of theory Murray defends contractarianism by appealing to evolutionary game theory and metaethical analyses His main argument is that we are not going to find morality as an objective fact in the world and that instead we can understand morality as a reciprocal cooperative trait From this minimal moral architecture Murray derives his innovative consent principle The application of the theory detailing what contractarians can or ought to say about moral matters takes up the greater portion of the work Murray offers a trenchant examination of what moral constraints we can claim concerning death abortion euthanasia and capital punishment sex pornography prostitution and sexual assault beneficence toward present and future people animals and the environment and liberty genetic enhancement organ sales and torture By focusing on evolutionary contractarianism and the epistemic justification of our moral claims or lack thereof Malcolm Murray's *Morals and Consent* is a serious advance in the field of applied ethics and fills an important void
