Snow, Ice and Other Wonders of Water Ivar Olovsson, 2016 The book illustrates the fascinating world of the different forms of water from ice and snow to liquid water The water molecule H_2O is the second most common molecule in the Universe behind hydrogen H_2 and ice is the most abundant solid material Snow and ice appear in a countless large number of different shapes and with properties which can be quite different Detailed knowledge of the properties of snow is of great importance for the Sami people involved in reindeer herding and several hundred names are used to characterize the different types The properties of ice and liquid water are very special and unique in several respects In contrast to most other substances the density of ice is lower than that of liquid water which has many very important consequences in our daily life Water plays a unique role in chemistry and although tremendous research has been spent on this seemingly simple substance there are still many unsolved questions about the structure of liquid water The special properties of water are due to hydrogen bonding between the H_2O molecules and this book may be seen as a tribute to the hydrogen bond The general properties of the hydrogen bond are treated in three separate papers The hydrogen bond is of fundamental importance in biological systems since all living matter has evolved from and exists in an aqueous environment and hydrogen bonds are involved in most biological processes There is a hundred times more water molecules in our bodies than the sum of all the other molecules put together Provided by publisher

compendium of wintry delights **The Sword of Ponsonby** David Mosey, 2005-10-14 As head of the Guild of the Black Mages Guildmaster Ponsoby knows that you have to move with the times and that's what he's trying to do. He's opened negotiations with Titus Handcarte the First Speaker of East Castellian and not only has he won two enormously profitable research contracts but also has got Handcarte to repeal the age old prohibition that barred occult professionals from practising in East Castellian. So everything in the garden should be lovely. And it would be except for Montmorency Mage. Montmorency the most expert and powerful of the Black Mages is dead set against Ponsonby's plan. But to the creative manager such opposition is an opportunity not a problem. With the enthusiastic support of his other colleagues Ponsonby binds Montorency imprisons him behind countless tons of solid rock. So now everything in the garden is lovely. Well not exactly. Just as the rock closed about him Montmorency managed to get a message off to Mission Implausible the scruffiest bunch of anarchical heroes ever to disgrace the pages of a fantasy novel. Never mind their addiction to beer and gratuitous violence. Never mind their cavalier attitude to property that isn't bolted down. And never mind the fact that Andrew Cruickshank their mercurial magic user combines the reliability of the weather forecast with the destructive potential of Chernobyl. The big question is whether Mission Implausible can get their production of Blood on the Rooftops Blood on the Tiles into workable shape by opening night. And get the Guild of the Black Mages sorted out too of course. Ponsonby doesn't know anything about their play but he does know Cruickshank and his band of hooligans are on the way and so does Titus Handcarte. Ponsonby can call upon the awesome occult forces of the Guild and Handcarte has at his beck and call the economic and military might of East Castellian so they're confident. Playing at home they should be able to send Mission Implausible down to a four nil defeat at the very least. But there are a number of things they've left out of their calculations. They haven't reckoned on the power of an aroused student body. They haven't understood the influence of thousands of years of theatrical tradition. They haven't the faintest idea of just how implacably devious disruptive and destructive Mission Implausible can be. And they've totally neglected air defence. Mission Implausible doesn't bother with calculation. When they're not in rehearsals or instigating disgraceful scenes at disreputable taverns they get to work fomenting student unrest and bombarding the Guild precincts with surplus theatrical equipment while Andrew Cruickshank infiltrates the Guild itself in search of Montmorency. All the ingredients are there for one of the most shambolic episodes ever to be expunged from Guild records.
