## **Spirit Of Place Bce Place:**

Spirits of the Place John Clifford Holt, 2009-07-29 *Spirits of the Place* is a rare and timely contribution to our understanding of religious culture in Laos and Southeast Asia. Most often studied as a part of Thai, Vietnamese, or Khmer history, Laos remains a terra incognita to most Westerners and to many of the people living throughout Asia as well. John Holt's new book brings this fascinating nation into focus. With its overview of Lao Buddhism and analysis of how shifting political power from royalty to democracy to communism has impacted Lao religious culture, the book offers an integrated account of the entwined political and religious history of Laos from the fourteenth century to the contemporary era. Holt advances the provocative argument that common Lao knowledge of important aspects of Theravada Buddhist thought and practice has been heavily conditioned by an indigenous religious culture dominated by the veneration of phi spirits whose powers are thought to prevail over and within specific social and geographical domains. The enduring influence of traditional spirit cults in Lao culture and society has brought about major changes in how the figure of the Buddha and the powers associated with Buddhist temples and reliquaries indeed how all ritual spaces and times have been understood by the Lao. Despite vigorous attempts by Buddhist royalty, French rationalists, and most recently by communist ideologues to eliminate the worship of phi spirit cults, they have not been displaced; they continue to persist and show no signs of abating. Not only have the spirits resisted eradication but they have withstood synthesis, subordination, and transformation by Buddhist political and ecclesiastical powers. Rather than reduce Buddhist religious culture to a set of simple commonalities, Holt takes a comparative approach using his nearly thirty years' experience with Sri Lanka to elucidate what is unique about Lao Buddhism. This stimulating book invites students in the fields of the history of religion and Buddhist and Southeast Asian studies to take a fresh look at prevailing assumptions and perhaps reconsider the place of Buddhism in Laos and Southeast Asia.

**The Mystery of Human Relationship** Nathan Schwartz-Salant, 2003-09-02 All human relationships are containers of emotional life, but what are the structures underlying them? Nathan Schwartz-Salant looks at all kinds of relationships through an analyst's eye. By analogy with the ancient system of alchemy, he shows how states of mind that can undermine our relationships in marriage, in creative work, in the workplace, can become transformative when brought to consciousness. It is only by learning how to access the interactive field of our relationships that we can enter this transformative process and explore its mysterious potential for self-realization.

Asian Sacred Natural Sites Bas Verschuuren, Naoya Furuta, 2016-08-12 Nature conservation planning tends to be driven by models based on Western norms and science, but these may not represent the cultural, philosophical, and religious contexts of much of Asia. This book provides a new perspective on the topic of sacred natural sites and cultural heritage by linking Asian cultures, religions, and worldviews with contemporary conservation practices and approaches. The chapters focus on the modern significance of sacred natural sites in Asian protected areas, with reference where appropriate to an Asian philosophy of protected areas. Drawn from over 20 different countries, the book covers

examples of sacred natural sites from all of IUCN's protected area categories and governance types. The authors demonstrate the challenges faced to maintain culture and support spiritual and religious governance and management structures in the face of strong modernisation across Asia. The book shows how sacred natural sites contribute to defining new more sustainable and more equitable forms of protected areas and conservation that reflect the worldviews and beliefs of their respective cultures and religions. The book contributes to a paradigm shift in conservation and protected areas as it advocates for greater recognition of culture and spirituality through the adoption of biocultural conservation approaches.

Spaces for the Sacred Philip Shelldrake, 2001-01-31. In *Spaces for the Sacred* Philip Shelldrake brilliantly reveals the connection between our rootedness in the places we inhabit and the construction of our personal and religious identities. Based on the prestigious Hulsean Lectures he delivered at the University of Cambridge, Shelldrake's book examines the sacred narratives which derive from both overtly religious sites such as cathedrals and secular ones like the Millennium Dome and it suggests how Christian theological and spiritual traditions may contribute creatively to current debates about place.

**Sacred Place** Jean Holm, John Bowker, 2001-01-01. This book explores the function of buildings for worship, shrines and pilgrimage centers and the part they play in the lives of individuals and the community while also recognizing that sacred place is not defined as architectural buildings.

*Geographical Thoughts in India* Rana Singh, 2009-05-27. This book deals with roots of Indian geographical thoughts with reference to its historical base, cultural context and visionary message. As a consequence of long cultural history, the resultant lifeworld in India converges like a drama and dance of space-time function with transference and transformation. In the passage of time, emerged a metaphysical frame of thought, the varieties of heritagescapes and simultaneously grown the senses to heritage ecology. Of course, attempts have been scanty but the richness always portrayed in literature and literary geography. Historical and cultural geographies in India have not caught that much attention in the academia; however, on micro level, distinct attributes are interpreted in the recent literature. Going back to the ancient notions of nature theology, religioscapes and rituals, have developed a complex network of belief systems in the Hindu traditions. In these traditions, the motherly river Ganga serves as symbol, system and metaphor in the Indian culture. Continuity of cultural manifestations is actively maintained and continued in the Indian villages where lives three-fourths of India's population and serve like a place ballet. India's catastrophic march on the road of development and technology is entangled with obstacles and socio-spatial gaps that need to be re-considered in the light of cultural background and historical legacy. All these issues are examined, emphasising dualistic and complimentary perspectives in the West and the East.
