mankind's greatest achievements and one of its most commonly used inventions. How did it originate? Those who have written about the numeral system have hypothesized that it originated in India; however, there is little evidence to support this claim. This book provides considerable evidence to show that the Hindu-Arabic numeral system, despite its commonly accepted name, has its origins in the Chinese rod numeral system. This system was widely used in China from antiquity till the 16th century. It was used by officials, astronomers, traders, and others to perform addition, subtraction, multiplication, division, and other arithmetic operations, and also used by mathematicians to develop arithmetic and algebra. Based on this system, numerous mathematical treatises were written. *Sun Zi suanjing* (The Mathematical Classic of Sun Zi), written around 400 AD, is the earliest existing work to have a description of the rod numerals and their operations. With this treatise as a central reference, the first part of the book discusses the development of arithmetic and the beginnings of algebra in ancient China, and on the basis of this knowledge, advances the thesis that the Hindu-Arabic numeral system has its origins in the rod numeral system. Part Two gives a complete translation of *Sun Zi suanjing*. In this revised edition, Lam Lay Yong has included an edited text of her plenary lecture entitled *Ancient Chinese Mathematics and Its Influence on World Mathematics*, which was delivered at the International Congress of Mathematicians, Beijing 2002, after she received the prestigious Kenneth O. May Medal conferred by the International Commission on the History of Mathematics. This should serve as a useful and easy-to-comprehend introduction to the book.

It brings together the most significant products of Chinese culture, showing the evolution of the arts, everyday lifestyles, religious beliefs, the coexistence of tradition and innovation, and sacred and profane values.

□□□□ □□□, 2000 **The Bulletin**, 1985-10 **Phoenix Kingdoms** Lai Guolong, Colin Mackenzie, Haicheng Wang, 2022-10-04. Featuring about 150 loans from China's Hubei Provincial Museum, this exhibition set to open at the Asian Art Museum of San Francisco under the name *Lost Kingdoms of Ancient China* examines the new finds of Zeng and Chu tombs together to explore the cultural landscape of the southern borderland of the Zhou dynasty. It also reveals the legendary rising story of the phoenix kingdom, erased by the Qin, highlighting the importance of the middle Yangtze River region in forming a southern style in Chinese art. For a better understanding of the Zeng and Chu material, the exhibition catalogue consists of seven essays to elaborate the introduction to the remarkable art and culture of this region, with entries of about 150 works in six categories: jade, bronze, ritual vessels, musical instruments, and weapons, lacquerware for luxury and ceremony, funerary bronze, and wood objects and textiles and artefacts with designs. Seven contributors have written for this catalogue, including five outside scholars with expertise on different subjects.
