Finn, Barton C. Hacker, 2005 Artefacts is a book series in which the editors encourage authors to use objects as evidence for their studies of the history of science and technology In Materializing the Military with its focus on military technology the results are innovative and provocative Topics as diverse as fourteenth century Burgundian artillery and twentieth century US Army Air Corps sextants uniforms for volunteers and prosthetics for the disabled the material culture of warfare and the cultural implications of the material relics of warfare are all given new meaning through interpretation based on examining the objects themselves as witnessed by the generous use of photographs of the artefacts Also included is an essay on the specific problems of presenting military history through the use of objects in military collections together with an annotated list of selected military naval and air museums Authors who are from academic institutions and museums bring a variety or perspectives to these writings from such

disciplinary backgrounds as archaeology museum studies military history and the history of medicine as well as the history of science and technology This book will appeal to serious students of military history to curators and others in all museums of the history of science and technology as well as specifically military museums Nevertheless the level of writing and the subjects covered should also make it valuable to a range of amateur historians interested in these subjects *The Mariner's Mirror Bibliography for ...* ,1992 US Nuclear Submarines Jim Christley,2012-01-20 The adoption of nuclear power revolutionized submarine design and means that vessels can stay underwater for months trailing the enemy or training weapons on land targets from secret positions always there never seen Jim Christley a former submariner explores here the influence of Admiral Hyman Rickover in cautiously introducing these stealthy machines of war and frankly discusses the power and perils of using nuclear reactors at sea Using unique and detailed artwork he outlines the many evolving aspects of design within the submarine classes from the very first nuclear submarine USS Nautilus to the classes under construction even now *China's Future Nuclear Submarine Force* Lyle J Goldstein,Andrew S. Erickson,William S. Murray,Andrew Wilson,2012-04-30 One of the key concerns of naval strategists and planners today is the nature of the Chinese geostrategic challenge Conceding that no one can know for certain China s intentions in terms of future conflict the editors of this hot topic book argue that the trajectory of Chinese nuclear propulsion for submarines may be one of the best single indicators of China s ambitions of global military power Nuclear submarines with their unparalleled survivability remain ideal platforms for persistent operations in far flung sea areas and offer an efficient means for China to project power This collection of essays presents the latest thinking of leading experts on the emergence of a modern nuclear submarine fleet in China Each contribution is packed with authoritative data and cogent analysis The book has been compiled by four professors and analysts at the U S Naval War College who are co founders of the college s recently established China Maritime Studies Institute Given the opaque nature of China s undersea warfare development readers will benefit from this penetrating investigation that considers the potential impact of even the most revolutionary changes in Chinese nuclear submarine capabilities The editors believe that to ignore such possibilities would be the height of strategic folly and represent inexcusable negligence in terms of U S national defense Anyone who is interested in the future of the U S Navy and the defense of the United States will find this book to be essential reading Three Knots to Nowhere Ted E. Dubay,2014-03-03 This book follows the author s experiences in the United States Navy from 1966 through 1972 They include a personal background boot camp electrician s school the U S Naval Nuclear Program assignment to the USS Henry Clay during an overhaul in Charleston South Carolina subsequent transit to Hawaii and deterrent patrols out of Guam The work begins with the crew of one of the most powerful weapons on earth the fleet ballistic missile submarine USS Henry Clay manning Battle Station Missile What follows is a fresh perspective on the secret world of submarine life ranging from behavioral insights and humorous anecdotes to many undocumented attributes of submarine life exposing aspects of life under the sea no one else

has revealed This book is the most complete representation of submarine duty to date with a high level of detail The narrative focuses on the enlisted men the backbone of the submarine service **The Secret Weapon** Michael A. Campbell, 2005-11
