Psychosocial and Cultural Determinants of Population Policy Hal Hellman, 1975 **The Genesis of Geopolitics and Friedrich Ratzel** Alexandros Stogiannos, 2018-10-29 This book discusses the influence of Friedrich Ratzel's ideas in more contemporary geopolitical analytical systems and the geodeterminism commonly attributed to him. The author thoroughly analyzes the structural components of Ratzel's thought. The research is inspired by the numerous contradictory approaches in the secondary literature presenting Ratzel as both humanist and racist geo determinist and multidimensional analyst organicist and social scientist precursor of Geopolitics and opponent to the same idea. In this work more particular issues are approached: the establishment of a scientific Political Geography, the methodological approach of his multidisciplinary work, the redefinition of his geopolitical period, his notion of state and the evaluation of sociological and cultural parameters as factors of state power, the biogeographical content of the notion of Lebensraum, his attitude towards the racist theories as well as towards the Darwinian theories, his overall worldview and the confrontation with cosmopolitanism, his contribution to an interdisciplinary positivist and scientific approach in analyzing social and international affairs, his thoughts on the architecture of Europe. The book will be useful for researchers and students in many scientific fields such as International Relations, Geopolitics, Geography and History of Geography.

Cultural Perspectives on Reproductive Health Carla Makhoul

Obermeyer, 2001-08-23 This volume brings together studies carried out in a variety of contexts to explore the relevance of the notion of reproductive health and the role of culture in shaping its diverse manifestations. The perspective that guides the collection is informed by anthropological and sociological research on the body, pluralism and medicalization and by recent debates regarding women's health and the need to reconcile global agendas and local conditions. The fourteen chapters provide views of how reproductive health is viewed by women and men in different parts of the world, mainly at the level of local communities in India, Egypt, Mexico, Kenya and South Africa, but also in centres of power in China and Iran and in modern and post-modern settings of the North and Far East. The methodological approaches used by authors are varied but all share a concern with the perceptions, decisions and rationalizations that surround health and reproduction. A central theme is the correspondence between professional and lay models of reproductive health and some chapters explicitly seek to uncover the logic of practices that appear irrational from a biomedical point of view. By analysing behaviour from the perspective of the actors themselves, they show the relevance of local notions for understanding the factors that constitute risks for reproductive ill health, including conditions of material deprivation, constraints in seeking care and inappropriate use of therapies and technologies. *Cultural Perspectives on Reproductive Health* illustrates complex processes of negotiation, adaptation and manipulation in the formulation of ideas and policies related to reproductive health through analyses of such topics as the state's discourse on population, religious constraints on abortion care, professional and legal policies on reproductive technologies, health professionals' response to violence and the dilemmas that emerge from the new diagnostic and genetic techniques. It also invites reflection on the societal construction of rights across cultures and on the place of cultural explanations in analyses of reproductive health.

Culture and Educational Policy in Hawai'i Maenette K.P. A

Benham, Ronald H. Heck, 2013-10-18 This comprehensive educational history of public schools in Hawai'i shows and analyzes how dominant cultural and educational policy have affected the education experiences of Native Hawaiians. Drawing on institutional theory as a scholarly lens, the authors focus on four historical cases representing over 150 years of contact with the West. They carefully link historical events, significant people, educational policy and law to cultural and social consequences for Native Hawaiian children and youth. The authors argue that since the early 1800s, educational policy in Hawai'i, emphasizing efficiency, has resulted in institutional structures that have degenerated Hawaiian culture, self-image and sovereignty. Native Hawaiians have often been denied equal access to quality schools, and resulting increased economic and social status. These policies were often overtly or covertly racist and reflected wider cultural views prevalent across the United States regarding the assimilation of groups into the American mainstream culture. The case of education in Hawai'i is used to initiate a broader discussion of similar historical trends in assimilating children of different backgrounds into the American system of education. The scholarly analysis presented in this book draws out historical, political, cultural and

organizational implications that can be employed to understand other Native and non Native contexts Given the increasing cultural diversity of the United States and the perceived failure of the American educational system in light of these changes this book provides an exceptionally appropriate starting point to begin a discussion about past present and future schooling for our nation s children Because it is written and comes from a Native perspective the value of the insider view is illuminated This underlying reminder of the Native eye is woven throughout the book in Ha awina No ono o the sharing of thoughts from the Native Hawaiian author With its primary focus on the education of native groups this book is an extraordinary and useful work for scholars thoughtful practitioners policymakers and those interested in Hawai i Hawaiian education and educational policy and theory *The Institutional Dynamics of Culture, Volumes I and II* Perri Six,2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory s influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences *The New Yugoslav Woman* Branka Bogdan,2025-09-30 From 1945 to 1989 the Yugoslav state connected its claims of progressive politics and gender equality to its support of free healthcare sex education and contraception and laws that supported reproductive choice Yugoslav men and women internalized these messages proclaiming their homeland s superior care for its citizens in comparison to postwar Europe and the United States Even as Yugoslav women faced stigma and abuse for their usage of contraceptives and medical practitioners grappled with new regulations and technology alongside personal ideologies Yugoslavs celebrated their own reformation into new politically minded citizens who carefully navigated tradition and modernity as they reconstructed the nation The New Yugoslav Woman provides a social and cultural history of how Yugoslav communists used reproductive regulation to build a platform of socialism through self management and to position the country as a conduit between the global North and South Author Branka Bogdan traces reproduction as a central facet of socialist Yugoslavia s state formation through the nation s laws medical infrastructure technological growth and state run sex education programs Bringing this history to the present day with a discussion of more than two dozen interviews with Yugoslav patients and medical professionals Bogdan reveals how these recollections show key continuities with the past rather than an abrupt break between the socialist and post socialist worlds Drawing Yugoslavian women s experiences into the geopolitical history of reproduction and the Cold War era state The New Yugoslav Woman reveals the centrality of reproduction contraception and abortion to socialist Yugoslavia s self conception as the developed leader of the developing world **Culture, Health, and**
