Typology and Second Language Acquisition Anna Giacalone Ramat, 2011-07-11 In recent years research on comparative typology has led to reveal regularities and to formulate new constraints upon variation for a broad range of phenomena As the amount of typological research increased a growing interest arose for the implications that findings in the typological field might have on second language acquisition Written by experts in the field of typology and or second language acquisition this volume addresses theoretical and empirical issues on structural domains such as relative clauses and possessive constructions as

well as pragmatic considerations on information organization in learners productions **New Horizons in Chinese Linguistics** C-T James Huang, Audrey Li Yen Hui, 2012-12-06 The past decade and a half has witnessed a great deal of renewed interest in the study of Chinese linguistics not only in the traditional areas of philological studies and in theoretically oriented areas of synchronic grammar and language change but also in the cultivation of new frontiers in related areas of the cognitive sciences There is a significant increase in the number of students studying one area or another of the linguistic structure of Chinese in various linguistic programs in the United States Europe Australia and in China Hong Kong Singapore Taiwan and other parts of Asia Several new academic departments devoted to the study of linguistics have been established in Taiwan and Hong Kong in the past few years The increasing research and study activities have also resulted in a number of national and international conferences including the North American Conference on Chinese Linguistics NACCL which has been held annually in the United States the International Symposium on Chinese Languages and Linguistics IsCLL which has had its fourth meeting since it was launched by Academia Sinica in Taiwan in 1990 the International Association of Chinese Linguistics IACL created in Singapore in 1992 and now incorporated in Irvine California which has held its annual meetings at major institutions in Asia Europe and the US **How to Speak Cantonese** James Dyer Ball, 1904 **Things Chinese** James Dyer Ball, 1900 **The Past, Present, and Future of Second Language Research** Xenia Bonch-Bruевич, 2001 **The Bilingual Child** Virginia Yip, Stephen Matthews, 2007-08-27 How does a child become bilingual The answer to this intriguing question remains largely a mystery not least because it has been far less extensively researched than the process of mastering a first language Drawing on new studies of children exposed to two languages from birth English and Cantonese this book demonstrates how childhood bilingualism develops naturally in response to the two languages in the children's environment While each bilingual child's profile is unique the children studied are shown to develop quite differently from monolingual children The authors demonstrate significant interactions between the children's developing grammars as well as the important role played by language dominance in their bilingual development Based on original research and using findings from the largest available multimedia bilingual corpus the book will be welcomed by students and scholars working in child language acquisition bilingualism and language contact
