Subject And Predicate In Logic And Grammar:

Subject and Predicate in Logic and Grammar P. F. Strawson, 1976 **Subject and Predicate in Logic and Grammar** P.F. Strawson, 2017-03-02 P F Strawson has supplied a new introduction for this reissue of his modern classic originally published in 1974 Subject and Predicate in Logic and Grammar explores two conceptions of subject and predicate one of which lies at the core of standard logic and the other more closely relates to surface forms of natural language Strawson renders these two conceptions and their divergences intelligible by relating them both to the basic case in which the subject term designates a substantial spatio temporal individual Through his treatment of these conceptions Strawson added to our understanding of both logic and general grammar helping us trace formal characteristics of logic and its grammar to their roots in general features of thought and experience and observing how the grammatical structure of a large group of non formalized languages naturally develops in various ways along other lines This book based originally on seminar material used at Oxford and Princeton and a series of lectures delivered at Irvine and University College London has become an enduring landmark in the literature of logic and the philosophy of language Foundations of Logic and Language Pranab Kumar Sen, 1990 The Teacher's English Grammar Assistant: Francis Martin Norman, 1875 **History of Linguistics 1996** David Cram, Andrew R. Linn, Elke Nowak, 1999-12-15 The papers in this volume present a colourful picture of the range of research currently being undertaken in the field of the history of linguistics with contribution both from established scholars and from younger researchers The volume is organised on a geographical basis with sections devoted to a number of different traditions in linguistics world wide The opening section is concerned with a number of general and methodological topics ranging from the notion of revolution in linguistic historiography to the history of the study of ape language The second section is devoted to missionary linguistics an umbrella category for the early contacts of Europeans with non European languages Subsequent sections address individual traditions in linguistics III The Celtic Tradition IV The Chinese Tradition V The Georgian Tradition VI The Hebrew Tradition VII The Japanese Tradition VIII The Persian Tradition IX The Russian Tradition X The Tamil Tradition A Working Grammar of the English Language James Champlin Fernald, 1910 The teacher's English grammar assistant: by the author of the 'Schoolmaster's drill assistant' (F.M. Norman). Francis Martin Norman, 1875 Essay on the Principles of Logic Michael Wolff, 2023-05-22 Wolff s book defends the Kantian idea of a general logic whose principles underlie special systems of deductive logic It thus undermines logical pluralism which tolerates the co existence of divergent systems of modern logic without asking for consistent common principles Part I of Wolff s book identifies the formal language in which the most general principles of logic must be expressed This language turns out to be a version of syllogistic language already used by Aristotle The universal validity of logical principles as well as the translatability of other logical languages into this language are shown to depend only on the meanings of its logical vocabulary Part II of the book answers the metalogical question concerning the deductive relation

between general logic and special logical systems which also have their own less general principles This part identifies the rules according to which logical rules can be derived from principles The main result of the book is that the highest principles of logic and metalogics are provided by the syllogistic when properly understood The Logic of Language Pieter A. M. Seuren, 2010 This book opens a new perspective on logic After analyzing the functional adequacy of natural predicate logic and standard modern logic for natural linguistic interaction the author develops a general theory of discourse bound interpretation covering such topics as discourse incrementation anaphora presupposition and topic comment structure

History of Linguistics, 1996: Traditions in linguistics worldwide David Cram, Andrew Robert Linn, Elke Nowak, 1999 The papers in this volume present a colourful picture of the range of research currently being undertaken in the field of the history of linguistics with contribution both from established scholars and from younger researchers The volume is organised on a geographical basis with sections devoted to a number of different traditions in linguistics world wide The opening section is concerned with a number of general and methodological topics ranging from the notion of revolution in linguistic historiography to the history of the study of ape language The second section is devoted to missionary linguistics an umbrella category for the early contacts of Europeans with non European languages Subsequent sections address individual traditions in linguistics III The Celtic Tradition IV The Chinese Tradition V The Georgian Tradition VI The Hebrew Tradition VII The Japanese Tradition VIII The Persian Tradition IX The Russian Tradition X The Tamil Tradition
