Holmes, 2012-12-01 A second nuclear age has begun in the post Cold War world Created by the expansion of nuclear arsenals and new proliferation in Asia it has changed the familiar nuclear geometry of the Cold War Increasing potency of nuclear arsenals in China India and Pakistan the nuclear breakout in North Korea and the potential for more states to cross the nuclear weapons threshold from Iran to Japan suggest that the second nuclear age of many competing nuclear powers has the potential to be even less stable than the first Strategy in the Second Nuclear Age assembles a group of distinguished scholars to grapple with the matter of how the United States its allies and its friends must size up the strategies doctrines and force structures currently taking shape if they are to design responses that reinforce deterrence amid vastly more complex strategic circumstances By focusing sharply on strategy that is on how states use doomsday weaponry for political gain the book distinguishes itself from familiar net assessments emphasizing quantifiable factors like hardware technical characteristics and manpower While the emphasis varies from chapter to chapter contributors pay special heed to the logistical technological and social dimensions of strategy alongside the specifics of force structure and operations They never lose sight of the human factor the pivotal factor in diplomacy strategy and war      *Greece, Spain, and the Southern NATO Strategy* United States. and the short stories of Flannery O'Connor that influenced Springsteen as he was writing the album's haunting songs. The result is a textured and revelatory account of not only a crucial moment in the career of an icon but also a record that upended all expectations and predicted a home recording revolution.

*Unavoidable Industrial Restructuring in Latin America* Fernando Fajnzylber, 1990 In the recent economic history of Latin America no country has yet found the means to combine effectively economic growth with equity. *Unavoidable Industrial Restructuring in Latin America* compares the development path of Latin America with that of the East Asian newly industrialized countries (NICs), the United States and Europe in the 1970s and 1980s to show the national policies and international cooperation necessary to set Latin American countries on the road to healthy economies. Fernando Fajnzylber argues that technological and industrial progress is the driving force of a positive relationship among dynamism, competitiveness, austerity and equity. Latin America's failure to master this technological progress underlies its economic difficulties. To overcome the inheritance of past mistakes, the author maintains, Latin America must undergo not only macroeconomic stabilization and a reduction of the debt burden but also a complete transformation of the production structure. The role of the state and the institutional setup need to be modified and new social and sectoral policies devised. Fajnzylber sees this radical restructuring as an unavoidable step if Latin America is ever to achieve a workable balance between growth and equity.
