The Philosophy and Common Sense Reader Markar Melkonian,2020-01-09 What might common sense be Is it a mental capacity Or does it consist of just truisms and precepts If the latter is the case is this knowledge innate or empirical Or is it like human nature a term that has played its role in rhetoric but that does not appear to have a definite agreed upon meaning Indeed we can learn a great deal about some of the most influential modern philosophers from the Enlightenment to Ludwig Wittgenstein and W V O Quine by examining what they have to say about common sense whilst the anthropologist Clifford Geertz observed that common sense has become a central category almost the central category in a wide range of modern philosophical systems This book investigates the nature of common sense through a selection of key writings on epistemology the philosophy of science the philosophy of religion meta ethics and the philosophy of economics and political philosophy The authors included are representative of the Scottish School such as

David Hume the Ordinary Language School and members of the Analytic tradition including Karl Popper but they also incorporate thinkers like John Dewey from the American pragmatist tradition the Italian Marxist Antonio Gramsci recent popular writers on economics and even pamphleteers from Thomas Paine to contemporary engaged journalists This is the first reader to provide such a comprehensive overview of the central writings on common sense It features review questions and further reading lists at the end of each section **John Oman and His Doctrine of God** Stephen Bevans,1992-05-21

Conceiving God: The Cognitive Origin and Evolution of Religion

David Lewis-Williams, 2010-03-01 A controversial exploration of the origin of religion in the neurology of the human brain In this book the noted cognitive archaeologist David Lewis Williams confronts a question that troubles many people in the world today Is there a supernatural realm that intervenes in the material world of daily life and leads to the evolution of religions Professor Lewis Williams first describes how science developed within the cocoon of religion and then shows how the natural functioning of the human brain creates experiences that can lead to belief in a supernatural realm beings and interventions Once people have these experiences they formulate beliefs about them and thus creeds are born Forty thousand years ago people were leaving traces in the archaeological record of activities that we can label religious and Lewis Williams discusses in detail the evidence preserved in the Volp Caves in France He also shows that mental imagery produced by the functioning of the human brain can be detected in widely separated religious communities such as Hildegard of Bingen s in medieval Europe or the San hunters of southern Africa

Balzer, 2021-11-30 The power of darkness remains notably present in our world The ministries of healing and deliverance have always been intended to function as primary signs of Christ s advancing Kingdom of Light Yet why were they so prolific during the time of Christ and the Early Church but distant today How might we reclaim these while avoiding the ditches that harmed the church in the past How might we re establish healing and deliverance as critical facets to disciple making Balzer leads you on this exploratory journey considering the foundation of scripture history and evidence based research Numerous recommendations are given to forming these expressions in a healthy balanced and reproducible manner Jesus desires to light up the dark
