Neighborhood and Ancestry Jonathan Owens, 1998-01-01 Over the past 35 years urban sociolinguistics has developed upon the base of detailed case studies carried out mainly in western countries A fundamental dichotomy informing the interpretation of variation has been carried out within what is termed the standard vernacular model Higher vs lower social class power vs solidarity open networks vs closed networks are a few of the conceptual dyads which have been invoked to order linguistic variation operating with an input from a standard vernacular source The present study based on the spoken Arabic of Maiduguri Nigeria focuses on a linguistic landscape where the notions of standard and vernacular are of little relevance in ordering urban linguistic variants It is argued that linguistic variation is best conceptualized and ordered in terms of the twin variables of neighborhood and ancestral norms A detailed analysis of 13 linguistic variables based on a corpus of about 500 000 words invokes an urban linguistic world different from that in the West To integrate this landscape into current sociolinguistic thinking a typology of urban variation is outlined using familiar yet relatively unutilized sociolinguistic parameters neighborhood ancestry minority status and institutionalization *Trickster Travels* Natalie Zemon Davis, 2007-03-06 An engrossing study of Leo Africanus and his famous book which introduced Africa to European readers Al Hasan al Wazzan born in Granada to a Muslim family that in 1492 went to Morocco where he traveled extensively on behalf of the sultan of Fez is known to historians as Leo Africanus author of the first geography of Africa to be published in Europe in 1550 He had been captured by Christian pirates in the Mediterranean and imprisoned by the pope then released baptized and allowed a European life of scholarship as the Christian writer Giovanni Leone In this fascinating new book the distinguished historian Natalie Zemon Davis offers a virtuoso study of the fragmentary partial and often contradictory traces that al Hasan al Wazzan left behind him and a superb interpretation of his extraordinary life and work In *Trickster Travels* Davis describes all the sectors of her hero s life in rich detail scrutinizing the evidence of al Hasan s movement between cultural worlds the Islamic and Arab traditions genres and ideas available to him and his adventures with Christians and Jews in a European community of learned men and powerful church leaders In depicting the life of this adventurous border

crosser Davis suggests the many ways cultural barriers are negotiated and diverging traditions are fused

The Character of Kingship Declan Quigley, 2020-05-31 Why has monarchy been such a prevalent institution throughout history and in such a diverse range of societies Kingship is at the heart of both ritual and politics and has major implications for the theory of social and cultural anthropology Yet despite the contemporary fascination with royalty anthropologists have sorely neglected the subject in recent decades This book combines a strong theoretical argument with a wealth of ethnography from kingships in Africa Asia and the Pacific Quigley gives a timely and much needed overview of the anthropology of kingship and a crucial reassessment of the contributions of Frazer and Hocart to debates about the nature and function of royal ritual From diverse fieldwork sites a number of eminent anthropologists demonstrate how ritual and power intertwine to produce a series of variations around myth tragedy and historical realities However underneath this diversity two common themes invariably emerge the attempt to portray kingship as timeless and perfect and the dual nature of the king as sacred being and scapegoat

A Fistful of Shells Toby Green, 2019-03-21 By the time the Scramble for Africa among European colonial powers began in the late nineteenth century Africa had already been globally connected for centuries Its gold had fueled the economies of Europe and the Islamic world for nearly a millennium and the sophisticated kingdoms spanning its west coast had traded with Europeans since the fifteenth century Until at least 1650 this was a trade of equals using a variety of currencies most importantly cowrie shells imported from the Maldives and nzimbu shells imported from Brazil But as the slave trade grew African kingdoms began to lose prominence in the growing global economy We have been living with the effects of this shift ever since With *A Fistful of Shells* Toby Green transforms our view of West and West Central Africa by reconstructing the world of these kingdoms which revolved around trade diplomacy complex religious beliefs and the production of art Green shows how the slave trade led to economic disparities that caused African kingdoms to lose relative political and economic power The concentration of money in the hands of Atlantic elites in and outside these kingdoms brought about a revolutionary nineteenth century in Africa parallel to the upheavals then taking place in Europe and America Yet political fragmentation following the fall of African aristocracies produced radically different results as European colonization took hold Drawing not just on written histories but on archival research in nine countries art oral history archaeology and letters Green lays bare the transformations that have shaped world politics and the global economy since the fifteenth century and paints a new and masterful portrait of West Africa past and present

Understanding Jihad David Cook, 2005-05-23 Jihad is one of the most loaded and misunderstood terms in the news today Contrary to popular understanding the term does not mean holy war Nor does it simply refer to the inner spiritual struggle This book judiciously balanced accessibly written and highly relevant to today's events unravels the tangled historical intellectual and political meanings of jihad Looking closely at a

range of sources from sacred Islamic texts to modern interpretations This book opens a critically important perspective on the role of Islam in the contemporary world The author also describes some of the conflicts that occur in radical groups and shows how the more mainstream supporters of these groups have come to understand and justify violence Back cover
