Engerman, David Richardson, 2021-08-12 Medieval slavery has received little attention relative to slavery in ancient Greece and Rome and in the early modern Atlantic world This imbalance in the scholarship has led many to assume that slavery was of minor importance in the Middle Ages In fact the practice of slavery continued unabated across the globe throughout the medieval millennium This volume the final volume in The Cambridge World History of Slavery covers the period between the fall of Rome and the rise of the transatlantic plantation complexes by assembling twenty three original essays written by scholars acknowledged as leaders in their respective fields The volume demonstrates the continual and central presence of slavery in societies worldwide between 500 CE and 1420 CE The essays analyze key concepts in the history of slavery including gender trade empire state formation and diplomacy labor childhood social status and mobility cultural attitudes spectrums of dependency and coercion and life histories of enslaved people

Infant and Child Mortality in the Past Alain Bideau, Bertrand Desjardins, Héctor Pérez Brignoli, 1997 The main demographic revolution in modern history has been the increased survival of children the gradual elimination of the biological waste linked to the high mortality of the past This volume examines the trends of early age mortality across time and space and the methodological and theoretical problems inherent in such studies It widens the discussion beyond the standard European

focus by including data from Asian and American sources showing that they offer enormous potential for researchers At the same time it makes clear the need for cautious treatment of historical data and points towards the design of techniques for appraising their quality correcting distortions and filling gaps The analysis demonstrates that levels of infant and child mortality are linked not only to material conditions of life but also to social and cultural factors The authors argue that a better understanding of these interactions can only come from an interdisciplinary approach where demography joins forces with biology medicine public health and social and economic history

The Tale of the Hero who was Exposed at Birth in Euripidean Tragedy Marc Huys, 1995 **Between Birth and Death** Michelle T. King, 2014-01-08 Female infanticide is a social practice often closely associated with Chinese culture Journalists social scientists and historians alike emphasize that it is a result of the persistence of son preference from China's ancient past to its modern present Yet how is it that the killing of newborn daughters has come to be so intimately associated with Chinese culture Between Birth and Death locates a significant historical shift in the representation of female infanticide during the nineteenth century It was during these years that the practice transformed from a moral and deeply local issue affecting communities into an emblematic cultural marker of a backwards Chinese civilization requiring the scientific religious and political attention of the West Using a wide array of Chinese French and English primary sources the book takes readers on an unusual historical journey presenting the varied perspectives of those concerned with the fate of an unwanted Chinese daughter a late imperial Chinese mother in the immediate moments following birth a male Chinese philanthropist dedicated to rectifying moral behavior in his community Western Sinological experts preoccupied with determining the comparative prevalence of the practice Catholic missionaries and schoolchildren intent on saving the souls of heathen Chinese children and turn of the century reformers grappling with the problem as a challenge for an emerging nation

and a parent in America at the dawn of the new millennium John Zornado explores the history and development of the concept of childhood starting with the works of Calvin Freud and Rousseau and culminating with the modern consumer childhood of Dr Spock and television The volume discusses major media depictions of childhood and examines the ways in which parents use different forms of media to swaddle educate and entertain their children Zornado argues that the stories we tell our children contain the ideologies of the dominant culture which more often than not promote happiness at all costs materialism as the way to happiness and above all obedience to the dominant order

Crime and Punishment in the Middle Ages and Early Modern Age Albrecht Classen, Connie Scarborough, 2012-10-30 All societies are constructed based on specific rules norms and laws Hence all ethics and morality are predicated on perceived right or wrong behavior and much of human culture proves to be the result of a larger discourse on vices and virtues transgression and ideals right and wrong The topics covered in this volume addressing fundamental concerns of the premodern world deal with allegedly criminal or simply wrong behavior which demanded punishment Sometimes this affected whole groups of people such as the innocently persecuted Jews sometimes individuals such as violent and evil princes The issue at stake here embraces all of society since it can only survive if a general framework is observed that is based in some way on justice and peace But literature and the visual arts provide many examples of open and public protests against wrongdoings ill conceived ideas and concepts and stark crimes such as theft rape and murder In fact poetic statements or paintings could carry significant potentials against those who deliberately transgressed moral and ethical norms or who even targeted themselves
