Art Kaveh Askari, 2014-12-12 Focusing on early cinema's relationship with the pictorial arts this pioneering study explores how cinema's emergence was grounded in theories of picture composition craft and arts education from magic lantern experiments in 1890s New York through to early Hollywood feature films in the 1920s Challenging received notions that the advent of cinema was a celebration of mechanisation and a radical rejection of nineteenth century traditions of representation Kaveh Askari instead emphasises the overlap between craft traditions and modernity in early film Opening up valuable new perspectives on the history of film as art Askari links American silent cinema with the practice of teaching the public how to appreciate fine art charts its entrance into arts education via art schools and university film courses shows how concepts of artistic production entered films through a material interest in the studio and examines the way in which Maurice Tourneur and Rex Ingram made early art films by shaping an image of the film director around the idea of the fine artist

Not Just Baseball William Bourne, 2020-12-16 William Bourne grew up loving baseball playing in an under eighteen league in Greenwich Connecticut with his brother As an adult he traced the history of Minor League baseball traveling to various baseball towns mostly with his brother Jim and son Michael They chose Single A teams because it gave them the chance to visit small remote towns Over a period of years they traveled almost 36 000 miles via airplanes and rented cars seeing dozens of games in twenty two states plus western Canada They avoided Southern states as they were usually traveling in July and August when it was hot Seattle was their most western point and Portland Maine was the most eastern Each trip was spontaneous and they regularly ran into interesting people and situations Driving into Hannibal Missouri introduced the author to Mark Twain prompting him to read three of his novels as well as a biography He learned Twain often snuck out of his house at midnight to meet his buddies down by the Mississippi River's edge which is where he no doubt did much of his dreaming Join the author as he celebrates his love of baseball family and America traveling through quaint villages Kirtland Cutter Henry C. Matthews, 2018-07-01 In the early years of the twentieth century Spokane was singled out for praise in the West for the quality of its architecture and the impressive way it had rebuilt after the devastating

fire of 1889 Major credit for the city's distinctive character was extended to Kirtland Kelsey Cutter for his rare architectural force and genius for design His remarkable career stretching from the Gilded Age to the Great Depression allows a fascinating study of the evolution of an eclectic form of architecture that was an inevitable response to rich regional and historical influences during a time of transition from frontier settlements to modern city Cutter's influence was felt beyond Spokane in Seattle other areas of Washington and in Oregon Idaho and Montana He was also responsible for buildings in the East and even for one in England After financial problems ended his career in the Northwest he began anew at age sixty three in southern California and worked there as an architect until his death in 1939 at age seventy nine Henry Matthews presents a comprehensive study of the whole body of Cutter's work with ample photographs and illustrations The book is based on exhaustive research in both the Northwest and California revealing the influences on Cutter and his associates the processes at work in the design and construction of the buildings and the relations between the architect and the many people who commissioned his work Particularly useful to Matthews's research was a collection of 290 sets of drawings as well as office accounts letters and books from Cutter's library materials acquired by the Eastern Washington State Historical Society He also was able to interview former assistants and clients who provided valuable insights on the architect and the way Cutter worked In addition many of the architect's residences hotels clubs and commercial buildings are still standing This book adds significantly to an understanding of Western urban and regional history But Cutter's experimentation in many styles and the imaginative nature of his work make for a study that goes beyond regional limits and sheds light on national trends Winner of the 1999 Washington State Book Award
