The Religious Magazine; Or, Spirit of the Foreign Theological Journals and Reviews, 1828

A Republic of Mind and Spirit Catherine L. Albanese, 2007-01-01

In the nineteenth and early twentieth centuries, Mexicans and Americans joined together to transform the U.S.-Mexico borderlands into a crossroads of modern economic development. This book reveals the forgotten story of their ambitious dreams and their ultimate failure to control this fugitive terrain. Focusing on a mining region that spilled across the Arizona-Sonora border, this book shows how entrepreneurs, corporations, and statesmen tried to domesticate nature and society within a transnational context. Efforts to tame a wild frontier were stymied by labour struggles, social conflict, and revolution.

Fugitive Landscapes explores the making and unmaking of the U.S.-Mexico border, telling how ordinary people resisted the domination of empires, nations, and corporations to shape transnational history on their own terms. By moving beyond traditional national narratives, it offers new lessons for our own border-crossing age.

Spirit Varnishes and Spirit Varnish Materials John Geddes M'Intosh, 1911

The Sierra High Route Steve Roper, 1997

No ordinary guidebook, *Sierra High Route* leads you from point to point through a spectacular 195-mile timberline route in California's High Sierra. The route follows a general direction but no particular trail, thus causing little or no impact and allowing hikers to experience the beautiful sub-alpine region of the High Sierra in a unique way.

The Natural West Dan Louie Flores, 2001

The Natural West offers essays reflecting the natural history of the American West as written by one of its most respected environmental historians. Developing a provocative theme, Dan Flores asserts that Western environmental history cannot be explained by examining place, culture, or policy alone but should be understood within the context of a universal human nature. *The Natural West* entertains the notion that we all have a biological nature that helps explain some of our attitudes towards the environment. Flores also explains the ways in which various cultures, including the Comanches, New Mexico Hispanos, Mormons, Texans, and Montanans, interact with the environment of the West. Gracefully moving between the personal and the objective, Flores intersperses his writings with literature, scientific theory, and personal reflection. The topics cover a wide range from historical human nature regarding animals and exploration to the environmental histories of particular Western bioregions and finally to Western restoration as the great environmental theme of the twenty-first century.
