human services that has emphasized people changing methods giving secondary emphasis to environmental change It

instructs students preparing for practice in the human services as well as agency practitioners in the knowledge and skills necessary in environmental practice Cases in environmental practice are used to illustrate how these skills are utilized in actual practice situations The book s scope includes practice at the direct service administration planning and social policy levels it integrates micro and macro practice and shows how these two levels of practice are interdependent This enables human service practitioners to create and or modify social environments to enhance the functioning of clients being served in human service programs Topics covered include important skills in environmental practice including decisionmaking negotiating and leadership community practice and resource coordination social support the impact of organizational environments on practice environmental practice for the chronically disabled Author Neugeboren s approach is unique in its in depth focus on environmental practice applying concepts of social environment to specific practice roles This practice specific content which provides tools needed for environmental practice is in contrast to existing texts on the social environment which are very theoretical and not integrated with practice He includes material from the field of social ecology which has not been included in existing texts It shows how practitioners and administrators planners and policymakers can facilitate and support each other s work Reading Environmental Practice in the Human Services will enlighten students and practitioners with specific skills for impacting on different social environments to enhance client benefit It tells how a direct service practitioner can determine which organizational environments are suitable for particular client needs in making agency referrals It also provides administrators with information about designing planning and managing agencies with functional organizational environments which achieve effective services
