The Landscape In Art From 3000 Bc To Today:

Phenomenology, Modernism and Beyond Carole Bourne-Taylor, Ariane Mildenberg, 2010 From the first stirrings of modernism to contemporary poetics the modernist aesthetic project could be described as a form of phenomenological reduction that attempts to return to the invisible and unsayable foundations of human perception and expression prior to objective points of view and scientific notions It is this aspect of modernism that this book brings to the fore The essays presented here bring into focus the contemporary face of ongoing debates about phenomenology and modernism The contributors forcefully underline the intertwining of modernism and phenomenology and the extent to which the latter offers a clue to the former The book presents the viewpoints of a range of internationally distinguished critics and scholars with diverse but closely related essays covering a wide range of fields including literature architecture philosophy and musicology The collection addresses critical questions regarding the relationship between phenomenology and modernism with reference to thinkers such as Edmund Husserl Maurice Merleau Ponty Martin Heidegger Michel Henry and Paul Ricoeur By examining the contemporary philosophical debates this cross disciplinary body of research reveals the pervasive and far reaching influence of phenomenology which emerges as a heuristic method to articulate modernist aesthetic concerns

The Built Surface: v. 1: Architecture and the Visual Arts from Antiquity to the Enlightenment Christy Anderson, Karen Koehler, 2017-11-22 This title was first published in 2002 Since antiquity through to the present architecture and the pictorial arts paintings photography graphic arts have not been rigidly separated but interrelated the one informing the other and establishing patterns of creation and reception In the Classical tradition the education of the architect and artist has always stressed this relationship between the arts although modern scholarship has too often treated them as separate disciplines These volumes explore the history of this exchange between the arts as it emerged from classical theory into artistic and architectural practice Issues of visual representation perspective allegory site specificity ornamentation popular culture memorials urban and utopian planning and the role of treatises manifestos and other theoretical writings are addressed as well as the critical reaction to these products and practices This title represents a variety of methods approaches and dialectical interpretations cases where architecture informs the themes and physical space of pictures or pictorial concerns inform the design and construction of the built environment The exchanges between architecture and pictures explored by these authors are found to be in all cases ideologically potent and therefore significantly expressive of their respective social political and intellectual histories

Surface/Subsurface Michael Manfredi, Marion Weiss, 2008 For nearly two decades the architecture firm Weiss Manfredi has practiced outside the traditional boundaries of architecture Their work with complex sites and programs benefits from an interdisciplinary approach and a dynamic integration of architecture art infrastructure and landscape design *Surface Subsurface* presents nine major projects that have been completed since their first monograph *Site Specific* published in 2000 Their design process exemplary of the best contemporary architectural practices reveals

potential in subsurface conditions with the goal of generating an entirely new language for the surface Projects include the Olympic Sculpture Park in Seattle which wanders over a highway and train lines the Museum of the Earth in Ithaca New York which manipulates the movement of water cars and visitors and the Smith College Campus Center in Northampton Massachusetts which transforms the brick campus into a luminous terracotta surface Each project is fully documented through project photographs drawings details and texts
