Spanish Society, 1348-1700 Teófilo F. Ruiz, 2017-06-26 Beginning with the Black Death in 1348 and extending through to the demise of Habsburg rule in 1700 this second edition of Spanish Society 1348 1700 has been expanded to provide a wide and compelling exploration of Spain's transition from the Middle Ages to modernity Each chapter builds on the first edition by offering new evidence of the changes in Spain's social structure between the fourteenth and seventeenth century Every part of society is examined culminating in a final section that is entirely new to the second edition and presents the changing social practices of the period particularly in response to the growing crises facing Spain as it moved into the seventeenth century Also new to this edition is a consideration of the social meaning of culture specifically the presence of Hermetic themes and of magical elements in Golden Age literature and Cervantes Don Quixote Through the extensive use of case studies historical examples and literary extracts Spanish Society is an ideal way for students to gain direct access to this captivating period

Selected Poems Antonio Machado, 1982 Regarded by many as the finest poet of 20th century Spain Antonio Machado y Ruiz 1875 1939 is not well known outside the Spanish speaking world Some 250 poems in Spanish drawn from Machado's entire oeuvre are accompanied on facing pages by sensitive and beautifully fluent translations

Spanish Society, 1400-1600 Teófilo F Ruiz, 2014-09-11 Spanish Society depicts a complex and fascinating country in transition from the late Middle Ages to modernity It describes every part of society from the gluttonous nobility to their starving peasants Through anecdotes a lively style and portraits of figures such as St Teresa of Avila and Torquemada the book reflects the character and humour with which the common Spaniard endured an often wretched lot Beginning with a description of the geography political life and culture of Spain from 1400 to 1600 the

unfolding narrative charts the country's shifts from one age to the next. It unveils patterns of everyday life from the court to the brothel from the haves of the aristocracy and clergy to the have-nots of the peasantry and the urban poor. Historical records illuminate details of Spanish society such as the transition from medieval festivities to the highly scripted spectacles of the early modern period, the reasons for violence and popular resistance, and the patterns of daily living, eating, dressing, religious beliefs, and concepts of honour and sexuality. This compelling account includes historical examples and literary extracts which allow the reader direct access to the period. From the street theatre of village carnivals to the oppressive Spanish Inquisition, it gives an abiding sense of Spain in the making and renders vivid the colours of a passionate history.

Sacred Landscapes in Antiquity Ralph Haussler, Gian Franco Chiaia, 2020-07-31. From generation to generation, people experience their landscapes differently. Humans depend on their natural environment; it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities, such as droughts, famines, floods, and landslides, need to be appeased. We presume that in many societies, lakes, rivers, rocks, mountains, caves, and groves were considered sacred. Individual sites and entire landscapes are often associated with divine actions, mythical heroes, and etiological myths. Throughout human history, people have also felt the need to monumentalize their sacred landscape. But this is where the similarities end, as different societies had very different understandings, beliefs, and practices. The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi-disciplinary approach. More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east. They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it. We see the role of performance, ritual, orality, textuality, and memory in people's sacred landscapes. A diachronic view allows us to study how landscapes were rewritten, adapted, and redefined in the course of time to suit new cultural, political, and religious understandings, not to mention the impact of urbanism on people's understandings. A key question is how was the landscape manipulated, transformed, and monumentalized, especially the colossal investments in monumental architecture we see in certain socio-historic contexts or the creation of an alternative, human-made, seemingly non-natural landscape with perfectly astronomically aligned buildings that define a cosmological order. Sacred Landscapes therefore aims to analyze the complex links between landscape, religiosity, and society, developing a dialectic framework that explores sacred landscapes.

across the ancient world in a dynamic holistic contextual and historical perspective **Negotiating Past and Present** David Thatcher Gies,1997 **Re-Imagining Resilient Productive Landscapes** Carla Brisotto,Fabiano Lemes de Oliveira,2022-03-09 This book explores how lessons from past urban planning experiences can inform current debates on urban agriculture Productive landscapes today have been posited as instruments for the positive transformation related to territorial fragility and abandonment promoting social cohesion food security and wider environmental and economic benefits The book will re map the way in which seeming landscape limitations and challenges can be turned into potential innovation and a new lease of urban rural life It does so by drawing on significant past urban agricultural experiences in planning as vectors for new critical reflections relevant to re igniting ideas for future envisioning of urban scenarios in which productive landscapes play fundamental transformative roles The focus is on planning ideas and the roles of key individual planners all of which have designed agricultural strategies for the city at some point in their careers It intends to help us today reimagine urban rural relationships and the transformation of under or mis used urban open spaces peri urban areas fringe conditions and in between spaces Campos de Castilla Antonio Machado,2002 Antonio Machado was born in Seville in 1885 and died in southern France early in 1939 escaping from the Nationalist advance in the Spanish Civil War He is increasingly recognized as one of the four greatest Spanish language poets of the twentieth century but lack of adequate translations has limited his appreciation in the English speaking world Here a native Spanish and a native English speaker set out to remedy this deficiency The beauty of his landscape fused with its sadness as his young wife s resting pace gave Machado his distinctive voice intimate elegiac at once detached and involved most characteristically expressed in Campos de Castilla 1917 from which many of the poems here selected are taken The language of his poetry is spare relying strongly on nouns and adjectives asserting more than describing equally anti baroque and against the excesses of modern cosmetics Self Portrait His father had been a collector of folklore and Machado saw the romance ballad tradition as lying at the heart of the authentic Spanish poetic tradition English cannot recreate the assonance on which he relied but this translation captures the essential rhythm as well as the poignancy of the original Spanish text with facing page translation introduction and notes

The Poetry of Antonio Machado Xon de Ros,2015 This book offers a much needed reappraisal of a major twentieth century Spanish poet Antonio Machado 1875 1939 offering compelling arguments why his poetry should have a more vital profile not only within the precincts of Hispanism but also alongside the most significant twentieth century poets of Europe and America seeking to open up new perspectives for the interpretation of his poetry The unifying concepts as the title suggests are landscape and transformation Landscape a topic barely broached in Spanish poetry before Machado is a central thematic concern in his poetry

European Landscapes of Rock-Art Christopher Chippindale,George Nash,2003-09-02 Rock art the ancient images which still scatter the rocky landscapes of Europe is a singular kind of archaeological evidence Fixed in place it does not move about as artefacts as trade objects do Enigmatic in its meaning it uniquely offers a direct record of how prehistoric Europeans saw and envisioned their own worlds European Landscapes of Rock Art provides a number of case studies covering arange of European locations including Ireland Italy Scandinavia Scotland and Spain which collectively address the chronology and geography of rock art as well as providing an essential series of methodologies for future debate Each author provides a synthesis that focuses on landscape as an essential part of rock art construction From the paintings and carved images of prehistoric Scandinavia to Second World War grafitti on the German Reichstag this volume looks beyond the art to the society that made it The papers in this volume also challenge the traditional views of how rock art is recorded Throughout there is an emphasis on informal and informed methodologies The authors skilfully discuss subjectivity and its relationship with landscape since personal

experience from prehistoric times to the present day plays an essential role in the interpretation of art itself The emphasis is on location on the intentionality of the artist and on the needs of the audience This exciting volume is a crucial addition to rock art literature and landscape archaeology It will provide new material for a lively and greatly debated subject and as such will be essential for academics non academics and commentators of rock art in general **Layered Landscapes** Eric Nelson, Jonathan Wright, 2017-06-26 This volume explores the conceptualization and construction of sacred space in a wide variety of faith traditions Christianity Hinduism Islam Judaism and the religions of Japan It deploys the notion of layered landscapes in order to trace the accretions of praxis and belief the tensions between old and new devotional patterns and the imposition of new religious ideas and behaviors on pre existing religious landscapes in a series of carefully chosen locales Cuzco Edo Geneva Granada Herat Istanbul Jerusalem Kanchipuram Paris Philadelphia Prague and Rome Some chapters hone in on the process of imposing novel religious beliefs while others focus on how vestiges of displaced faiths endured The intersection of sacred landscapes with political power the world of ritual and the expression of broader cultural and social identity are also examined Crucially the volume reveals that the creation of sacred space frequently involved more than religious buildings and was a work of historical imagination and textual expression While a book of contrasts as much as comparisons the volume demonstrates that vital questions about the location of the sacred and its reification in the landscape were posed by religious believers across the early modern world *The Desclergues of la Villa Ducal de Montblanc, Second Edition Omnibus* Nico F. Late Intermediate Period in the Southern Andes Alina Álvarez Larrain,Catriel Greco,2018-04-18 This book studies the relationship between pukaras and their surrounding landscape focusing on the architectural and settlement variability registered in both contexts It is the outcome of a symposium held at the XIX National Congress of Argentine Archaeology San Miguel de Tucuman August 8 12 2016 entitled Pukaras strategic settlements and dispersed settlements Political landscapes of the Late Intermediate Period in the Southern Andes Based on the topics discussed at the event this book presents nine case studies covering a large geographic area within the Southern Andes northwestern Argentina northern Chile and southern Bolivia and breaking the national barriers that tend to atomize pre Hispanic landscapes The respective chapters cover a wide range of themes from architectural and settlement variability ways to build and inhabit space social segmentation and hierarchy to endemic conflict analysis of accessibility and visibility spatiality and temporality of landscapes as well as new dating This book goes beyond the Late Intermediate Period LIP analyses from the perspective of fortified

settlements and material evidence related to war by placing the focus on how ancient political landscapes were constructed from the relation between the pukaras and other sites as part of the same territory. The methodologies used include pedestrian surveys, photogrammetric surveys with UAVs (unmanned aerial vehicles or drones), topographic and architectural surveys, excavations of households, ceramic and rock art analysis, and spatial analysis with geographic information systems (GISs). Given the numerous thematic interconnections between the contributions, the Editors have organized the chapters geographically moving from south to north: from the southern valleys of Catamarca Province in Argentina to Lipez in the southern part of the Bolivian Altiplano, passing through the Calchaqui valleys of Catamarca, the puna and Quebrada de Humahuaca of Jujuy in northwest Argentina, and the Antofagasta region in northern Chile. The book provides valuable new theoretical and methodological perspectives on the study of political landscapes of the Late Intermediate Period in the Southern Andes.
