Sound Of Voices:

Voices in Revolution John A. Crespi, 2009-07-29 China's century of revolutionary change has been heard as much as seen and nowhere is this more evident than in an auditory history of the modern Chinese poem From Lu Xun's seminal writings on literature to a recitation renaissance in urban centers today poetics meets politics in the sounding voice of poetry Supported throughout by vivid narration and accessible analysis *Voices in Revolution* offers a literary history of modern China that makes the case for the importance of the auditory dimension of poetry in national revolutionary and postsocialist culture Crespi brings the past to life by first examining the ideological changes to poetic voice during China's early twentieth century transition from empire to nation He then traces the emergence of the spoken poem from the May Fourth period to the present including its mobilization during the Anti Japanese War its incorporation into the student protest repertoire during China's civil war its role as a conflicted voice of Mao era revolutionary passion and finally its current adaptation to the cultural life of China's party guided market economy *Voices in Revolution* alters the way we read by moving poems off the page and into the real time and space of literary activity To all readers it offers an accessible yet conceptually fresh and often dramatic narration of China's modern literary experience Specialists will appreciate the book's inclusion of noncanonical texts as well as its innovative interdisciplinary approach

Sound and the Ancient Senses Shane Butler, Sarah Nooter, 2018-10-03 Sound leaves no ruins and no residues even though it is experienced constantly It is ubiquitous but fleeting Even silence has sound even absence resonates *Sound and the Ancient Senses* aims to hear the lost sounds of antiquity from the sounds of the human body to those of the gods from the bathhouse to the Forum from the chirp of a cicada to the music of the spheres Sound plays so great a role in shaping our environments as to make it a crucial sounding board for thinking about space and ecology emotions and experience mortality and the divine orality and textuality and the self and its connection to others From antiquity to the present day poets and philosophers have strained to hear the ways that sounds structure our world and identities This volume looks at theories and practices of hearing and producing sounds in ritual contexts medicine mourning music poetry drama erotics philosophy rhetoric linguistics vocality and on the page and shows how ancient ideas of sound still shape how and what we hear today As the first comprehensive introduction to the soundscapes of antiquity this volume makes a significant contribution to the burgeoning fields of sound and voice studies and is the final volume of the series *The Senses in Antiquity*

Voice as Art Richard Couzins, 2022-04-28 *Voice as Art* considers how artists have used human voices since they became reproducible and entered art discourse in the twentieth century The discussion embeds artworks using voices within historical and theoretical contexts in a comparative overview arguing that reproduction caused increased creativity moving from acting to creating phonic materials framed by phenomenological deep listening by early video and performance to the plurality and sampling of postmodernism and the multiple angles of contemporary forensic listening This change is an example of how artistic practice reveals the ideologies of listening Using a

range of examples from Hugo Ball Martha Rosler Vito Acconci Bruce Nauman Janet Cardiff and Mike Kelley through to contemporary practice by Shilpa Gupta The Otolith Group and Elizabeth Price the voice is tracked through modernism and postmodernism to posthumanism in relation to speaking subjects sculptural objects documents dramaturgical utterance forensic evidence verbatim techniques and embodied listening This book gives artists researchers and art audiences ways to understand how voices exist in between theoretical discourses and how with their utterances artists create new dispositions in space by reworking genres to critique cultural form and meaning This book will be of great interest to students and practitioners of sound art visual culture and theatre and performance

Training Actors' Voices Tara

McAllister-Viel, 2018-08-06 Contemporary actor training in the US and UK has become increasingly multicultural and multilingual Border crossing cross cultural exchange in contemporary theatre practices and the rise of the intercultural actor has meant that actor training today has been shaped by multiple modes of training and differing worldviews How might mainstream Anglo American voice training for actors address the needs of students who bring multiple worldviews into the training studio When several vocal training traditions are learned simultaneously how does this shift the way actors think talk and perform How does this change the way actors understand what a voice is What it can should do How it can should do it Using adaptations of a traditional Korean vocal art p ansori with adaptations of the natural or free voice approach Tara McAllister Viel offers an alternative approach to training actors voices by re considering the materials of training breath sound presence and text This work contributes to ongoing discussions about the future of voice pedagogy in theatre for those practitioners and scholars interested in performance studies ethnomusicology voice studies and intercultural theories and practices

White,1927 Voice and the Victorian Storyteller Ivan Kreilkamp,2005-11-03 The nineteenth century novel has always been regarded as a literary form pre eminently occupied with the written word but Ivan Kreilkamp shows it was deeply marked by and engaged with vocal performances and the preservation and representation of speech He offers a detailed account of the many ways Victorian literature and culture represented the human voice from political speeches governesses tales shorthand manuals and staged authorial performances in the early and mid century to mechanically reproducible voice at the end of the century Through readings of Charlotte Brontë Browning Carlyle Conrad Dickens Disraeli and Gaskell Kreilkamp re evaluates critical

assumptions about the cultural meanings of storytelling and shows that the figure of the oral storyteller rather than disappearing among readers preference for printed texts persisted as a character and a function within the novel This 2005 study will change the way readers consider the Victorian novel and its many ways of telling stories The Healing Power of Sound Mitchell L. Gaynor, M.D.,2002-08-13 A guide to the surprising benefits of music on your mind spirit and body complete with sound based breathing and meditation exercises Since 1991 Dr Mitchell Gaynor has been achieving remarkable results by integrating music vocalization breathing and meditation techniques in his work with patients In The Healing Power of Sound he presents his sound based techniques for self healing techniques that anyone can use whether faced with a life threatening disease or simply seeking relief from the stresses of daily life Numerous studies have demonstrated the health benefits of music it can lower blood pressure and heart and respiratory rates reduce cardiac complications increase the immune response and boost our natural opiates Gaynor shows how when integrated as part of a mind body spirit approach to wellness music can play a significant part in maintaining a healthy lifestyle or in healing serious disease The Healing Power of Sound includes twelve exercises involving breathing meditation and toning using pure vocal sound to resolve tension release emotion and spur the healing process that can be used by anyone to improve health and quality of life **Electricity**,1924 Exposing Prejudice Bonnie Urciuoli,2013-06-13 Urciuolis award winning book explores how language and the social construction of race class and ethnicity shape the lives of working class Puerto Ricans living in New York City Her reflexive ethnographic study is a combination of two absorbing features her analyses of language and power relations based on key principles in semiotic and linguistic anthropology paired with the authentic voices of individuals who share their lived experiences of speaking Spanish and English The subjects conversations interview responses and anecdotes are saturated with ideas about what correct English means to them Through these extended transcripts readers gain insight about languages role in cultural dynamics that tangle minority populations in challenges such as limiting where individuals and families live and work Urciuolis provocative research and fieldwork give readers a rich understanding of language as the domain in which racial ethnic and class hierarchies are experienced *Sensing Sound* Nina Sun Eidsheim,2015-11-19 In *Sensing Sound* Nina Sun Eidsheim offers a vibrational theory of music that radically re envisions how we think about sound music and listening Eidsheim shows how sound music and listening are dynamic and contextually dependent rather than being fixed knowable and constant She uses twenty first century operas by Juliana Snapper Meredith Monk Christopher Cerrone and Alba Triana as case studies to challenge common assumptions about sound such as air being the default medium through which it travels and to demonstrate the importance a performance s location and reception play in its contingency By theorizing the voice as an object of knowledge and rejecting the notion of an a priori definition of sound Eidsheim releases the voice from a constraining set of fixed concepts and meanings In Eidsheim s theory music consists of aural tactile spatial physical material and vibrational sensations This expanded definition of music as manifested through material and personal

relations suggests that we are all connected to each other in and through sound Sensing Sound will appeal to readers interested in sound studies new musicology contemporary opera and performance studies **VOICE** Norie Neumark, Ross Gibson, Theo Van Leeuwen, 2023-12-05 Perspectives on the voice and technology from discussions of voice mail and podcasts to reflections on dance and sound poetry Voice has returned to both theoretical and artistic agendas In the digital era techniques and technologies of voice have provoked insistent questioning of the distinction between the human voice and the voice of the machine between genuine and synthetic affect between the uniqueness of an individual voice and the social and cultural forces that shape it This volume offers interdisciplinary perspectives on these topics from history philosophy cultural theory film dance poetry media arts and computer games Many chapters demonstrate Lewis Mumford s idea of the cultural preparation that precedes technological innovation that socially important new technologies are foreshadowed in philosophy the arts and everyday pastimes Chapters cover such technologies as voice mail podcasting and digital approximations of the human voice A number of authors explore the performance performativity and authenticity or authenticity effect of voice in dance poetry film and media arts while others examine more immaterial concerns the voice s often invoked magical powers the ghostliness of disembodied voices and posthuman vocalization The chapters evoke an often paradoxical reassertion of the human in the use of voice in mainstream media including recorded music films and computer games Contributors Mark Amerika Isabelle Arvers Giselle Beiguelman Philip Brophy Ross Gibson Brandon LaBelle Thomas Levin Helen Macallan Virginia Madsen Meredith Morse Norie Neumark Andrew Plain John Potts Theresa M Senft Nermin Saybasili Amanda Stewart Axel Stockburger Michael Taussig Martin Thomas Theo van Leeuwen Mark Wood **Adams' New Musical Dictionary of Fifteen Thousand Technical Words, Phrases, Abbreviations, Initials, and Signs Employed in Musical and Rhythmical Art and Science, in Nearly Fifty Ancient and Modern Languages** John Stowell Adams, 1865
