

6 Key Factors to Successful Strategic Planning

1 Create a Collaborative Inclusive Process

Collaboration is at the center of a successful strategic planning process. The fear of too many cooks in the kitchen is understandable, but creating a strategic plan in a silo is a huge mistake. The more inclusive and collaborative your process, the more support you will have across a diverse set of stakeholders, and the more your strategic plan will accurately reflect your organization's vision for the future.

2 Operate Off Data—Not Assumptions

Everyone makes assumptions and has pre-conceived notions about their organization. However, starting the planning process without gathering data will set you up to fail. It's important to know where your organization is today, not where it was in the past. Using current data ensures you are solving current problems.

3 Set an Expectation for Shared Responsibility and Ownership

Oftentimes in a strategic planning process, a planning committee is appointed without much thought about their specific responsibilities, and without clearly defined expectations for participation. However, finding the right people (think team-players) to participate on the committee, giving them an opportunity to take ownership of the process, empowering them to make decisions, encouraging them to voice their concerns, and enabling them to serve as champions for the process is vital to your success.

4 Prioritize Transparent Communication

Transparency, more than anything, builds trust. If your stakeholders are going to buy into the plan, they need to trust you and trust the process. They also need to see how their ideas and inputs are being captured and shared through regular, transparent updates and communications.

5 Think Past the Strategic Plan

The last thing you want after completing a strategic plan is to have a document that sits on the shelf and gathers dust. Because of this, it's vital to look past the planning phase and think through how you'll actually implement your plan. This includes having a clear understanding of your capacity and the resources at your disposal, and determining the few priorities that will best help your organization achieve its goals. Successful strategic planning necessitates asking critical questions, making sometimes difficult decisions, and being OK with saying "no".

6 Commit to Making Changes—Especially Leadership

Change is difficult for everyone. It's especially difficult for organizations that have been doing things a certain way for a long time. However, external forces such as changing demographics and technological advances often necessitate major changes for an organization to remain relevant. To ensure your strategic plan's success, leadership needs to be willing to commit to letting go of established processes, rethinking their strategy, and making the changes necessary to lead your organization into the future.

Successful Strategic Planning Douglas W. Steeples,1988 This sourcebook is about successful strategic planning Grounded in practice and experience rather than theory and research it presents firsthand accounts of strategic planning as effectively employed by presidents who used that approach as a potent device for shaping the futures of their colleges and universities in a time of uncertainties and challenges The purpose of this volume of New Directions for Higher Education is to provides ideas examples and illustrations of strategic planning a method by which institutions can creatively respond to threats and opportunities in the increasingly competitive environment confronting them and at the same time continue to serve the ideals that define their missions This is the 64th issue of New Directions for Higher Education For more information on the series please see the Journals and Periodicals page

From Strategy to Change Daniel James Rowley,Herbert Sherman,2004-03-29 In From Strategy to Change the last in a series Daniel James Rowley comes full circle in defining his unique vision of the strategic planning process Written with Herbert Sherman From Strategy to Change shows how to take the next step after a strategic plan has been formulated The authors clearly show how to implement a strategic plan that will meet the myriad challenges of today s complex higher education environment and spell success for the academy It is amazing that while sports teams of colleges and universities meticulously plan their contests against their opponents their institutions administrators don t spend nearly enough time or effort in creating andimplementing a strategy Institutions of higher education seem to be missing the requisite tools to develop and activate their play book With this new age of globally available real time information it becomes increasingly more essential to have a map to help go over and around obstacles avoid the ever present pitfalls and effectively aid in selecting the best route Rowley and Sherman provide such tools in this exciting and comprehensive new book I wish that when I was a department chair president of a faculty senate and dean that this superb work was available My function in planning would have been so much easier and more rewarding Barry R Armandi Distinguished Teaching Professor SUNY Old Westbury

Toward a More Strategic View of Strategic Planning Research John M. Bryson,Lauren Hamilton Edwards,David M. Van Slyke,2022-08-15

This book summarizes the current state of research on strategic planning and offers an agenda for future research. The book edition comes with a new introduction that argues that strategising by public non-profit and business organisations should be a major focus of research. Strategising is what links aspirations, capabilities and implementation. Strategic planning should be viewed as one approach but not the only approach to strategising. A focus on strategising prompts researchers to consider issues of vertical and horizontal alignment of purpose including across sectors, competence and scalability, co-production, decision making and change management and trust, transparency, authenticity and accountability. Additionally, the role of various strategising techniques and information technology should be analysed further. Beyond the book's introductory overview of the field, chapters focus on the following topics: planning styles, collaboration, strategic plans and government performance, impacts of context and political responsibilities on government strategic planning efforts, impacts of strategic planning in municipal governments, impacts of austerity on strategic planning and government performance. The chapters in this book were originally published as a special issue of the journal *Public Management Review*.

Leadership Theories and Case Studies Garry Wade McGiboney, 2018-07-27. Effective leadership does not occur by chance. Leaders must be trained and groomed for the daunting responsibility of leading organizations. Research shows that half of the people currently in leadership positions will fail. Why they fail and what can be done to prevent failure are the main subjects of this book. It shows that effective leadership is possible and illustrates why and how based on research and case studies from an epidemiological perspective. The epidemiological word determinant is used frequently and is a word that no other book on leadership uses. Epidemiologists work from two basic principles, namely that all diseases have determinants and that diseases do not occur randomly. In other words, there are always causes for diseases and patterns that describe how diseases spread. Effective and ineffective leadership always have determinants that are not randomly distributed; the impacts are uniformly and deeply spread throughout an organization. Like the epidemiologists, this book not only identifies leadership determinants but also provides research-based antidotes at the end of each chapter along with a summary of the most salient points in the chapter. This book offers examples of leadership and governance from the non-profit sector, businesses, public and private education, higher education and other organizations, highlighting over 50 case studies to illustrate concepts about leadership.

Strategic Planning for Nonprofits James Fulton, *Strategic Planning for Nonprofits* is a comprehensive guide that provides nonprofit organizations with essential tools and frameworks to develop effective strategic plans. The book emphasizes the importance of aligning mission, vision and values with practical goals and objectives. It outlines the strategic planning process, including stakeholder engagement, environmental analysis and the establishment of measurable outcomes. Through case studies and real-life examples, readers learn how to navigate challenges unique to the nonprofit sector, enabling them to create actionable strategies that foster sustainability, enhance impact and drive long-term success in fulfilling their missions.
