Socialist States In The World System:

Socialist States in the World-System Christopher Chase-Dunn,1982-12 What is the role of socialist states in the capitalist world economy How do the dynamics of capitalism distort and limit national economic planning as an instrument of socialism Answers to such questions based on the world system perspective are propounded and attacked in original essays Histories of particular states including the Soviet Union Vietnam Jamaica and Eastern Europe are also examined **Global Inequalities in World-Systems Perspective** Manuela Boatca,Andrea Komlosy,Hans-Heinrich Nolte,2017-09-22 During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them **Sociological Worlds** Stephen K. Sanderson,2013-10-31 This reissue of the now classic Sociological Worlds originally published in 1995 attempts to present a comprehensive picture of human social life from the perspective of the comparative historical revolution in sociology and presents some of the best theoretical and empirical work that is now being done by comparative historical sociologists as well as work by their close cousins socio cultural anthropologists From this perspective readers gain a picture of the major ways in which human societies differ For this new library edition Professor Sanderson has provided both a new preface and three contributions that did not appear in the original edition

Handbook of Sociological Theory Jonathan H. Turner,2006-05-17 Sociology is experiencing what can only be described as hyperdifferentiation of theories there are now many approaches competing for attention in the intellectual arena From this perspective we should see a weeding out of theories to a small number but this is not likely to occur because each of the many theoretical perspectives has a resource base of adherents As a result theories in sociology do not compete head on with each other as much as they coexist This seminal reference work was brought together with an eye to capturing the diversity of theoretical activity in sociology specifically the forefront of theory Contributors describe what they themselves are doing

right now rather than what others have done in the past The goal of this volume is to allow prominent theorists working in a variety of traditions who wouldn't usually come together to review their work The chapters in this volume represent a mix of theoretical orientations and strategies but these theories are diverse and represent the prominent theoretical discussions in sociology today Some areas included are Section I Theoretical Methodologies and Strategies Section II The Cultural Turn in Sociological Theorizing Section III Theorizing Interaction Processes Section IV Theorizing from the Systemic and Macrolevel Section V New Directions in Evolutionary Theorizing Section VI Theorizing on Power Conflict and Change Section VII Theorizing from Assumptions of Rationality This handbook will be of interest to those wanting a broad spectrum and overview of late 20th early 21st century sociological theory [The Spiral of Capitalism and Socialism](#) Terry Boswell, Christopher K. Chase-Dunn, 2000 At the core of this book is the argument that though the word socialism is widely held in disdain in the current discourse about the world's past and its future the idea of socialism as collective rationality and popular democracy is far from dead **Elites and Classes in the Transformation of State Socialism** David Lane, 2017-09-08 The year 2011 marks the twentieth anniversary of the end of the Soviet Union This may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models The transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections Others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites Which is the more accurate assessment David Lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to capitalism He focuses on two main approaches in this volume elite theories and social class Theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system transfer in which elites craft democratic and market institutions into the space left by state socialism Lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states While recognizing that elites can play important roles and have the capacity to transform societies Lane contends that elite theories alone are inadequate to explain a system change that brings free markets In contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class **The External Relations of the Council for Mutual Economic Assistance** Arie Bloed, 2023-10-20 [The European Union and Global Social Change](#) József Böröcz, 2009-09-10 This book examines just what the European Union is in the context of the ongoing structural transformation of the global system The author develops an integrated approach to global transformations drawing on geopolitics political geography international relations economics economic and political history political economy and macro sociology to discuss how this supra state organisation that shares and pools the sovereignty of some of the wealthiest states of the modern world makes sense The book Interprets the ongoing transformation of west European public authority in the

context of the global geopolitical economy of competition cooperation and conflict Examines the consequences of west European integration for the global system in a longue dur e perspective developing a new geopolitical dialect within world systems analysis sharpening some of the conceptual tools developed by its paradigm setters Develops a new conceptualization for the EU s global geopolitical strategy which the author describes this strategy as the elasticity of size Developing a deeper understanding of global social change and west European strategies of global advantage maintenance and power management this book will be of interest to students and scholars of European Politics International Politics International Relations Theory and Globalization Studies *The Language of Global Development* Marcin Solarz,2014-07-11 Terms such as Third World developing countries and Global South are ubiquitous in the discipline of development studies but they are often poorly defined ideologically weighted and misleading Taking an intellectual history approach this book examines the most commonly used spatial terms in the language of development tracing their origins meanings evolution and processes of popularisation and demonstrating how geographical political and economic concepts were used or misused in creating these terms The book looks at the origins and the changing nature of fundamental development divisions from prehistoric times to the present day and analyses the process of conceptualising the contemporary North South divide focusing especially on the start of spatial development terminology in the twentieth century It uses detailed maps to assist the reader in visualising the geographical complexities of these spatial terms and discusses more recently developed terms such as emerging markets and BRIC which are key to understanding the modern world This book provides a valuable resource for students and researchers in development studies international relations geography sociology and anthropology as well as practitioners in the field of development SSR International Economic Relations United States. Department Releases Soviet Union. Posol'stvo (U.S.),1958 **Russia and the Right to Self-determination in the Post-Soviet Space** Johannes Socher,2021 This book shows that Russia has a distinct approach to the right to self determination that sets it apart from Western States and from Soviet state practice Drawing on analysis of seven secessionist conflicts and a detailed study of Russian sources it traces how Russian engagement with self determination has changed over the past three decades Capitalism on Trial Jeannette Wicks-Lim,Robert Pollin,2013-01-01 This volume presents a collection of essays honoring Professor Thomas E Weisskopf one of the most prominent contributors to the field of radical economics Beginning his academic career at Harvard before moving to the University of Michigan at Ann Arbor Professor Weisskopf has spent the past forty years exploring through highly innovative and rigorous research the questions of economic equality social justice and environmental responsibility The chapters in this book reflect the main subjects of Professor Weisskopf s work and seek to foster continued innovation in these research areas The diverse contributions to this volume explore the impressive range of Professor Weisskopf s research themes These include the economics of developing

countries US imperialism Marxian crisis theory contemporary economic history and institutional development affirmative action policies and the potential of socialism as an alternative to capitalism for developing non exploitative societies In addition to 26 chapters by leading economists this book also includes a chapter by Professor Weisskopf himself in which he reflects on his own career in economics as well as the state of the U S and global economies The volume also includes a full bibliography listing Professor Weisskopf s publications Students professors and researchers working in any branch of economics will find much of interest in this set of wide ranging studies building from the themes advanced by Thomas Weisskopf

Beyond Realism and Marxism A. Linklater,1990-02-06 This book discusses the challenge to realism which proponents of international political economy and critical theory have mounted in the last few years and examines the changing relationship between realism and Marxism It is aimed at students of approaches to international relations **The**

Changing Geopolitics of Eastern Europe Dr A H Dawson,Rick Fawn,2013-11-05 This work covers the uncertain geopolitical situation of some countries of Central and Eastern Europe including some of those which are hoping to enter the European Union in the near future some for which entry is far off and some which may never seek or be eligible for membership

The Practice of Global History Matthias Middell,2019-08-22 Over recent decades almost every area of historical study has seen its global turn from consumption to finance from politics to migration from social order to cultural patterns This volume reflects the vibrant state of global history scholarship in Europe and examines to what extent global history is practiced and conceptualised distinctively within Europe Drawing together contributions from scholars from France Germany Hungary the Netherlands Switzerland and the UK the book offers a sweeping overview of the state of the field In particular the contributors look at histories of colonialism and imperial expansion knowledge circulation and mobility across borders This book reflects the diversity of current scholarship on global and transnational history and will offer important insights for anyone interested in understanding the cutting edge of research in this area

China and the 21st Century Crisis Minqi Li,2015-10-20 The USA is widely seen as the country at the centre of the recent economic crash But will this be the case the next time the system goes into shock This book analyses how the political and economic imbalances in China will exacerbate system collapse and how this could happen much sooner than we imagine possibly within a decade By looking at the big questions of class struggle global economic imbalances peak oil climate change and political power play Minqi Li argues that by the time of the next crisis China will be at the epicentre of these contradictions China is the last large region and source of cheap labour into which capital could expand the system is at its limits By combining this argument with issues surrounding the planet s ecological limits and the internal politics of the Chinese Communist Party Li commands a narrative of China at a pivotal and possibly apocalyptic stage

Problems of Communism ,1960 *An Introduction To The World-system Perspective* Thomas R Shannon,2018-02-20 This book takes into account the dramatic changes associated with the collapse of the Soviet Union the end of the Cold War and significant developments in the semi periphery and periphery It

addresses some of the issues that have come to prominence in the world system literature since 1989
