Global Depopulation and Redistribution by 2050 A.D. Prithvish Nag, Amrita Paul, 2024-03-25 Until recently the world has been preoccupied with over population pressure on resources alarming growth rates fertility and unemployment Issues like reduction in population

growth rate increasing longevity the greying population reducing fertility rates and overall depopulation have not been considered seriously Depopulation has led to redistribution Further the world economy forces women to choose between career and child COVID 19 has further aggravated the situation It appears that population processes are smooth with no major upheavals But if we delve deeper we will find undercurrents happening concurrently which contribute towards population composition These undercurrents have been swift and cannot be captured by decadal censuses Hence one has to depend on alternative sources Surprisingly the electronic media has become quite sensitive to population issues In this book an attempt has been made to understand these issues differently Natural Hazards Analysis John Pine, 2008-10-22

Emphasizes Resilient Policies Rather Than Rigid Philosophy Economic and environmental consequences of natural and man made disasters have grown exponentially during the past few decades Whether from hurricanes chemical spills terrorist incidents or other catastrophes the negative impacts can often be felt on a global scale Natural Hazards Analysis John Pine, 2008-10-22

To Take Place Jonathan Z. Smith, 1987 In this broad ranging inquiry into ritual and its relation to place Jonathan Z Smith prepares the way for a new approach to the comparative study of religion Smith stresses the importance of place in particular constructed ritual environments to a proper understanding of the ways in which empty actions become rituals He structures his argument around the territories of the Tjilpa aborigines in Australia and two sites in Jerusalem the temple envisioned by Ezekiel and the Church of the Holy Sepulchre The first of these locales the focus of one of the more important contemporary theories of religious ritual allows Smith to raise questions concerning the enterprise of comparison His close examination of Eliade's influential interpretation of the Tjilpa tradition leads to a powerful critique of the approach to religion myth and ritual that begins with cosmology and the category of The Sacred In substance and in method **To Take Place** represents a significant advance toward a theory of ritual It is of great value not only to historians of religion and students of ritual but to all whether social scientists or humanists who are concerned with the nature of place This book is extraordinarily stimulating in prompting one to think about the ways in which space or place is perceived marked and utilized religiously A provocative example of the application of humanistic geography to our understanding of what takes place in religion Dale Goldsmith Interpretation
