Substance And Illusion In The Christian Fathers

Substance And Illusion In The Christian Fathers:

Substance and Illusion in the Christian Fathers Christopher Stead,1985-01 **The Trinitarian Theology of Basil of Caesarea** Stephen M. Hildebrand,2007 Basil of Caesarea the Great has drawn the admiration of many for centuries He was a father of eastern coenobitic monasticism though Benedict of Nursia revered him as well an author of orthodox Trinitarian theology and eloquent defender of the Spirit a model of social virtue and concern for the poor and an erudite preacher and able bishop This book explores Basil s Trinitarian thought as the meeting place of the worlds within which he lived that of ancient Greek culture and learning and that of Christian faith lived in the liturgy and expressed in the Scripture His work as a bishop theologian and preacher was in large part an effort to make these two worlds one Basil showed that Christianity had the strength and power to take to itself whatever was good among the Greeks ennobling their culture with the name of Christ and yet remaining true to itself He did this not standing outside of Greek culture but within it God Basil developed a precise Trinitarian vocabulary which he thought effectively refuted two basic errors in thinking about God the denial of the divinity of the Son and the Spirit and the denial of their true and real distinction from the Father He maintained that the right thinking about God is more than just the right use of words it is also the right interpretation of the Word the Scriptures This book also then seeks to explain the scriptural foundations of Basil s Trinitarian theology which themselves testify to his artful synthesis of Greek culture and Christian truth Colin Gunton and the Failure of Augustine Bradley G Green,2012-01-26 The British systematic theologian Colin Gunton argued that Augustine bequeathed to the West a theological tradition with serious deficiencies According to Gunton Augustine s particular construal of the doctrine of God led to fundamental errors and problems in grasping the relationship between creation and redemption and in rightfully construing a truly Christian ontology In Colin Gunton and the Failure of Augustine Bradley G Green s close reading of Augustine challenges Gunton s understanding Gunton argued that Augustine s supposed emphasis of the one over the many severed any meaningful link between creation and redemption contra the theological insights of Irenaeus and furthermore that because of Augustine s supposed emphasis on the timeless essence of God at the expense of the three real persons he failed to forge a truly Christian ontology effectively losing the insights of the Cappadocian Fathers For all of Gunton s many insights Green argues that on the contrary Augustine did not sever the link between creation and redemption but rather affirmed that the created order is a means of genuine knowledge of God that the created order is indeed the only means by which redemption is accomplished that the cross of Christ is the only means by which we can see God and that the created order is fundamentally oriented toward a telos redemption Concerning ontology Augustine s teaching on the imago Dei and the prominent role that relationship plays in Augustine s doctrines of man and God provides the kind of relational Christian ontology that Gunton sought In short Green argues Augustine could have provided Gunton key theological resources in countering the modernity he so rightfully challenged Christian Faith and Greek Philosophy in Late Antiquity ,2015-12-22

This volume is a collection of thirteen essays offered in dedication to Professor C G Stead on his 80th birthday Their theme is the philosophy underlying the presentation of Christian teaching in Late Antiquity The essays deal with individual theologians Augustine Ambrose Dionysius the Areopagite Gregory of Nyssa with ideological background Christian and Roman universalism and with the discussion of particular texts A bibliography and brief appreciation of Professor Stead s contribution to Patristic studies are included

Exploring Kenotic Christology C. Stephen Evans, 2006 This collection of essays by a team of Christian philosophers theologians and biblical scholars explores the viability of a kenotic account of the incarnation Such an account is inspired by Paul s lyrical claims in Philippians 2 6 11 that Christ Jesus though God in nature emptied himself or made himself nothing by becoming human The biblical support for such a view can be found throughout the four gospels and the book of Hebrews as well as in other places A kenotic account takes seriously the possibility that Christ in becoming incarnate temporarily divested himself of such properties as omnipotence omniscience and omnipresence Several of the contributors argue that this view is fully orthodox and that it has great strengths in giving us a picture of a God who is willing to become completely vulnerable for the sake of human beings and one that is completely consistent with the very human portrait of Jesus in the New Testament The proponents of kenotic Christology argue that the philosophical accounts of God s nature that have led to rejection of this theory ought themselves to be subjected to criticism in light of the biblical data Some essays test the theory by raising critical questions and arguing that traditional accounts of the incarnation can achieve the goals of kenotic theories as well as kenotic theories can The book also explores the implications of a kenotic view of the incarnation for philosophical theology in general and the doctrine of the Trinity in particular and it concludes with essays that examine the validity of the ideal of kenosis for women and a challenge to traditional Christology to take a kenotic theory seriously

Book jacket

Trinitarian Personhood Bill Ury, 2002-02-01 The concept of the person is a crucial yet elusive component in the development of Western thought Few concepts are as replete with definitional difficulty Equally important is the application of a proper definition to all major Christian doctrinal commonplaces This work recognizing the insufficiency of modern theology to offer a cogent concept of person proposes a thorough historical and theological evaluation of Trinitarian personhood presented in three critical paradigm shifts by which one can measure the development of the idea of true personhood presented The three watershed eras of discernment of divine personhood presented are seen here as first the Cappadocian position of the mutual indwelling perichoresis of the divine persons is contrasted with Augustine s view of the place of relations in defining divine persons Second the ideas of Richard of St Victor whose *caritas consummata* and its relational implications met the nemesis of the Thomistic category of subsistent relations And last as an example of this important discussion in modernity the German Heribert M hlen s dynamic phenomenological approach to Triune personhood is offered as a means of countering the implicit modalisms of Barth and Rahner If the personhood of God is in essence Being in Another then Christianity must apply that ontology to all sectors of reality to be fully Christian

Philosophy in Christian Antiquity Christopher Stead, 1994-11-24 Christianity began as a little known Jewish sect but rose within 300 years to dominate the civilised world It owed its rise in part to inspired moral leadership but also to its success in assimilating criticising and developing the philosophies of the day which offered rationally approved life styles and moral directives Without abandoning their allegiance to their founder and to Holy Scripture Christians could therefore present their faith as a new philosophy This book which is written for non specialist readers provides a concise conspectus of the emergence of philosophy among the Greeks an account of its continuance in early Christian times and its influence on early Christian thought especially in formulating the doctrines of the Trinity and the Incarnation and finally a brief critical assessment of the philosophy of St Augustine arguably the greatest philosopher of the first millennium Christ in Christian Tradition Aloys Grillmeier, Theresia Hainthaler, 1995-01-01 Examines the development of Christology and the concept of Christ and His presence through the late eighth century **On Rowan Williams** Matheson Russell, 2009-01-01 Theologian poet public intellectual and clergyman Rowan Williams is one of the leading lights of contemporary British theology He has published over twenty books and one hundred scholarly essays in a distinguished career as an academic theologian that culminated in his appointment as Lady Margaret Professor of Divinity at Oxford University Williams left this post to serve in the Anglican Church first as Bishop of Monmouth then Archbishop of Wales before finally being enthroned in 2003 as the 104th Archbishop of Canterbury In this collection of essays a talented younger generation of Australian theologians critically analyzes the themes that bind together Williams s theology These sympathetic yet probing essays traverse the full breadth of Williams s work from his studies on Arius the Desert Fathers Hegel and Trinitarian theology to his more pastoral writings on spirituality sexuality politics and the Anglican Church **Arius** Rowan Williams, 2002-01-24 Arius is widely considered to be Rowan Williams s magnum opus Long out of print and never before available in paperback it has been newly revised This expanded and updated edition marks a major publishing event Arianism has been called the archetypal Christian heresy because it denies the divinity of Christ In his masterly examination of Arianism Rowan Williams argues that Arius himself was actually a dedicated theological conservative whose concern was to defend the free and personal character of the Christian God His heresy grew out of an attempt to unite traditional biblical language with radical philosophical ideas and techniques and was from the start involved with issues of authority in the church Thus the crisis of the early fourth century was not only about the doctrine of God but also about the relations between emperors bishops and charismatic teachers in the church s decision making In the course of his discussion Williams raises the vital wider questions of how heresy is defined and how certain kinds of traditionalism transform themselves into heresy Augmented with a new appendix in which Williams interacts with significant scholarship since 1987 this book provides fascinating reading for anyone interested in church history and the development of Christian doctrine
