## **Spiritual And Religious Education:**

**Religious Experience and Experiencing Religion in Religious Education** Ulrich Riegel, Eva-Maria Leven, Daniel Fleming, 2018 In Europe religious and spiritual education happens in a context which is at the same time increasingly secular and religiously plural This places the problem of religious experience on the agenda Today most students of religious and spiritual education lack appropriate experiences and show different opinions about what religion or spirituality could be This setting raises several questions How can religious experience be conceptualized in a context of religious plurality and secularity with the traditional religious traditions as just one option among others How does lived religion contribute to such a conceptualization Do the concepts of spirituality and implicit religion give way to a new understanding of religious experience How can be grasped religious experience beyond the traditional religious practices Do traditional empirical methods still fit Which concepts and methods can we utilize in bringing religious experience into religious or spiritual education

**Spiritual and Religious Education** Mal Leicester, Sohan Modgil, 2005-07-15 Volume V distinguishes religious and spiritual education and takes a multi faith approach to pedagogic curricular and resource issues The important area of collective worship is also addressed

*Reconstructing Religious, Spiritual, and Moral Education* Clive Erricker, Jane Erricker, 2000 Focuses on the importance of transforming religious education and using its potential to address the worldviews of children

**Redefining Religious Education** S. Gill, G. Thomson, 2016-10-18 This book is a unique collection of interdisciplinary articles that argue for religious education to be directed primarily towards the spiritual insofar as it is part of a flourishing human life The articles address this issue from the perspectives of theory different religious traditions and innovative teaching and learning practices

*Holistic Religious Education - is it possible?* Sturla Sagberg, 2015 This book discusses the possibility of a holistic approach to religious education taking into account religious and cultural diversity different aspects of secularisation and different academic disciplines that inform the subject Issues discussed are the view of children as spiritual and religious subjects identity formation the concept of child theology the relationship between faith and morality the meaning of spirituality the notion of wonder as an inroad to learning religion as culture and the meaning of holism A point of departure is taken in a typology of attitudes to religion in public education and the line of reason ends in a search for viable metaphors for holistic religious education

Sturla Sagberg born 1951 is professor of religious education and ethics at Queen Maud University College of Early Childhood Education in Trondheim Norway He has a doctoral degree in theology and has for many decades taught and done research related to teacher training as well as to church education He has published several books in Norwegian of which the latest translates into *Religion Values and Formation Children and the big questions in life* Many of his articles in books and journals are written in English

[New Perspectives on Religious and Spiritual Education](#) Theo van der Zee, Terence J. Lovat, 2012 Society is a complex phenomenon characterized by constant change often entailing conflict This is seen in our own times where philosophies and movements of individualism pluralism

and globalization intersect and often collide Still even in this fast moving and highly materialist world religion and spirituality remain crucial aspects of human and social living and therefore must be among the many focusses of the modern school Teachers of Religious and Spiritual Education RSE are therefore expected to support students religious and spiritual understanding as well as their overall development How can they best meet this challenge This book is comprised of various interdisciplinary research findings drawn from international scholarship The findings are of a different order from each other but all have in common an element of surprise sufficient to impel reflection and re thinking of many of the assumptions that normally underpin RSE The book therefore constitutes a contribution to ongoing understanding of the role played by religious and spiritual education and of the proper interface between RSE and the modern school contemporary curricula and the teacher of today Contributions by Robert Crotty Ola Erik Domaas Michael Fricke Liam Gearon Adrian Mario Gellel Eija Hanhimaki Laura Hirsto Tapani Innanen Terence Lovat Klaas Macha Emanuel P Magro Adil Mamodaly Fritz Oser Ulrich Riegel Inkeri Rissanen Sturla Sagberg Kirsi Tirri Theo van der Zee Karen Wenell

**Contemporary Challenges for Religious and Spiritual Education** Arniika Kuusisto, Terry Lovat, 2017-10-02 From being on the margins of scholarly debate for much of the past century and a half religion is being recognized once again as an area of concern for scholars politicians and public policy makers and thus the role of religious and spiritual education has taken on a new importance Apart from its socio political ramifications the place of religiousness and spirituality in the make up of individuals has been given renewed prominence through updated brain science and neuroscientists regularly refer to elements of this brain science in terms such as spiritual intelligence and even mystical consciousness This book explores many of the new directions being taken in the field of religious and spiritual education as new developments challenge the priorities of formal education and open up new avenues for incorporating religion and spirituality into the modern curriculum It asks whether the educational aims of teachers should be focused on specifically personal development or whether religious education should be used to develop understanding of more global and social issues such as citizenship conflict and ethics The book also addresses neuroscientific insights which suggest a need to engage with cognition and emotion in order to create a rich learning environment something to which a particularly contested subject area like religion and spirituality is well placed to contribute This book was originally published as a special issue of the Journal of Beliefs Values

Religious Education in the Family Henry Frederick Cope, 1915-01-01

**Reasons for Living** Marisa L. Crawford, Graham Rossiter, 2006 Reasons for Living begins by exploring the development and psychological function of meaning identity and spirituality in the lives of young people This exploration can contribute significantly to the professional background of those engaged in the education and care of youth in various contexts The book then focuses on what it means to educate young people in meaning identity and spirituality Implications are considered for three school contexts the spiritual and moral dimension to the general curriculum in public and independent schools religious education in religious schools and state based Religion Studies

courses *Reasons for Living* makes a much needed contribution to the philosophy of education by discussing the links between education and young people's spiritual and moral development. It also provides new insights and approaches to values education and religious education. Areas of fundamental importance in Australian education have long been held back not only by the gap between theory and practice but also by the very complexities of young people's personal development in contemporary Western Culture. *Reasons for Living* offers a constructive and practical way forward.

**Spirituality and Education** Andrew Wright, 2003-09-02 *Spirituality and Education* introduces the basic contours of current debate in a form accessible to both classroom teachers across the curriculum range and to school managers. It covers all key areas including problems of defining spirituality, government legislation and supporting documentation, relevant empirical research, the social dimension of spirituality, secular and religious manifestations of spirituality in contemporary society, theories of childhood spiritual development, contemporary approaches to spiritual education including collective worship and cross-curricular teaching. A variety of different perspectives and approaches will be offered and readers are encouraged to be reflective through a number of tasks which relate all issues raised directly back to their own specific circumstances. The author includes questions, quotes and lists of further reading.

**Christian Faith, Formation and Education** Ros Stuart-Buttle, John Shortt, 2017-11-13 This book discusses the relationship between faith formation and education. Rooted in a variety of discourses, the book offers original insights into the education and formation of the human person, both theoretical and practical. Issues are considered within a context of contemporary tensions generated by an increasingly pluralist society with antipathy to religious faith and debated from interdenominational Christian perspectives. Including chapters by an international team of experts, the volume demonstrates how Christian faith holds significance for educational practice and human development. It argues against the common assumption that there can be a neutral approach to education whilst at the same time advocating a critical dimension to faith education. It brings fresh thinking about faith and formation which demands attention given the fast-changing political, educational and socio-cultural forces of today. It will appeal to students and researchers involved in Christian educational practice.

from Victorian times and earlier through the 1960s and beyond in order to see how we have reached the present situation The subject is examined in various contexts its historical and cultural background politics and legislation philosophy and values curriculum development The book addresses the problem of how to define spiritual development and the contentious issue of compulsory school worship It offers new insights and a thesis for the way forward **Education, Culture and Values** Mal Leicester, Celia Modgil, Sohan Modgil, 2000 **Spirituality and the Curriculum** Adrian Thatcher, 1999-10

**Praise for Spirituality and the Curriculum** The current interest in spirituality shows no sign of abating This volume consists of a useful set of essays from educationalists and theologians Overall the volume will be important reading not only for teachers of theology but also for those concerned with the spiritual development of children and adults alike Theology May June 2000

**This book fizzes** Addressed to those working in an educational context it is an attempt to speak theologically about spirituality and morality Adrian Thatcher its editor has assembled a group of contributors who write well and who have innovative ideas to communicate Fresh arguments and new perspectives make it an exciting read as it exposes the distressing emptiness of what passes as secularised spiritual nurture in most contemporary schools Its seminal chapter is by Mary Grey What an imaginative tour de force this is She is not afraid to speak of the Transcendent or to see the wider value of liberation and feminist theologies What Adrian Thatcher offers is a sharp critique of the high sounding moral sentiments of the present generation of curriculum makers There is a vision here which can reach beyond Christianity and which ought to be taken account of by parents and teachers Again prophetic in its own way it is controversial Ian Markham s short chapter is a gem Adrian Thatcher has given us a refreshing book which reasserts the right of theology to be heard in the current debate about the spiritual dimension of education But that is not the point What he wishes us to do is to think further better and more fairly about the issues which are before us That surely is something we all must do This book is a marvellous help in this Buy it British Journal of Religious Education 23 1 Autumn 2000 It offers an informed critical accessible and thought provoking set of reflections on the possible connections that might be made between spirituality and the curriculum especially at school level It helps it the task of establishing a credibility of spirituality as a valid dimension of the curriculum It also offers some guidance for educators as to how they might approach this area and offers some valuable insights into aspects of practice The Heythrop Journal 41 4 October 2000 It is rarely possible to do justice to books which contain a number of substantial essays because there is seldom space to give adequate consideration to all the contributors and this collection is no exception The book will be of most use to those researching this subject but I would hope that it might also be read by theologians who may see it as an invitation to them to focus more of their attention on theology and education Resource Professional Reflection on Theory and Practice in Religious Education 23 2 Spring 2001 there is much good material for those who wish to work with the spiritual moral social and cultural dimensions of their school or colleges environments shaping or challenging the power structures in which they operate and determining the ethos which they seek

to encourage Those involved in religious education or student services or educational policy will all find articles to stimulate the current debate as to whether theology and or spirituality can create community consensus and so nurture a more humane experience within education Tim Macquiban Journal of Beliefs and Values 22 1 2001 Religious Education in Asia Kerry J. Kennedy, John Chi-Kin Lee, 2020-08-30 The book examines ancient religious traditions and modernity in a globalized Asia that is as much in need of a moral compass as it is economic development Religious education has been an aspect of many societies over time and irrespective of culture Yet as globalization advances local values are challenged every day by internationalized discourses and global perspectives It is this context that provides the rationale for this edited book It seeks to understand what forms religious education takes in Asian contexts and what role it continues to play On the one hand the societies which are the subject of this book reflect ancient religious traditions but on the other they are responsible for a significant portion of the world s economic development The book will appeal to researchers interested in the current state of religious education in Asia policymakers with responsibility for religious education and teachers who practice religious education on a daily basis *How to Teach Religion* George Herbert Betts, 2009-05-01 Despite the profound significance that religion holds in believers lives most teachers of religion are volunteers or amateurs with no formal training in instructional methods This comprehensive guide provides basic and advanced techniques for religious instruction geared for every age group and level of comprehension *Thoughts on Religious Education and Early Piety* William Swan Plumer, 1836

*Spiritual Education in a Divided World* Cathy Ota, Mark Chater, 2007-03-15 In the era of globalization debate has turned to the vital need for a thorough understanding of its impact on the spirituality and health of the youth of today *Spiritual Education in a Divided World* recognises the urgent need for effective research in this area This exceptional volume takes an interdisciplinary approach to tackle the key question **Spiritual Education** Jane Erricker, Cathy Ota, Clive Erricker, 2001 Twenty one selected papers from the First International Conference on Children s Spirituality held in Chichester England are arranged in sections focusing on religious and theological psychological and anthropological and pedagogical approaches to the subject A sampling of topics the nonverbal nature of spirituality and religious language youth spirituality as a response to cultural crisis spirituality versus individualism the prospects of spirituality in a globalized technological world and spirituality and the notion of citizenship in education The writing is academic but accessible to the general reader Distributed by ISBS c Book News Inc
