**Globalization Studies: Theories, Research & Teaching** Leonid Grinin, Ilya Ilyin, Andrey Korotayev, 2013-09-30 This is the second issue of the new series titled Globalistics and Globalization Studies Globalistics may be regarded as a sort of systemic and more or less integrated core within Global Studies At present Global Studies function in two main dimensions in the research of global political economic cultural and social processes on the one hand and in the realm of teaching manifesting themselves in the creation of various Global Studies programs and courses for university students who learn to see the world in its entirety and variety The second dimension is immensely important as the contents of such programs and courses may determine how the world will be comprehended by those people who may decide its fate in a decade or two This dualistic nature of Global Studies has determined the general direction of our anthology that comprises both the theoretical dimension of Global Studies and their application to the teaching process The anthology consists of three parts presenting a wide range of views on the meaning of the contemporary epoch the past and the future of some important global processes as well as the problems and successes in the teaching process of Global Studies Part 1 Globalization in Historical Retrospective Part 2 Globalistics Global Studies and Global Processes Part 3 Teaching Global Studies In the present anthology one can find perceptions of globalization by a number of famous scholars from different countries of the world Ervin Laszlo Christopher Chase Dunn and others but one can also get to know rather peculiar visions of globalization by Russian scientists and educators **World Culture, EPZ Edition** Frank J. *Unequal Europe* Jason Beckfield, 2019-02-18 The Euro crisis of 2009 2012 vividly demonstrated that European Union policies matter for the distribution of resources within and between European nation states Throughout the crisis distributive conflicts between the EU s winners and losers worsened and are still reverberating in European politics today In *Unequal Europe* Jason Beckfield demonstrates that there is a direct connection between European integration and the increase in European income inequality over the past four decades He places the recent crisis into a broader sociological political and economic perspective by analyzing how European integration has reshaped the distribution of income across the households of Europe Using individual and household level income survey data combined with macro level data on social policies and case studies of welfare reforms in EU and non EU states Beckfield shows how European integration has re stratified Europe by simultaneously drawing national economies closer together and increasing inequality among households Explaining how where and why income inequality has changed in the EU *Unequal Europe* answers the question who wins and who loses from European integration
