species living beneath the ocean floor that are bent on the complete annihilation of mankind Page 4 of cover COLD WARRIORS Roy R. Manstan, 2014 This is the story of a technological war There was no ambiguity behind the phrase mutually assured destruction nuclear weapons and the means to deliver them had become a reality The atomic bomb brought Japan to the USS Missouri for the formal surrender on September 2 1945 a date that marked the end of World War Two But this date also signaled the beginning of the Cold War as the Soviet Union emerged from the shadows There was no shot heard round the world no Fort Sumter no Pearl Harbor only the threat of a mushroom cloud far worse than what Japan experienced The Cold War remained cold because all the players aggressively pursued a strategy of deterrence aimed at keeping the opponent's finger off the trigger The people on the front lines and behind the scenes the Cold Warriors on both sides would come from the civilians who created the technology and the military that would be entrusted with its use When tensions escalated it was the Navy and the silent service that played a critical role In Cold Warriors the author describes a Navy laboratory in New London Connecticut populated with pioneers in submarine and antisubmarine warfare technology Their mandate was to take the intellectual risks that would keep this country one step ahead of the Soviet Union But ideas alone would not win the Cold War The scientists relied on teams of field engineers whose willingness to take on physical risk would convert theory into reality One of these groups was simply known as the divers Beginning in the 1950s the U S Navy Underwater Sound Laboratory began sending a small number of its civilian staff one or two each year to train at one of the Navy's diving schools As the Laboratory in New London evolved into the Naval Undersea Warfare Center Newport Rhode Island that small team became the Engineering and Diving Support Unit For more than a half century the divers would travel the world this book is their story

Fremantle's Submarines Michael Sturma,2015-09-15 From unpromising beginnings in March 1942 the Allied submarine base at Fremantle on the west coast of Australia became a vital part of the Allied offensive against Japan Pushed back from the Philippines and the Netherlands East Indies American submariners accompanied by a small group of Dutch forces retreated to Fremantle as a last resort The location was chosen for its good harbor and the fact that it was outside the range of land based Japanese aircraft Unfortunately the base was also far from their patrol areas and supply lines and it was difficult to reinforce should the enemy attack Thanks largely to a welcoming civilian population morale quickly improved The hospitality and sense of belonging fostered by Western Australians became legendary among Allied submariners and remains central to their wartime memories Perhaps as a result of such a positive experience the Allied forces became much more successful in combat Intertwining social and military history Fremantle s Submarines relates how courage cooperation and community made Fremantle arguably the most successful military outpost of World War II from the standpoint of troop morale

Power Shift Dan Gillcrist,2006 Power Shift is the first comprehensive account of the US Navy s Submarine Force transition from diesel to nuclear power It represented the biggest most costly and disruptive technological change in naval history This was all done against the backdrop of intense Cold War operations where US submarines played a critical role in maintaining the peace The story is told by the people who were part of the power shift From seamen to admirals they tell the stories of how the technological and cultural changes affected them
