and infantry. These included tank destroyers, reconnaissance vehicles, flame thrower vehicles and self propelled artillery pieces. Armored tank destroyers such as the Marder series, the Nashorn, Jagdpanther, Jagdtiger and the turretless German Stu III series based on the Panzer III medium tank helped the Nazis overcome their shortage of tanks. Copying the Stu III series, the Italians created the turretless Semovente da 75 18 assault gun and the Hungarians the turretless Zrinyi. In the role of self propelled artillery, the German fielded the Hummel, the Wespe and the Grille while the Brummbär and the Sturm-tiger performed in the dedicated assault gun role. For armored reconnaissance, German industry came up with a series of capable armored cars; examples were the eight wheel Puma and the full tracked Luchs reconnaissance tank. The Italians developed the impressive four wheel Autoblinda armored cars. Specialized anti-aircraft tanks such as the Möbelwagen, Wirbelwind and the Ostwind gave some protection against the ever more powerful Allied air forces. This fine book covers all these variants and many more besides in words and rare images and will delight readers, collectors, model makers and war gamers. **M10**

**Tank Destroyer vs StuG III Assault Gun** Steven J. Zaloga, 2013-08-20. The Allies M10 Tank Destroyer and the Germans Sturmgeschütz StuG III were the unsung workhorses of the northwest European battlefields of 1944-45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters from the Normandy bocage to the rubble strewn streets of Aachen. The StuG III was the quintessential assault gun, a low slung heavily armoured turretless vehicle intended to provide direct fire support for infantry formations whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer. However, by 1944 the 3in gun proved ineffectual against the most thickly armored German tanks and was consequently relegated to infantry support too. Widely deployed in roles their designers had not envisaged, these two armoured fighting vehicles clashed repeatedly during the 11 month campaign which saw the Allies advance from Normandy to the heart of the Reich. Fully illustrated with specially commissioned artwork, this is the story of their confrontation at the height of World War II. *Stug III Ausf. G* George Parada, 2000. Michael Green, Thomas Anderson, Frank Schulz, The most fearsome tanks of WWII roll across the front lines in this fabulous color collection. The story of German tank evolution is depicted in rare color photos including first hand accounts of tank battles plus detailed specifications. Light Panzer I and II tanks, medium Panzer III, IV and V tanks and heavy Panzer VI Tiger I and II tanks are featured as well as a variety of tank support vehicles. **Tanks in the Battle of the Bulge** Steven J.

Zaloga, 2020-04-30. The Battle of the Bulge raises many questions which until now have not been adequately answered. How did the major tank types perform during the battle? What were the specific lessons learned from the combat? And did these lessons result in changes to tanks in the subsequent months? Offering detailed answers to these questions and many more, this book provides a survey of the principal tank and tank equivalents such as tank destroyers and Jagdpanzers that took part in the Ardennes Campaign of December 1944-January 1945. Beginning with a basic overview of the campaign accompanied by an order of battle of the major armoured units, it examines the opposing forces covering the organization of the two tank

forces to explain how they were deployed Author Steven Zaloga also scrutinises the technical balance between the opposing sides comparing armour mobility and firepower as well as other important factors such as reliability crew situational awareness and tank layout efficiency Full of specially commissioned and highly accurate artwork plates of the tanks themselves as well as fascinating technical data based on cutting edge research this title is the definitive guide to tank warfare in the Battle of the Bulge
