American magical Men's Journal and a dazzling tour de force Christian Science Monitor Ellis's new book a fascinating tour through the world of the sperm whale will surely inspire more such praise for the author heralded by Publisher Weekly as America's foremost writer on marine research. Written with Ellis's deep knowledge and trademark passion, verve and wit and illustrated with a wide array of images including his own signature artwork, his study covers the full spectrum of the sperm whale's existence from its prehistoric past to its current endangered existence. Ellis, as no one else can, illuminates the iconic impact of *Physeter macrocephalus*, the big-headed blower, on our history, environment and culture, with a substantial nod to Herman Melville and *Moby Dick*, the great novel that put the sperm whale and whaling on the literary map. Ranging far and wide, Ellis covers the sperm whale's evolution, ecology, biology, anatomy, behavior, social organization, intelligence, communications, migrations, diet and breeding. He also devotes considerable space to the whale's hunting prowess, including its clashes with the giant squid and to the history of the whaling industry that decimated its numbers during the last two centuries. He even includes a story about a beached juvenile he helped rescue, an event that provided scientists with one of their first opportunities to observe a sperm whale in the water and up close. Offering a rich tapestry for anyone with an interest in the marvels of ocean life, Ellis's book provides an indispensable guide to the life and times of one of the planet's most intelligent, elusive and endangered species.

Sperm Whales Gaelin Rosenwaks, 2022-11-15
For centuries we have been fascinated by the sperm whale, the world's largest toothed predator. Now you can experience an intimate underwater journey to connect with these majestic and gentle goliaths. Inspired by a life-changing childhood experience, Gaelin Rosenwaks set off on a journey to tell the story of sperm whale families through photography and film. In the waters off Dominica, she observed eye to eye the close bond between mother and child firsthand. What she found is that these animals live in matriarchal family units made up of remarkable females that stay together for generations. Like elephants and humans, they take care of one another. Rosenwaks's years as a marine biologist, diver and underwater filmmaker and photographer prepared her to tell this beautifully stirring story with never-before-seen photographs of the world's most marvelous ocean species.
